

# **The EBRD-EIB-WB Enterprise Surveys 2018-2020**

A Report on methodology and observations  
July 2020

# Table of Contents

<b>TABLE OF CONTENTS.....</b>	<b>I</b>
<b>1 BACKGROUND.....</b>	<b>6</b>
<b>2 ES METHODOLOGY .....</b>	<b>7</b>
2.1 SURVEY UNIVERSE, SAMPLE POPULATION AND SAMPLING FRAMES .....	7
2.2 SPECIFICATIONS OF THE SURVEY .....	8
2.2.1 Coverage of countries: .....	8
2.2.2 Sampling structure .....	8
2.3 SAMPLING IMPLEMENTATION .....	9
<b>3 FIELDWORK.....</b>	<b>10</b>
3.1 QUESTIONNAIRES AND TRANSLATIONS .....	10
3.2 CAPI SCRIPTING AND TESTING .....	12
3.3 MODE OF COMPLETION .....	12
3.4 TRAINING .....	12
3.5 PILOTING .....	13
<b>4 SURVEY AND ITEM NON-RESPONSE .....</b>	<b>13</b>
<b>5 ES DATABASE .....</b>	<b>14</b>
5.1 DATABASE STRUCTURE .....	14
5.2 WEIGHTS .....	17
5.2.1 Appropriate use of the weights .....	18
<b>6 BIBLIOGRAPHY.....</b>	<b>19</b>
<b>ANNEX A COUNTRY-SPECIFIC INFORMATION ON BEEPS SURVEY .....</b>	<b>20</b>
A.1 ALBANIA .....	20
A.1.1 Sampling structure and implementation.....	20
A.1.2 Status codes.....	22
A.1.3 Universe estimates .....	23
A.1.4 Non-response.....	25
A.1.5 Local agency team involved in the study and its comments on the implementation.....	26
A.2 ARMENIA .....	27
A.2.1 Sampling structure and implementation.....	27
A.2.2 Status codes.....	27
A.2.3 Universe estimates .....	27
A.2.4 Non-response.....	27
A.3 AZERBAIJAN .....	27
A.3.1 Sampling structure and implementation.....	27
A.3.2 Status codes.....	30
A.3.3 Universe estimates .....	31
A.3.4 Non-response.....	33
A.4 BELARUS .....	34
A.4.1 Sampling structure and implementation.....	34
A.4.2 Status codes.....	41
A.4.3 Universe estimates .....	42
A.4.4 Non-Response.....	46
A.4.5 Local agency team involved in the study and its comments on the implementation.....	47
A.5 BOSNIA AND HERZEGOVINA .....	49
A.5.1 Sampling structure and implementation.....	49
A.5.2 Status codes.....	52
A.5.3 Universe estimates .....	53
A.5.4 Non-response.....	55
A.5.5 Local agency team involved in the study and its comments on the implementation.....	56
A.6 BULGARIA .....	57
A.6.1 Sampling structure and implementation.....	57
A.6.2 Status Codes .....	61
A.6.3 Universe estimates .....	63

A.6.4.	<i>Non-Response</i> .....	65
A.7	CROATIA.....	65
A.7.1.	<i>Sampling structure and implementation</i> .....	65
A.7.2.	<i>Status codes</i> .....	67
A.7.3.	<i>Universe estimates</i> .....	69
A.7.4.	<i>Non-response</i> .....	70
A.8	CZECH REPUBLIC.....	71
A.8.1.	<i>Sampling structure and implementation</i> .....	71
A.8.2.	<i>Status Codes</i> .....	74
A.8.3.	<i>Universe estimates</i> .....	75
A.8.4.	<i>Non-Response</i> .....	77
A.9	EGYPT.....	78
A.9.1.	<i>Sampling structure and implementation</i> .....	78
A.9.2.	<i>Status Codes</i> .....	86
A.9.3.	<i>Universe estimates</i> .....	87
A.9.4.	<i>Non-Response</i> .....	91
A.10	ESTONIA.....	92
A.10.1.	<i>Sampling structure and implementation</i> .....	92
A.10.2.	<i>Status Codes</i> .....	94
A.10.3.	<i>Universe estimates</i> .....	95
A.10.4.	<i>Non-Response</i> .....	96
A.11	GEORGIA.....	97
A.11.1.	<i>Sampling structure and implementation</i> .....	97
A.11.2.	<i>Status Codes</i> .....	104
A.11.3.	<i>Universe estimates</i> .....	105
A.11.4.	<i>Non-Response</i> .....	108
A.12	GREECE.....	109
A.12.1.	<i>Sampling structure and implementation</i> .....	109
A.12.2.	<i>Status Codes</i> .....	111
A.12.3.	<i>Universe estimates</i> .....	113
A.12.4.	<i>Non-Response</i> .....	114
A.13	HUNGARY.....	115
A.13.1.	<i>Sampling structure and implementation</i> .....	115
A.13.2.	<i>Status codes</i> .....	120
A.13.3.	<i>Universe estimates</i> .....	121
A.13.4.	<i>Non-Response</i> .....	124
A.14	ITALY.....	125
A.14.1.	<i>Sampling structure and implementation</i> .....	125
A.14.2.	<i>Status codes</i> .....	129
A.14.3.	<i>Universe estimates</i> .....	130
A.14.4.	<i>Non-response</i> .....	132
A.15	JORDAN.....	133
A.15.1.	<i>Sampling structure and implementation</i> .....	133
A.15.2.	<i>Status Codes</i> .....	136
A.15.3.	<i>Universe estimates</i> .....	137
A.15.4.	<i>Non-Response</i> .....	139
A.16	KAZAKHSTAN.....	141
A.16.1.	<i>Sampling structure and implementation</i> .....	141
A.16.2.	<i>Status codes</i> .....	150
A.16.3.	<i>Universe estimates</i> .....	151
A.16.4.	<i>Non-response</i> .....	158
A.16.5.	<i>Local agency team involved in the study and its comments on the implementation</i> .....	158
A.17	KOSOVO.....	161
A.17.1.	<i>Sampling structure and implementation</i> .....	161
A.17.2.	<i>Status codes</i> .....	165
A.17.3.	<i>Universe estimates</i> .....	166
A.17.4.	<i>Non-response</i> .....	169
A.17.5.	<i>Local agency team involved in the study and its comments on the implementation</i> .....	170
A.18	KYRGYZ REPUBLIC.....	171
A.18.1.	<i>Sampling structure and implementation</i> .....	171
A.18.2.	<i>Status codes</i> .....	174
A.18.3.	<i>Universe Estimates</i> .....	175
A.18.4.	<i>Non-response</i> .....	177

A.18.5.	<i>Local agency team involved in the study and its comments on the implementation</i> .....	178

# 1 Background

The EBRD-EIB-WB Enterprise Surveys (ES) are a joint initiative of the European Bank for Reconstruction and Development (EBRD), European Investment Bank (EIB) and the World Bank Group (the World Bank). They are a successor to the Business Environment and Enterprise Performance Surveys (BEEPS). The survey was first undertaken on behalf of the EBRD and World Bank in 1999 – 2000, when it was administered to approximately 4,100 enterprises in 25 countries of Eastern Europe and Central Asia (including Turkey) to assess the environment for private enterprise and business development.

In the second round of BEEPS in 2002, the survey instrument was administered to almost 6,700 enterprises in 27 countries. In the third round of BEEPS, the survey included approximately 9,900 enterprises in 27 countries in 2005. In seven of the countries the survey included an additional sampling overlay of the manufacturing sector in addition to the main BEEPS sample. Furthermore, to set a benchmark for the transition countries, a survey of comparator countries was conducted in 2004-2005 in two rounds (Germany, Greece, Portugal, South Korea and Vietnam were covered in 2004 and Ireland and Spain in 2005).

In the fourth round of BEEPS in 2008-2009, the survey covered almost 12,000 enterprises in 29 countries (including Mongolia for the first time). The survey was restructured to improve cross-country comparability and to make it compatible with the [Enterprise Surveys](#) the Enterprise Analysis Unit of the World Bank has been implementing in other regions of the world since 2006. There were changes in the questionnaire and [methodology](#).

The fifth round of BEEPS (BEEPS V) in 2011-2016 covered almost 16,600 enterprises in 32 countries, including 4,220 enterprises in 37 regions in Russia. It included an Innovation Module, covering product, process, organisational and marketing innovation, as well as management practices in manufacturing enterprises with at least 20 employees (50 employees in Russia). BEEPS V Russia was implemented in 2011-2012. BEEPS V Cyprus and Greece was implemented in 2016 and covered 683 enterprises were covered.

The Middle East and North Africa Enterprise Surveys (MENA ES) are a joint initiative of the European Bank for Reconstruction and Development (EBRD), the World Bank Group (the World Bank) and the European Investment Bank (EIB). The survey was undertaken on behalf of the EBRD, World Bank and EIB for the first time in 2012-2014, when it was administered to more than 6,500 enterprises in 9 countries in the MENA region to assess the environment for private enterprise and business development. As BEEPS V, it also included an Innovation Module.

The ES (sixth round of BEEPS) in 2018-2020 will cover almost 28,000 enterprises in 41 economies. It includes a Green Economy module, covering green management practices and green investments.

The objective of the survey is to obtain feedback from enterprises in EBRD countries of operation (and beyond) on their perception of the environment in which they operate as well as to help in building a panel of enterprise data that will make it possible to track changes in the business environment over time.

Through interviews with firms in the manufacturing and services sectors, ES captures business perceptions of the biggest obstacles to enterprise growth, the relative importance of various constraints to increasing employment and productivity, and the effects of a country's business environment on its international competitiveness. ES is used to create statistically significant business environment indicators that are comparable across countries.

The report outlines and describes the sampling design of the data, the data set structure as well as additional information that may be useful when using the data, such as information on non-response cases and the appropriate use of weights.

The ES was implemented by various survey contractors, such as Ipsos MORI, Kantar, Yontem, AUC, ACT Global, Palestinian Central Bureau of Statistics in cooperation with local partners. For details, refer to Annex A.

ES has been supported by the EBRD Shareholder Special Fund.

## **2 ES Methodology**

### ***2.1 Survey universe, sample population and sampling frames***

The whole population, or universe of the study, are commercial, service or industrial business establishments with at least 5 full-time employees in the non-agricultural economy. It comprises: all manufacturing sectors according to the group classification of ISIC Revision 3.1: (group D), construction sector (group F), services sector (groups G and H), and transport, storage, and communications sector (group I). Note that this definition excludes the following sectors: financial intermediation (group J), real estate and renting activities (group K, except sub-sector 72, IT, which was added to the population under study), and all public or utilities-sectors. Government departments including military, police, education, health and similar activities were excluded, as were those in primary industries including agriculture, mining, etc. There are no up to date and reliable statistics relating to this universe in the countries being surveyed in ES. Consequently, the universe size and characteristics have to be directly estimated from the survey results themselves. This requirement increases the emphasis that has to be placed on the quality of the sample frame, because the validity of the results is predominantly a function of coverage and age of the sampling frame.

The criteria used to evaluate the available sampling frame in descending priority were those of:

- Coverage
- Up to datedness
- Availability of detailed stratification variables
- Location identifiers- address, phone number, email
- Electronic format availability
- Contact name(s)

The sampling frames used for the surveys must consist of the lists of enterprises in each country that most optimally meet these requirements. The final selection was made by the contractors in collaboration with the EBRD and the World Bank. For most countries covered in ES two sampling frames were used; the exception are countries where ES was conducted for the first time (Italy, Malta, Portugal). The first sampling frame was often an official frame of establishments supplied by the national statistical office of the country and the second sampling frame consisted of establishments that participated in BEEPS V/MENA ES. In Armenia, a suitable sampling frame did not exist, so the the design returned to first principles, using a blocks enumeration methodology.

## **2.2 Specifications of the survey**

### **2.2.1 Coverage of countries:**

ES will be implemented in 41 economies (Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Egypt, Estonia, Georgia, Greece, Hungary, Italy, Jordan, Kazakhstan, Kosovo, Kyrgyz Republic, Latvia, Lebanon, Lithuania, Malta, Moldova, Morocco, Mongolia, Montenegro, North Macedonia, Poland, Portugal, Romania, Russia, Serbia, Slovak Republic, Slovenia, Tajikistan, Tunisia, Turkey, Ukraine, Uzbekistan and West Bank and Gaza). It was not possible to implement ES in Turkmenistan.

### **2.2.2 Sampling structure**

In all countries where a reliable sampling frame was available (except Armenia), the sample was selected using stratified random sampling, following the methodology explained in the [Sampling Manual](#). Stratified random sampling was preferred over simple random sampling for several reasons:

- To obtain unbiased estimates for different subdivisions of the population with some known level of precision.
- To obtain unbiased estimates for the whole population. The whole population, or the universe of the study, is the non-agricultural economy. It comprises all manufacturing sectors according to the group classification of ISIC Revision 3.1 (group D), construction sector (group F), services sector (groups G and H), and transport, storage and communications sector (group I). Note that this definition excludes the following sectors: financial intermediation (group J), real estate and renting activities (group K, except sub sector 72, IT, which was added to the population under study), and all public or utilities sectors.
- To make sure that the final total sample includes establishments from all different sectors and that it is not concentrated in one or two of industries/sizes/regions.
- To exploit the benefits of stratified sampling where population estimates, in most cases, will be more precise than using a simple random sampling method (i.e., lower standard errors, all things being equal).
- Stratification may produce a smaller bound on the error of estimation than would be produced by a simple random sample of the same size. This result is particularly true if measurements within strata are homogeneous.
- The cost per observation in the survey may be reduced by stratification of the population elements into convenient groupings.

Due to a lack of reliable sampling frame blocks enumeration was used in Armenia. Detailed description can be found under country-specific information.

Three levels of stratification were used in all countries: industry, establishment size and region. The original sample designs with specific information of the industries and regions chosen are described in country-specific pages in Annex A.

In all countries, the sample was stratified along Manufacturing, Retail trade (sector 52) and Other services. In some of the countries, there were specific target numbers of interviews for more detailed sectors within these three groups.

Size stratification was defined following the standardized definition for the rollout: small (5-19 employees), medium (20-99 employees), and large (more than 99 employees).<sup>1</sup> For stratification purposes, the number of employees was defined on the basis of reported permanent full-time workers. This seems to be an appropriate definition of the labour force,

---

<sup>1</sup> The panel firms from BEEPS with less than 5 employees are included in the 5 to 19 strata.

since seasonal/casual/part-time employment is not a common practice, except in the sectors of construction and agriculture.

Details on the regional stratification can be found in country-specific information in Annex A.

Along the defined stratification guidelines, priority was given to completing interviews with establishments who participated in BEEPS V or MENA ES.

## 2.3 Sampling implementation

Given the stratified design, sampling frames containing a complete and updated list of establishments as well as information on all stratification variables (number of employees, industry, and region) are required to draw the sample. Great efforts were made to obtain the best source for these listings. However, the quality of sampling frames was not optimal and, therefore, some adjustments were needed to correct for the presence of ineligible units. These adjustments are reflected in the weights computation.

For most countries covered in ES two sampling frames were used. The first sampling frame was obtained from the official sources in the countries (details for each country can be found in country-specific information). The second sampling frame, supplied by the EBRD and the World Bank, consisted of enterprises interviewed in BEEPS V and MENA ES. The contractors was required to attempt to re-interview establishments responding to the BEEPS V and MENA ES surveys where they were within the selected geographical region and met eligibility criteria. That sample is referred to as the Panel.

The quality of the sampling frames was assessed at the onset of the project through calls. The sampling frames proved to be useful, though they all showed positive rates of non-eligibility, repetition, non-existent units, etc. These problems are typical of establishment surveys but given the impact these inaccuracies may have on the results, adjustments were needed when computing the appropriate weights for individual observations.

Table 1 depicts the targeted Number of completed interviews for ES, along with achieved total Number of completed interviews and Number of completed interviews with panel establishments. For countries where data has not been published yet, the cells are left blank.

**Table 1: Targeted and achieved Number of completed interviews**

Country	Number of completed interviews						Completed in BEEPS V/MENA ES	
	Target	Completed	Panel	Manufacturing	Retail	Core	Completed	Panel
Albania	360	377	152	146	77	154	360	120

\* World Bank's Egypt Enterprise Survey 2016 was used for panel.

### 3 Fieldwork

#### 3.1 Questionnaires and translations

Two main questionnaires were used for the survey – manufacturing and services – depending on the respondent's industry. In addition, two green economy modules were used – manufacturing and services. A screener questionnaire was also used during the recruitment phase.

The questionnaires were translated into local languages (Table 2).

**Table 2: Questionnaire languages used in each country**

Country	Languages
Albania	Albanian
Armenia	Armenian
Azerbaijan	Azerbaijani
Belarus	Belarusian
Bosnia and Herzegovina	Bosnian
Bulgaria	Bulgarian
Croatia	Croatian

Country	Languages
Czech Republic	Czech
Egypt	Arabic
Estonia	Estonian, Russian
Georgia	Georgian
Greece	Greek
Hungary	Hungarian
Italy	Italian
Jordan	Arabic
Kazakhstan	Kazakh, Russian
Kosovo	Kosovan
Kyrgyz Republic	Kyrgyz, Russian
Latvia	Latvian, Russian
Lebanon	Arabic
Lithuania	Lithuanian
Malta	Maltese
Moldova	Romanian
Mongolia	Mongolian
Montenegro	Montenegrin
Morocco	Arabic, French
North Macedonia	Macedonian
Poland	Polish
Portugal	Portuguese
Republic of Cyprus	Greek, Turkish
Romania	Romanian
Serbia	Serbian
Slovak Republic	Slovak
Slovenia	Slovenian
Tajikistan	Tajik, Russian
Tunisia	Arabic, French
Turkey	Turkish
Ukraine	Ukrainian, Russian
Uzbekistan	Uzbek, Russian
West Bank and Gaza	Arabic

The translation process progressed as follows:

1. When the questionnaire and showcards were finalised, they were sent to the national agencies for translation.
2. The questionnaire was translated by a suitably qualified and experienced executive within each local agency into the national official languages.
3. The questionnaire was back translated into English by independent linguists from Language Connect, an independent translation agency.
4. The back translations were compared to the master English questionnaire by the Ipsos MORI team and a list of differences was sent to the local agency.
5. The local agencies amended the questionnaires.
6. The consultants' teams checked the changes had been made.
7. After the pilot, further changes were made to the questionnaire by the local agencies.
8. The national agencies sent the final national questionnaires and showcards to the contractors, and they were proof-read by a translation agency.
9. The questionnaires and showcards were sent to the EBRD and WB for their approval.

10. The EBRD and WB provided final comments on the translations before the translations were finalised by the local agencies
11. Final national questionnaires were sent to the EBRD and WB for their records.

In addition, Country Profiles were also translated by the local agencies and proof-read by the translation agency. The Country Profiles were used during or after fieldwork, as an incentive for the interviewees.

### **3.2 CAPI scripting and testing**

Once the translations had been approved, CAPI script was set up and thoroughly tested by each country manager. To test the script, the country manager checked the question wording and the routing was correct and made sure that logic checks had been built into the script where appropriate. WB and EBRD teams also checked CAPI script.

### **3.3 Mode of completion**

The survey was carried out face to face in home. Questionnaires were administered using Computer Assisted Personal Interviewing (CAPI), with the exception of Belarus, where Pen and Paper Interviewing (PAPI) was used.

### **3.4 Training**

Training briefings were either centralised, bringing together country managers of the local agencies participating in training, or conducted on a country-specific basis, depending on the contractor and timing of the survey.

Each country manager was required to attend a 4 day ‘train the trainers’ briefing to ensure that they were suitably well informed to train their agency field force and to manage the project. Briefings took place in Amman, Athens, Baku, Beirut, Belgrade, Bucharest, Budapest, Cairo, Chisinau, Istanbul, Kyiv, Lisbon, Madrid, Minsk, Prague, Ramallah, Rome, Tbilisi, Tunis, and Yerevan. Each training session lasted 4 days and was delivered by representatives from the EBRD and WB teams, and main contractor. The training covered:

- ES management team introduction;
- Introduction of the ES by the World Bank/EBRD representative, on behalf of the World Bank, EBRD and EIB;
- Universe and sample for ES
- Sampling frames and selected samples:
  - Listings and quality control
  - Sample management and fieldwork progress report
  - Response rate: Follow up – methods to ensure a good response rate
- The questionnaires implementation:
  - Key concepts
  - Questionnaire manual
  - Mock interviewing with the manufacturing questionnaire
  - Innovation module and eligibility
  - Multiple choice test
  - Questionnaire proofreading
- Supervisors and interviewer training
- ES pilot survey
- Data entry and quality control
- CAPI script testing and mock interviews
- An open question and answer session.

This training ensured that project managers were well-prepared to train their own field force. Importantly, it also ensured that the content of the training in each country was the same.

For the supervisors and interviewer training, contractors provided the training materials to the survey and fieldwork managers, covering the different training components such as:

- Written training. Each supervisor and interviewer received a questionnaire manual that had to be read carefully before the training. In addition, supervisors and interviewers received detailed interviewer instructions, in order to fully understand the survey methodology and objectives.
- Theoretical training. Once the supervisors and interviewers had reviewed the questionnaire manual and interviewer instructions, the survey manager in each country thoroughly explained the study's methodology and reviewed the whole instrument, question by question, to ensure its correct comprehension, explain key concepts, unification of criteria, and answer any questions.
- Comprehension test. After the training, supervisors and interviewers completed a multiple-choice test to assess their understanding of the survey methodology and questionnaire.

Additional interviewer briefings –over the phone or in person – were also organised whenever needed and according to any particular requirements of the survey.

For further details on the training on a country by country basis, please refer to the appendices.

### **3.5 Piloting**

Before the survey was launched, a pilot was conducted in all countries included in the ES. Interviews were conducted by local interviewers who provided feedback to their country managers.

The main purpose of the pilot was to check that the translation was correct, the routing was correct, and that the questions were appropriate for the local environment. Also, these interviews were timed to ascertain the length of the questionnaire. All five questionnaires – core, manufacturing and services, and core/service and manufacturing innovation – were tested.

After the pilot was completed, a pilot report was sent to the World Bank and EBRD outlining the key findings and recommended changes to the questionnaire. A conference call was organised between the EBRD and the World Bank and Ipsos MORI to check the pilot results and agree on the final questionnaires to be used for fieldwork.

Any modification to the questionnaire and instructions were approved by the World Bank and EBRD task managers before the survey was implemented. Prior to the launch of the main survey, the World Bank and EBRD task managers gave their explicit approval of the survey instrument.

## **4 Survey and item non-response**

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

Survey non-response was addressed by maximising efforts to contact establishments that were initially selected for interviews. Survey non-response did occur, but substitutions were made in order to potentially achieve strata-specific goals.

Details on rejection rates, eligibility rates, and item non-response are available at the strata level. This report summarized these numbers to alert researchers to these issues when using the data and when making inferences. Item non-response, selection bias and faulty sampling frames are not unique to ES. All Enterprise Surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## 5 ES Database

### 5.1 Database structure

The structure of the data base reflects the fact that 2 different versions of the survey instrument were used for all registered establishments. Questionnaires have common questions (*core* module) and respectfully additional manufacturing- and services-specific questions. The eligible manufacturing industries have been surveyed using the **Manufacturing** questionnaire (includes the *core* module, plus manufacturing specific questions). Retail firms have been interviewed using the **Services** questionnaire (includes the *core* module plus retail specific questions) and the residual eligible services have been covered using the **Services** questionnaire (includes the *core* module). Each variation of the questionnaire is identified by the index variable, *a0*.

All variables are named using, first, the letter of each section and, second, the number of the variable within the section, i.e. *a1* denotes section A, question 1 (some exceptions apply due to comparability reasons). Variable names preceded by the prefix prefix "BM" or "BMG" indicate questions specific to countries in Europe and Central Asia 2018/2020 and Middle East and North Africa 2019/2020, therefore, they may not be found in the implementation of the rollout in other countries. "BMG" indicates Green Module variables. All other suffixed variables are global and are present in all country surveys over the world. All variables are numeric with the exception of those variables with an "x" at the end of their names. The suffix "x" denotes that the variable is alpha-numeric.

There are two establishment identifiers, *idstd* and *id*. The first is a global unique identifier. The second is a country unique identifier. The variables *a2* (sampling region), *a6a* (sampling establishment's size), and *a4a* (sampling sector) contain the establishment's classification into the strata chosen for each country using information from the sample frame. The strata were defined according to the guidelines described above. For panel firms, the dataset includes the id from the previous round of the survey, *id\_beepsv*.

There are three levels of stratification: industry, size and region. Different combinations of these variables generate the strata cells for each industry/region/size combination. A distinction should be made between the variable *a4a* and *d1a2* (industry expressed as ISIC rev. 3.1 code). The former gives the establishment's classification into one of the chosen industry-strata based on the sample frame, whereas the latter gives the establishment's actual industry classification (four-digit code) based on the main activity at the time of the survey.

All of the following variables contain information from the sampling frame. They may not coincide with the reality of individual establishments as sample frames may contain inaccurate or outdated information. The variables containing the sample frame information are included in the data set for researchers who may want to further investigate statistical features of the survey and the effect of the survey design on their results.

-*a2* is the variable describing sampling regions

-*a6a*: coded using the same standard for small, medium, and large establishments as defined above.

-*a4a*: coded following the stratification by sector as defined above.

The surveys were implemented following a two-stage procedure. Typically, first a screener questionnaire is applied over the phone to determine eligibility and to make appointments. Then a face-to-face interview takes place with the Manager/Owner/Director of each establishment. However, sometimes the phone numbers were unavailable in the sample frame, and thus the enumerators applied the screeners in person. Interviews were conducted using Computer-assisted personal interviewing (CAPI) in all countries except Belarus, where PAPI was used. The variables *a4b* and *a6c* contain the industry and size of the establishment from the screener questionnaire.

Note that there are variables for size (*I1*, *I6* and *I8*) that reflect more accurately the reality of each establishment. Advanced users are advised to use these variables for analytical purposes. Variables *I1* (number of permanent full-time workers at the end of the last complete fiscal year), *I6* (number of full-time seasonal workers employed during last complete fiscal year) and *I8* (average length of employment of full-time temporary employees during last complete fiscal year) were designed to obtain a more accurate measure of employment accounting for permanent and temporary employment. Special efforts were made to make sure that this information was not missing for most establishments.

The firms interviewed had several fiscal years. Most firms had January to December 2018 as their last complete fiscal year. Variables *a20m* (starting month of last complete fiscal year) and *a20y* (last complete fiscal year) can be used to obtain the last complete fiscal year for each firm.

There are additional variables for location (*a3x*), industry (*d1a2*) and size (*I1*, *I6* and *I8*) that reflect more accurately the reality of each establishment:

- Variable *a3x* indicates the actual location of the establishment. There may be divergencies between the location in the sampling frame and the actual location, as the establishment may be listed in one place but the actual physical location is in another place.

- Variable *d1a2* indicates the actual ISIC code of the main output of the establishment as answered by the respondent. This is probably the most accurate variable to classify establishments by activity.
- Variables *l1*, *l6* and *l8* were designed to obtain a more accurate measure of employment accounting for permanent and temporary employment. Special efforts were made to make sure that this information was not missing for most establishments.
- Variable *a17x* gives interviewer comments, including problems that occurred during an interview and extraordinary circumstances which could influence results. Please note that sometimes this variable is removed due to privacy issues.

Note that certain variables (including *a3x*, actual location of the establishment) have been removed from the public version of the dataset for confidentiality reasons.

For questions pertaining to monetary amounts, the unit is as shown in Table 3 below.

**Table 3: Questionnaire languages used in each country**

Country	Local Currency Unit (LCU)
Albania	Albanian Lek (ALL)
Armenia	Armenian Dram (AMD)
Azerbaijan	Azerbaijani Manat (AZN)
Belarus	Belarusian Ruble (BYR)
Bosnia and Herzegovina	Bosnia and Herz. Convertible Marka (BAM)
Bulgaria	Bulgarian Lev (BGN)
Croatia	Croatian Kuna (HRK)
Czech Republic	Czech Koruna (CZK)
Egypt	Egyptian Pound (EGP)
Estonia	Euro (EUR)
Georgia	Georgian Lari (GEL)
Greece	Euro (EUR)
Hungary	Hungarian Forint (HUF)
Italy	Euro (EUR)
Jordan	Jordanian Dinar (JOD)
Kazakhstan	Kazakhstani Tenge (KZT)
Kosovo	Euro (EUR)
Kyrgyz Republic	Kyrgyzstani Som (KGS)
Latvia	Euro (EUR)
Lebanon	Lebanese Pound (LBP)

Malta	Euro (EUR)
Moldova	Moldovan Leu (MDL)
Mongolia	Mongolian Tugrik (MNT)
Montenegro	Euro (EUR)
Morocco	Moroccan Dirham (MAD)
North Macedonia	Macedonian Denar (MKD)
Poland	Polish Zloty (PLN)
Portugal	Euro (EUR)
Republic of Cyprus	Euro (EUR) in Rep. of Cyprus, Turkish Lira in the Turkish Cypriot Community
Romania	Romanian Leu (RON)
Russia	Russian Ruble (RUB)
Serbia	Serbian Dinar (RSD)
Slovak Republic	Euro (EUR)
Slovenia	Euro (EUR)
Tajikistan	Tajikistani Somoni (TJS)
Tunisia	Tunisian Dinar (TND)
Turkey	Turkish Lira (TRY)
Ukraine	Ukrainian Hryvnia (UAH)

Uzbekistan	Uzbekistani Som (UZS)
West Bank and Gaza	Israeli New Shekel (ILS)

## 5.2 Weights

Since the sampling design was stratified and employed differential sampling, individual observations should be properly weighted when making inferences about the population. Under stratified random sampling, unweighted estimates are biased unless sample sizes are proportional to the size of each stratum. With stratification the probability of selection of each unit is, in general, not the same. Consequently, individual observations must be weighted by the inverse of their probability of selection (probability weights or  $pw$  in Stata.)<sup>2</sup>

Special care was given to the correct computation of the weights. It was imperative to accurately adjust the totals within each region/industry/size stratum to account for the presence of ineligible units (the firm discontinued businesses or was unattainable, education or government establishments, no reply after having called in different days of the week and in different business hours, no tone in the phone line, answering machine, fax line<sup>3</sup>, wrong address or moved away and could not get the new references). The information required for the adjustment was collected in the first stage of the implementation: the screening process. Using this information, each stratum cell of the universe was scaled down by the observed proportion of ineligible units within the cell. Once an accurate estimate of the universe cell (projections) was available, weights were computed using the number of completed interviews.

Due to non-response rates, some stratification cells were collapsed for the purposes of weighting, to preserve the representativeness of the sample.

For some units it was impossible to determine eligibility because the contact was not successfully completed. Consequently, different assumptions as to their eligibility result in different universe cells' adjustments and in different sampling weights. Three sets of assumptions were considered:

1. *Strict assumption*: Eligible establishments are only those for which it was possible to directly determine eligibility. The resulting weights are included in the variable *wstrict*.
2. *Median assumption*: Eligible establishments are those for which it was possible to directly determine eligibility and those that rejected the screener questionnaire or an answering machine or fax was the only response. The resulting weights are included in the variable *wmedian*.
3. *Weak assumption*: In addition to the establishments included in the first two points, all establishments for which it was not possible to finalize a contact are assumed to be eligible. This includes establishments with dead or out of service phone lines, establishments that never answered the phone, and establishments with incorrect addresses for which it was impossible to find a new address. The resulting weights are included in the variable *wweak*. Note that under the weak assumption only observed non-eligible units are excluded from universe projections.

Table 4 summarizes the eligibility criteria for each of the above three assumptions.

Within each of these assumptions regarding eligibility a pair of weight sets was calculated. Once an accurate estimate of the universe cell projection was made, weights for the

<sup>2</sup> This is equivalent to the weighted average of the estimates for each stratum, with weights equal to the population shares of each stratum.

<sup>3</sup> For the surveys that implemented a screener over the phone.

probability of selection were computed using the number of completed interviews for each cell.

Note that for the purpose of the weights computations all panel firms were considered to be part of the current universe, although technically they are not randomly selected.

**Table 4: Eligibility criteria**

Status Code	Eligibility Criteria		
	Strict	Weak	Median
1. Eligible establishment (Correct name and address)	1	1	1
2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	1	1	1
3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	1	1	1
4. Eligible establishment (Wrong address - the firm/establishment has changed address and the address could be found)	1	1	1
16. Panel firm - now less than five employees	1	1	1
5. The establishment has less than 5 permanent full time employees	0	0	0
6. The firm discontinued businesses	0	0	0
7. Not a business: Private household	0	0	0
8. Ineligible activity: education, agriculture, finances, governments...	0	0	0
91. No reply (after having called in different days of the week and in different business hours)	0	1	0
92. Line out of order	0	1	0
93. No tone	0	1	0
10. Answering machine	0	1	1
11. Fax line – data line	0	1	1
12. Wrong address/ moved away and could not get the new references	0	1	0
13. Refuses to answer the screener	0	1	1
14. In process ( <i>the establishment is being called/ is being contacted – previous to ask the screener</i> )	0	0	0
151. Out of target – outside the covered regions, firm moved abroad	0	0	0
152. Out of target – firm moved abroad	0	0	0

Strict eligibility = (Sum of the numbers with codes 1,2,3,4,&16) / Total

Weak eligibility = (Sum of the numbers with codes 1,2,3,4,16,91,92,93,10,11,12,&13) / Total

Median eligibility = (Sum of the numbers with codes 1,2,3,4,16,10,11, & 13) / Total

### 5.2.1 Appropriate use of the weights

As discussed above, under stratified random sampling weights should be used when making inferences about the population. Any estimate or indicator that aims at describing some feature of the population should take into account that individual observations may not represent equal shares of the population.

However, there is some discussion as to the use of weights in regressions (see Deaton, 1997, p.67; Lohr, 1999, chapter 11, Cochran, 1977, p. 150). There is not strong large sample econometric argument in favour of using weighted estimation for a common population coefficient if the underlying model varies per stratum (stratum-specific coefficient): both simple OLS and weighted OLS are inconsistent under regular conditions. However, weighted OLS has the advantage of providing an estimate that is independent of the sample design. This latter point may be quite relevant for the ES as in most cases the objective is not only to obtain

model-unbiased estimates but also design-unbiased estimates (see also Cochran, 1977, p. 200 who favours the use of weighted OLS for a common population coefficient).<sup>4</sup>

For a more general approach, if the regressions are descriptive of the population then weights should be used. The estimated model can be thought of as the relationship that would be expected if the whole population were observed.<sup>5</sup> If the models are developed as structural relationships or behavioural models that may vary for different parts of the population, then there is no reason to use weights.

---

<sup>4</sup> Note that weighted OLS in Stata using the command regress with the option of weights will estimate wrong standard errors. Using the Stata survey specific commands svy will provide appropriate standard errors.

<sup>5</sup> The use of weights in most model-assisted estimations using survey data is strongly recommended by the statisticians specialised on survey methodology of the JPSM of the University of Michigan and the University of Maryland.

## Annex A Country-specific information on BEEPS survey

### A.1 Albania

#### A.1.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Albania 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Statistical Business Register (INSTAT) was used, dated as of December 2017. The establishments in the listing are all registered with the National Registration Center, NRC (Qendra Kombëtare për Regjistrim, QKR). Note that INSTAT provided a subset of the full listing, this subset was selected randomly following the ES methodology. The ES team used this subset for the standard sampling procedures.

Regional stratification was done across three regions: Northern Albania comprising Dibër, Durrës, Kukës, Lezhë, Shkodër (NUTS3 codes AL011-AL015), Central Albania comprising Tirana and Elbasan (AL021, AL022), and Southern Albania comprising Berat, Fier, Gjirokastër, Korçë, and Vlorë (AL031-AL033).

Regions (official administrative counties)	Grouping used for stratification purposes in BEEPS VI
Dibër	Northern Albania
Durrës	
Kukës	
Lezhë	
Shkodër	
Tirana	Central Albania
Elbasan	
Berat	Southern Albania
Fier	
Gjirokastër	
Korçë	
Vlorë	

#### Albania ES sample frame (Fresh and Panel combined)

		Manufacturing	Retail	Other Services	Grand Total
Northern Albania	Small (5-19)	108	210	278	962
	Medium (20-99)	83	41	135	
	Large (100 or more)	81	3	23	
Central Albania	Small (5-19)	255	396	446	1883
	Medium (20-99)	260	103	218	
	Large (100 or more)	92	23	90	
Southern Albania	Small (5-19)	198	180	218	941
	Medium (20-99)	154	37	90	
	Large (100 or more)	37	5	22	
<b>Total</b>		<b>1268</b>	<b>998</b>	<b>1520</b>	<b>3786</b>

Source: BEEPS V and Statistical Business register 2017 (INSTAT)

#### Albania Panel sample frame

		Manufacturing	Retail	Other Services	Grand Total
Northern Albania	Small (5-19)	4	13	10	41

	Medium (20-99)	4	4	1	
	Large (100 or more)	3	1	1	
<b>Central Albania</b>	Small (5-19)	46	86	85	<b>276</b>
	Medium (20-99)	23	10	12	
	Large (100 or more)	7	3	4	
<b>Southern Albania</b>	Small (5-19)	11	10	9	<b>43</b>
	Medium (20-99)	8	1	1	
	Large (100 or more)	2	0	1	
<b>Total</b>		<b>108</b>	<b>128</b>	<b>124</b>	<b>360</b>

Source: BEEPS V.

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Northern Albania</b>	Small (5-19)	3	3	11	<b>80</b>
	Medium (20-99)	3	19	4	
	Large (100 or more)	20	1	16	
<b>Central Albania</b>	Small (5-19)	3	3	7	<b>33</b>
	Medium (20-99)	3	3	3	
	Large (100 or more)	3	5	3	
<b>Southern Albania</b>	Small (5-19)	3	3	9	<b>77</b>
	Medium (20-99)	3	19	3	
	Large (100 or more)	20	2	15	
<b>Total</b>		<b>61</b>	<b>58</b>	<b>71</b>	<b>190</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Northern Albania</b>	Small (5-19)	3	11	9	<b>35</b>
	Medium (20-99)	3	3	1	
	Large (100 or more)	3	1	1	
<b>Central Albania</b>	Small (5-19)	11	20	20	<b>97</b>
	Medium (20-99)	15	9	10	
	Large (100 or more)	6	3	3	
<b>Southern Albania</b>	Small (5-19)	9	9	8	<b>38</b>
	Medium (20-99)	7	1	1	
	Large (100 or more)	2	0	1	
<b>Total</b>		<b>59</b>	<b>57</b>	<b>54</b>	<b>170</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 12.7% (82 out of 644 establishments).<sup>6</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

<sup>6</sup> Based on out of target and ineligible contacts.

### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
Northern Albania	Small (5-19)	6	10	21	120
	Medium (20-99)	9	23	7	
	Large (100 or more)	25	3	16	
Central Albania	Small (5-19)	15	25	30	133
	Medium (20-99)	18	11	12	
	Large (100 or more)	7	9	6	
Southern Albania	Small (5-19)	13	13	23	124
	Medium (20-99)	12	22	3	
	Large (100 or more)	22	3	13	
<b>Total</b>		<b>127</b>	<b>119</b>	<b>131</b>	<b>377</b>

### Achieved Interviews (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Northern Albania	Small (5-19)	2	7	6	25

### A.1.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>381</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	353
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	11
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	9
		4. Eligible establishment (Moved and traced)	3
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	5
<b>127</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>127</b>
<b>71</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	7
		616. The firm discontinued businesses - (Establishment went bankrupt)	46
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	0
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	2
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	3
		621. The firm discontinued businesses - (Other)	3
		71. Ineligible legal status: not a business, but private household	1
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	1

		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	8
11	Out of Target	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	4
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	1
		156. Duplicated firm within the sample	3
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	3
54	Unobtainable	91. No reply after having called in different days of the week and in different business hours	1
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	53
644	Total contacted		

#### Response Outcomes: Albania ES 2019

Target and totals	Sample target	360
	Sample target completion rate	104.7%
	Total contacts available in frame	3786
	Total contacts issued	753
	Total contacts contacted	644
Screening phase	Screening in process	0
	Eligibles	381
	Screener refusal	127
	Ineligible + out of target	82
	Unobtainable	54
Interview phase (only if eligible)	Complete interviews without extra module	3
	Complete interviews with extra module	374
	Eligible in process + incomplete interviews	0
	Interview refusal	4
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	19.7%
	Ineligible + out of target rate	12.7%
	Unobtainable rate	8.4%
	Interview conversion rate	58.5%
	Eligible in process + incomplete interviews rate	0.0%
Interview refusal rate	0.6%	

#### A.1.3. Universe estimates

Universe estimates for the number of establishments in each cell in Albania were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions, Percent Eligible, Albania ES 2019

Universe estimates for the number of establishments in each industry-region-size cell in Albania were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Northern Albania</b>	Small (5-19)	256	197	816	<b>1654</b>
	Medium (20-99)	130	23	156	
	Large (100 or more)	56	3	16	
<b>Central Albania</b>	Small (5-19)	441	384	1967	<b>3580</b>
	Medium (20-99)	172	50	435	
	Large (100 or more)	56	9	66	
<b>Southern Albania</b>	Small (5-19)	278	210	864	<b>1681</b>
	Medium (20-99)	109	22	151	
	Large (100 or more)	31	3	13	
		<b>1528</b>	<b>901</b>	<b>4485</b>	<b>6914</b>

**Median Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Northern Albania</b>	Small (5-19)	329	253	994	<b>2055</b>
	Medium (20-99)	168	24	191	
	Large (100 or more)	78	3	16	
<b>Central Albania</b>	Small (5-19)	622	540	2627	<b>4879</b>
	Medium (20-99)	244	70	582	
	Large (100 or more)	85	13	96	
<b>Southern Albania</b>	Small (5-19)	337	253	992	<b>1973</b>
	Medium (20-99)	132	26	173	
	Large (100 or more)	40	3	16	
<b>Total</b>		<b>2035</b>	<b>1185</b>	<b>5687</b>	<b>8908</b>

**Weak Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Northern Albania</b>	Small (5-19)	353	280	1109	<b>2245</b>
	Medium (20-99)	174	26	206	
	Large (100 or more)	78	3	17	
<b>Central Albania</b>	Small (5-19)	683	614	3008	<b>5490</b>
	Medium (20-99)	259	77	645	
	Large (100 or more)	87	14	103	
<b>Southern Albania</b>	Small (5-19)	377	293	1155	<b>2255</b>

	Medium (20-99)	143	29	196	
	Large (100 or more)	42	3	17	
<b>Total</b>		<b>2195</b>	<b>1339</b>	<b>6457</b>	<b>9990</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.1.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.59.<sup>7</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.20.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling

<sup>7</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

frames are not unique to Albania. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.1.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local agency	Name: Ipsos Albania Region: Republic of Albania Membership of international organization: Esomar Activities since: 2005
Enumerators involved	Enumerators: 16 (all enumerators did both enumerator and recruiter role; local team used F2F screening approach) Recruiters: 16
Other staff involved	Fieldwork Coordinators: 2 supervisors Editing: 1 Data Entry: 0 Data Processing: Ipsos was responsible for all data processing

#### Sampling frame

Characteristic of sample frame used	Electronic data base
Source	National statistical office, Instat
Year of publication	July 2018
Comments on the quality of the sample frame	Sample frame was quite outdated, no tax office registered numbers.

#### Sample

Comments/problems on sectors and regions selected in the sample	On regions: Interviewing in the Tirana district was particularly difficult as it had more soft and hard refusals, hard-to-find businesses, changed names, bankrupt businesses.
Comments on the response rate	The response rate was the lowest in the Tirana region.
Comments on the sample design	A few panel firms had different industry sector in comparison to previous wave.

#### Fieldwork

Date of fieldwork	13 December 2018 to 27 May 2019
Country	Albania
Number of completed interviews	376
Problems found during fieldwork	The sample frame was outdated. A lot of businesses were without phone numbers in the sample or names were written wrongly. No email addresses were included. Having a tax office ID in the sample would have made our job easier, because we could look for additional contact information via National Business Center website.
Other observations	No

#### Questionnaires

Problems for the understanding of questions (write question number)	D.2, N.3, N.2e1, N.7
Problems found in the navigability of questionnaires (for example, skip patterns)	No

Comments on questionnaire length	About 40% of respondents complained about the excessive length of the interview.
Suggestions or other comments on the questionnaires	No

## Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

## Country situation

General aspects of economic, political or social situation of the country that could affect the results of the survey	Towards the end of February 2019, the country entered a phase of political instability that lasted until the end of June 2019. Local elections were held on June 30. That allowed us to have less projects as usual and focus more on BEEPS. In general, large and medium sized firms tend to be suspicious of research such as this. There is a fear that we might come in disguise from the tax offices or that we would share their data with them, so in quite a few cases the number of employees given during the interview may be lower than in reality.
Relevant country events that occurred during fieldwork	Due to political instability and mass emigration, the businesses complained a lot about corruption.
Other aspects	No

## A.2 Armenia

### A.2.1. Sampling structure and implementation

### A.2.2. Status codes

### A.2.3. Universe estimates

### A.2.4. Non-response

## A.3 Azerbaijan

### A.3.1. Sampling structure and implementation

ACT Global, the main contractor, in collaboration with ACT-Azerbaijan implemented the Azerbaijan 2019 ES. The sample frame consisted of listings of firms from two sources: For panel firms, the list of 390 firms from the Azerbaijan 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments compiled by ACT-Azerbaijan was used.

Regional stratification for the Azerbaijan ES was done across three regions: Baku & Absheron, Center (Aran, Daglig-Shirvan, Quba-Khachmaz, Lankaran) and West (Ganja-Qazakh, Shaki-Zaqatala).

Regions (official economic regions)	Grouping used for stratification purposes in BEEPS VI
Baku & Apsheronki	Baku & Absheron
Aranski	Central

Gorno-Shirvanski (Daghlig Shirvan)	West
Lenkoranski	
Kuba-Khachmazski (Guba-Khachmaz)	
Giandja-Kazakhski (Ganja-Gazakh)	
Sheki-Zakatalski (Shaki-Zaqatala)	Not covered – landlocked exclave
Autonomous Republic of Nakhchivan	
Nagorno Karabakh	
Kalbajar-Lachin	Not covered – controlled by Nagorno Karabakh

#### Azerbaijan ES Sample Frame (Fresh and Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Baku and Absheron</b>	Small (5-19)	138	392	649	<b>2341</b>
	Medium (20-99)	97	116	333

	Large (100 or more)	3	0	2	
		<b>121</b>	<b>124</b>	<b>145</b>	<b>390</b>

Source: BEEPS V.

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Baku and Absheron</b>	Small (5-19)	5	13	15	<b>128</b>
	Medium (20-99)	11	15	9	
	Large (100 or more)	15	15	15	
	Size Unknown	5	5	5	

<b>Center</b>	Small (5-19)	1	1	5	<b>31</b>
	Medium (20-99)	1	1	5	
	Large (100 or more)	2	2	9	
	Size Unknown	0	0	4	
<b>West</b>	Small (5-19)	0	0	4	<b>21</b>
	Medium (20-99)	0	1	5	
	Large (100 or more)	1	0	4	
	Size Unknown	1	1	4	
		<b>42</b>	<b>54</b>	<b>84</b>	<b>180</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Baku and Absheron</b>	Small (5-19)	12	12	3	<b>90</b>
	Medium (20-99)	12	12	12	
	Large (100 or more)	8	9	10	
	Size Unknown	0	0	0	
<b>Center</b>	Small (5-19)	12	12	2	<b>49</b>
	Medium (20-99)	12	5	3	
	Large (100 or more)	3	0	0	
	Size Unknown	0	0	0	
<b>West</b>	Small (5-19)	6	12	2	<b>41</b>
	Medium (20-99)	10	4	2	
	Large (100 or more)	3	0	2	
	Size Unknown	0	0	0	
		<b>78</b>	<b>66</b>	<b>36</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 36.9% (547 out of 1484 establishments).<sup>8</sup>

For the Azerbaijan 2019 ES, because of shutdowns due to the COVID-19 outbreak, the sample target was reduced.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Baku and Absheron</b>	Small (5-19)	10	31	42	<b>183</b>
	Medium (20-99)	19	19	18	
	Large (100 or more)	5	9	10	
	Medium and Large, and Unknown	10	5	5	
<b>Center</b>	Small (5-19)	3	3	4	<b>22</b>
	Medium (20-99)	3	1	0

	Complete interviews with extra module	223
	Eligible in process + incomplete interviews	0
	Interview refusal	69
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	32.9%
	Ineligible + out of target rate	36.9%
	Unobtainable rate	10.4%
	Interview conversion rate	15.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	4.6%

### A.3.3. Universe estimates

Universe estimates for the number of establishments in each cell in Azerbaijan were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Azerbaijan were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Strict Universe Estimates – Fresh:**

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Baku and Absheron</b>	Small (5-19)	138	392	649	<b>2341</b>
	Medium (20-99)	97	116	333	
	Large (100 or more)	52	39	182

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.3.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.15.<sup>9</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.38.

<sup>9</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Azerbaijan. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## **A.4 Belarus**

### **A.4.1. Sampling structure and implementation**

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Belarus 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of both establishments and firms from Komlev-Info was used (as of June of 2018). The establishments and firms in the listing are all registered as businesses with the State Registry.

Regional stratification for the Belarus ES was done across seven regions: Minsk, Minskaya, Gomelskaya, Mogilevskaya, Brestskaya, Grodnenskaya, and Vitebskaya. For the purposes of achieving the thresholds for representativeness, the ES indicators are calculated with some regions combined. In particular, Brestskaya and Grodnenskaya are combined, and so are Gomelskaya and Mogilevskaya.

<b>Regions (official economic regions)</b>	<b>Grouping used for stratification purposes in BEEPS VI</b>
Minsk	Minsk
Brestskaya	Brestskaya
Gomelskaya	Gomelskaya
Grodnenskaya	Grodnenskaya
Mogilevskaya	Mogilevskaya
Minskaya	Minskaya
Vitebskaya	Vitebskaya

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 10.4% (155 out of 1491 establishments).<sup>10</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### **Achieved Interviews (Fresh and Panel Combined)**

#### A.4.2. Status codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
609	Eligible	1. Eligible establishment (Correct name and address)	552
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	5
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	7
		4. Eligible establishment (Moved and traced)	39
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	6
657	Screener refusal	13. Refuses to answer the screener	657
142	Ineligible	5. The establishment has less than 5 permanent full time employees	6
		616. The firm discontinued businesses - (Establishment went bankrupt)	22
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	5
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	9
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	35
		621. The firm discontinued businesses - (Other)	2
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	8
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	55
13	Out of Target	151. Out of target - outside the covered regions	1
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	6
		156. Duplicated firm within the sample	1
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	5
70	Unobtainable	91. No reply after having called in different days of the week and in different business hours	50
		92. Line out of order	1
		93. No tone	1
		94. Phone number does not exist	6
		10. Answering machine	1
		11. Fax line- data line	10
		12. Wrong address/ moved away and could not get the new references	1
1491	Total contacted		

#### Response Outcomes: Belarus ES 2018

Target and totals	Sample target	600
	Sample target completion rate	100.0%
	Total contacts available in frame	25595
	Total contacts issued	1723

	Total contacts contacted	1491
Screening phase	Screening in process	0
	Eligibles	609
	Screener refusal	657
	Ineligible + out of target	155
	Unobtainable	70
Interview phase (only if eligible)	Complete interviews without extra module	0
	Complete interviews with extra module	600
	Eligible in process + incomplete interviews	0
	Interview refusal	9
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	44.1%
	Ineligible + out of target rate	10.4%
	Unobtainable rate	4.7%
	Interview conversion rate	40.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.6%

#### A.4.3. Universe estimates

Universe estimates for the number of establishments in each cell in Belarus were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Belarus were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		<b>Food</b>	<b>Garments</b>	<b>Other Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.4.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- c) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- d) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.40.<sup>11</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.45.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Belarus. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>11</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

#### A.4.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	<p>Name: Center for Sociological and Political Research of Belarusian State University (CSPR BSU)</p> <p>Region: Republic of Belarus</p> <p>Membership of international organizations: Center for Sociological and Political Research of Belarusian State University is an associate partner of the Foundation European Values Systems Study Group, Tilburg, the Netherlands;</p> <p>Professor David Rotman, director of CSPR BSU is a Principal Investigator for the World Values Survey (WVS) program in Belarus, and a member of the Scientific Advisory Committee of WVS;</p> <p>CSPR BSU is a national collaborator of the Comparative Study of Electoral Systems (CSES) program;</p> <p>CSPR BSU is a national partner of the 'Eurasia Barometer' a non-commercial non-governmental international social survey organization headquartered at the Institute for Comparative Survey Research, Vienna, Austria.</p> <p>Activities since: 1996</p>
Enumerators involved:	<p>Enumerators: 56</p> <p>Recruiters: 14.</p> <p>Four most experienced employees of the CSPR BSU simultaneously performed the functions of recruiter and interviewer.</p> <p>(Please clarify if there where any enumerators doing part of the recruitment)</p>
Other staff involved:	<p>Fieldwork Coordinators: 11 regional supervisors</p> <p>Editing: 1</p> <p>Data Entry: 5</p> <p>Data Processing: Ipsos was responsible for all data processing</p>

##### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Komlev-Info
Year:	June 2018
Comments on the quality of sample frame:	The quality of the sample frame was generally good although it did contain some out of date information, including businesses that were no longer in operation and the number of employees was not always accurate.

##### Sample

Comments/ problems for particular regions:	<p>On regions:</p> <p>There are no large cities in Minsk region, where privately-owned enterprises are concentrated, as a rule. This feature is due to the fact that the city of Minsk city is singled out as a separate territorial-administrative unit in Belarus. This aspect distinguishes Minsk region from all the others. This created additional logistical difficulties during the field work. The Minsk region occupies a fairly large area and settlements are quite distant from each other. Public transport allows travel to these settlements only one or two times a day. This made it difficult to agree on the timing of interviews with the respondents.</p>
Comments on the response rate:	As one can see from the available data, almost half of the heads of enterprises that were asked to participate in the study gave their consent and were interviewed. This is a good response rate for the Republic of Belarus.

Comments on the sample design:	The subgroups 'Food' and 'Garments' were included for the first time in the manufacturing sector the sample frame that was used in BEEPS wave VI in Belarus. This created certain difficulties for recruiting. Private limited companies and foreign joint-ventures are more common among these companies. It was often the case that several managers had to agree to participation before and interview could be arranged. The activities of all the enterprises in Food subgroup are regulated by sanitary and hygiene standards, which entail a number of inspections carried out regularly by the government agencies. It seems that this means CEOs of such enterprises were less inclined to participated.
Other comments:	No

### Fieldwork

Date of Fieldwork	16 October 2018 to 26 April 2019
Country	Belarus
Number of interviews	600
Problems found during fieldwork:	Sample frame was not fully up to date (see above). The interview length meant that many business executives were reluctant to take part and recruiters had to work hard to convince them to participate. Some managers indicated that they were not allowed to participate in surveys concerning the activities of the enterprise, citing the terms of the contract, which included the clause - a trade secret.
Other observations:	The general attitude of the respondents to the survey was quite positive. Even refusals were mostly polite and tactful.

### Questionnaires

Problems for the understanding of questions (indicate question number)	D.2, N.3, N.2e1, N.7
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	About 30% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	No
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	During the fieldwork period a fairly calm general political and economic situation was observed in the Republic of Belarus. In the World Bank's 'Doing Business 2019 rating' Belarus has the 37th position among 190 countries. Belarus has risen to 38th place in the UN ranking in the level of e-government development (United Nations E-Government Survey 2018). The country moved up 11 positions compared with the 2016 results. The ranking includes 193 countries. According to the report of the United Nations Children's Fund, Belarus has entered the top 10 countries in the world with the
---	---

	lowest infant mortality rate, with a mortality rate of 1 out of 667 babies.
Relevant country events occurred during fieldwork:	In October 2018, over 160 delegates from 40 countries gathered at a high-level international conference on combating terrorism in the digital age. It was held under the auspices of the OSCE. At the end of October and early November 2018, a meeting of the Main Group of the Munich Security Conference was held in Minsk. The President of the Republic of Belarus A.G. Lukashenko invited the European elites and businesses to cooperate more closely with Belarus, and offered to make Eastern Europe a cross-border belt of stability and cooperation. The Global Entrepreneurship Week was held in Belarus from 12 November to 18 November 18, 2018. It was attended by businessmen, investors, aspiring businessmen, international experts, representatives of ministries and departments of Belarus. From 18 to 24 March 2019 the Union of Legal Entities “The Republican Confederation of Entrepreneurship” together with the Ministry of Economy, the Department for Entrepreneurship, the Belarusian Foundation for Financial Support for Entrepreneurship and regional business associations held the IV Week of Belarusian Entrepreneurship. This event was held for the fourth year successively, becoming a traditional and significant event in the economic and social life of Belarus.
Other aspects:	No

## A.5 *Bosnia and Herzegovina*

### A.5.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Bosnia and Herzegovina 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments was provided by LRC BIS – Business Intelligence System. The establishments in the listing are all registered through court registration with the Municipal Court.

Regional stratification was done across five regions: Bosna Region; Hercegovina Region; Sarajevo Region; Republika Srpska; Distrikt Brcko. For the purposes of achieving the thresholds for representativeness, the ES indicators are calculated with some regions combined. In particular, Bosna and Hercegovina regions are combined, as well as Republika Srpska and Distrikt Brcko.

Regions (official)	Grouping used for stratification purposes in BEEPS VI
Bihac region	Bosna region
Tuzla region	
Srednja Bosna region	
Hercegovina region	Hercegovina region (Hercegovina-Neretva, West Hercegovina)
Sarajevo region	Sarajevo region
Sjever Republika Srpska	Republika Srpska
Istok Republika Srpska	
Distrikt Brcko	Distrikt Brcko

### Bosnia and Herzegovina ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total

<b>Total</b>		<b>62</b>	<b>67</b>	<b>51</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 15.9% (147 out of 927 establishments).<sup>12</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total

### A.5.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>424</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	399
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	1
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	1
		4. Eligible establishment (Moved and traced)	10
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	11
<b>298</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	298
<b>147</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	16
		616. The firm discontinued businesses - (Establishment went bankrupt)	8
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	1
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	4
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	34
		621. The firm discontinued businesses - (Other)	71
		71. Ineligible legal status: not a business, but private household	2
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	1
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	12
<b>0</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	0
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>58</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	54
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0

		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	4
927	<b>Total contacted</b>		

### Response Outcomes: Bosnia and Herzegovina ES 2019

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	100.6 %
	Total contacts available in frame	10487
	Total contacts issued	1041
	Total contacts contacted	927
<b>Screening phase</b>	Screening in process	0
	Eligibles	422
	Screener refusal	298
	Ineligible + out of target	149
	Unobtainable	58
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	22
	Complete interviews with extra module	340
	Eligible in process + incomplete interviews	0
	Interview refusal	60
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	32.1%
	Ineligible + out of target rate	16.1%
	Unobtainable rate	6.3%
	Interview conversion rate	39.1%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	6.5%

#### A.5.3. Universe estimates

Universe estimates for the number of establishments in each cell in Bosnia and Herzegovina were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Bosnia and Herzegovina were produced for the strict, weak and median eligibility

definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Bosna Region	Small (5-19)	350	238	541	1661
	Medium (20-99)	191	57	191	
	Large (100 or more)	68	6	18	
Hercegovina Region	Small (5-19)	100	71	197	508
	Medium (20-99)	36	0	67	
	Large (100 or more)	7	0	13	
	Medium and Large (20+)	0	18	0	
Sarajevo Region	Small (5-19)	76	75	370	749
	Medium (20-99)	41	27	113	
	Large (100 or more)	13	10	23	
Republika Srpska	Small (5-19)	273	144	462	1293
	Medium (20-99)	146	35	155	
	Large (100 or more)	45	8	24	
Distrikt Brcko	All sizes	18	68	75	161
<b>Total</b>		<b>1364</b>	<b>757</b>	<b>2251</b>	<b>4373</b>

##### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total

	Large (100 or more)	14	0	27	
	Medium and Large (20+)	0	33	0	
Sarajevo Region	Small (5-19)	122	125	587	1267
	Medium (20-99)	77	52	214	
	Large (100 or more)	25	21	44	
Republika Srpska	Small (5-19)	462	255	779	2334
	Medium (20-99)	293	74	311	
	Large (100 or more)	92	18	49	
Distrikt Brcko	All sizes	37	148	156	342
<b>Total</b>		<b>2420</b>	<b>1380</b>	<b>3901</b>	<b>7701</b>

##### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Bosna Region	Small (5-19)	638	451	940	3117
	Medium (20-99)	393	121	374	
	Large (100 or more)	149	14	38	
Hercegovina Region	Small (5-19)	208	153	390	1080
	Medium (20-99)	84	0	150	
	Large (100 or more)	17	0	32	
	Medium and Large (20+)	0	44	0	
Sarajevo Region	Small (5-19)	131	133	604	1302
	Medium (20-99)	79	52	208	
	Large (100 or more)	27	22	45	
Republika Srpska	Small (5-19)	522	284	839	2530
	Medium (20-99)	313	78	317	

	Large (100 or more)	104	20	53	
<b>Distrikt Brcko</b>	All sizes	38	149	152	<b>339</b>
<b>Total</b>		<b>2704</b>	<b>1522</b>	<b>4144</b>	<b>8368</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.5.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.39.<sup>13</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.39.

<sup>13</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Bosnia and Herzegovina. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

#### A.5.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	Name: Ipsos Bosnia and Herzegovina Region: Bosnia and Herzegovina Membership of international organizations: Esomar Activities since: 2002
Enumerators involved:	Enumerators: 27 Recruiters: 2
Other staff involved:	Fieldwork Coordinators: 6 regional supervisors Editing: 0 Data Entry: N/A Data Processing: Ipsos was responsible for all data processing

##### Sampling frame

Characteristic of sample frame used:	Electronic data base
Source:	Database of all balance sheets of all companies in BiH, provider: LRC BIS – Business Intelligence System ( <a href="http://www.lrcbh.com">http://www.lrcbh.com</a> )
Year:	June 2018
Comments on the quality of sample frame:	The quality of the sample frame was generally good, although it did contain some out-of-date information, including businesses that were no longer in operation and the number of employees was not always accurate.

##### Sample

Comments/ problems for particular regions:	The most difficult recruiting region was Brcko District because it is mostly an open market with small businesses closing quickly for unknown reasons. There were many non-existent numbers and addresses where we couldn't find the listed businesses.
Comments on the response rate:	As one can see from the available data, almost half of the heads of enterprises that were asked to participate in the study gave their consent and were interviewed. This is a good response rate for Bosnia and Herzegovina.
Comments on the sample design:	No comments.
Other comments:	No other comments.

##### Fieldwork

Date of Fieldwork	3 January, 2019 to 13 September, 2019.
Country	Bosnia and Herzegovina
Number of interviews	364
Problems found during fieldwork:	Problems that were encountered were to do with outdated sample frame which meant that many businesses were without phone numbers, names written incorrectly and did not contain emails. The interview length meant that many business executives were

	reluctant to take part and recruiters had to work hard to convince them to participate. Some respondents refused to answer to some questions in section N, section K, section L by deciding not to open business reports and provide answers based on their estimations.
Other observations:	The general attitude of the respondents to the survey was quite positive. Even refusals were mostly polite and tactful.

### Questionnaires

Problems for the understanding of questions (indicate question number)	D.2, N.3, N.2e1, N.7, C8, C17
Problems found in the navigability of –questionnaires (for example, skip patterns).	Some respondents fear data misuse, so they refuse to provide accurate information. Finance questions are sensitive and 10-15% of respondents refused to answer.
Comments on questionnaires length:	About 20-30% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

### Country situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Since General elections in October 2018 till the end of project, the government was not established. The country is in a deep political and economic crisis, but nothing affected the fieldwork.
Relevant country events occurred during fieldwork:	The event that affected fieldwork in Brcko District is the fire at Arizona Market, where most of the sample companies are located.
Other aspects:	No

## A.6 Bulgaria

### A.6.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 293 firms from the Bulgaria 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the Bulgaria National Statistics Institute 2016 was used.

Regional stratification for the Bulgaria ES was done across six regions: Severozapaden, Severen Tsentralen, Severoiztochen, Yugoiztochen, Yugozapaden and Yuzhen Tsentralen.

NUTS-2 regions	NUTS-3 regions	Grouping to be used for stratification purposes in BEEPS VI
Vidin Province	Severozapaden (Northwestern)	Severozapaden
Montana Province		
Vratsa Province		

Pleven Province		
Lovech Province		
Veliko Tarnovo Province	Severen Tsentralen (Northern Central)	Severen Tsentralen
Gabrovo Province		
Ruse Province		
Razgrad Province		
Silistra Province		
Varna Province	Severoiztochen (Northeastern)	Severoiztochen
Dobrich Province		
Shumen Province		
Targovishte Province		
Burgas Province	Yugoiztochen (Southeastern)	Yugoiztochen
Sliven Province		
Yambol Province		
Stara Zagora Province		
Sofia City	Yugozapaden (Southwestern)	Yugozapaden
Sofia Province		
Blagoevgrad Province		
Pemik Province		
Kyustendil Province		
Plovdiv Province	Yuzhen Tsentralen (Southern Central)	Yuzhen Tsentralen
Haskovo Province

#### Bulgaria Sample Frame (Panel)

		Food	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>Severozapaden</b>	Small (5-19)	1	1	6	4	6	<b>31</b>
	Medium (20-99)	0	0	3	3	0	

	Large (100 or more)	0	1	4	1	1	
<b>Severen Tsentralen</b>	Small (5-19)	0	1	4	8	7	<b>33</b>
	Medium (20-99)	0	1	5	2	2	
	Large (100 or more)	0	0	2	0	1	
<b>Severoiztochen</b>	Small (5-19)	0	2	6	6	9	<b>42</b>
	Medium (20-99)	0	1	5	2	4	
	Large (100 or more)	1	0	1	2	3	
<b>Yugoiztochen</b>	Small (5-19)	3	0	4	8	9	<b>39</b>
	Medium (20-99)	2	0	4	2	2	
	Large (100 or more)	0	1	1	1	2	
<b>Yugozapaden</b>	Small (5-19)	1	3	9	13	30	<b>91</b>
	Medium (20-99)	2	0	6	3	14	
	Large (100 or more)	1	0	3	1	5	
<b>Yuzhen Tsentralen</b>	Small (5-19)	0	1	10	12	10	<b>57</b>
	Medium (20-99)	1	1	6	2	6	
	Large (100 or more)	0	1	4	1	2	
		<b>12</b>	<b>14</b>	<b>83</b>	<b>71</b>	<b>113</b>	<b>293</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

		<b>11</b>	<b>13</b>	<b>47</b>	<b>58</b>	<b>71</b>	<b>200</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 5.2% (358 out of 6881 establishments)<sup>14</sup>.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Food	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total

### A.6.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>1497</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>1458</b>
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	<b>7</b>
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	<b>6</b>
		4. Eligible establishment (Moved and traced)	<b>23</b>
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	<b>3</b>
<b>4645</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>4645</b>
<b>271</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	<b>14</b>
		616. The firm discontinued businesses - (Establishment went bankrupt)	<b>57</b>
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	<b>10</b>
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	<b>26</b>

		620. The firm discontinued businesses - (It was impossible to determine for what reason)	48
		621. The firm discontinued businesses - (Other)	16
		71. Ineligible legal status: not a business, but private household	11
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	49
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	40
87	Out of Target	151. Out of target - outside the covered regions	44
		152. Out of target - moved abroad	4
		153. Out of target - Not registered with Statistical Authority	9
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	2
		156. Duplicated firm within the sample	25
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	3
381	Unobtainable	91. No reply after having called in different days of the week and in different business hours	180
		92. Line out of order	15
		93. No tone	33
		94. Phone number does not exist	90
		10. Answering machine	37
		11. Fax line- data line	4
		12. Wrong address/ moved away and could not get the new references	22
6881	Total contacted		

#### Response Outcomes: Bulgaria ES 2019

Target and totals	Sample target	720
	Sample target completion rate	107.2%
	Total contacts available in frame	8671
	Total contacts issued	6988
	Total contacts contacted	6881
Screening phase	Screening in process	0
	Eligibles	1497
	Screener refusal	4645
	Ineligible + out of target	358
	Unobtainable	381
Interview phase (only if eligible)	Complete interviews without extra module	0
	Complete interviews with extra module	772
	Eligible in process + incomplete interviews	0
	Interview refusal	725
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	67.5%
	Ineligible + out of target rate	5.2%
	Unobtainable rate	5.5%
	Interview conversion rate	11.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	10.5%

### A.6.3. Universe estimates

Universe estimates for the number of establishments in each cell in Bulgaria were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Bulgaria were produced for the strict, weak and median eligibility definitions. Tables below shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Food	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total

<b>Yugoiztochen</b>	Small (5-19)	258	33	636	1300	3026	<b>6748</b>
	Medium (20-99)	115	32	271	182	696	
	Large (100 or more)	28	13	64	17	79	
<b>Yugozapaden</b>	Small (5-19)	442	0	1692	3186	0	<b>18830</b>
	Medium (20-99)	173	0	830	0	0	
	Large (100 or more)	45	0	189	0	364	
	Medium and Large (20+)	0	0	0	598	0	
	Small, Medium and Large (5+)	0	135	0	0	0	
	Small and Medium (5-99)	0	0	0	0	11177	
<b>Yuzhen Tsentralen</b>	Small (5-19)	378	76	1579	1751	3776	<b>9946</b>
	Medium (20-99)	211	48	714	216	824	
	Large (100 or more)	45	20	195	24	90	
		<b>2632</b>	<b>519</b>	<b>8862</b>	<b>10656</b>	<b>27146</b>	<b>49814</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.6.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.11.<sup>15</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.78.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Bulgaria. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.7 Croatia

#### A.7.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Croatia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Dunn & Bradstreet was used.

<sup>15</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Regional stratification for the Croatia ES was done across two regions: Kontinentalna Hrvatska and Jadranska Hrvatska.

Counties (official NUTS-3 regions)	Grouping used for stratification purposes in BEEPS VI
Grad Zagreb	Kontinentalna Hrvatska (Continental Croatia)
Zagrebacka	
Krapinsko-zagorska	
Varazdinska	
Koprivnicko-krizevacka	
Medimurska	
Bjelovarsko-bilogorska	
Viroviticko-podravska	
Pozesko-slavonska	
Brodsko-posavska	
Osjecko-baranjska	
Vukovarsko-srijemska	
Karlovacka	
Sisacko-moslavacka	
Primorsko-goranska	Jadranska Hrvatska (Adriatic Croatia)
Licko-senjska	
Istarska	
Zadarska	
Sibeninsko-kninska	
Splitsko-dalmatinska	
Dubrovačko-neretvanska	

#### Croatia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Kontinentalna Hrvatska</b>	Small (5-19)	662	842	567	<b>4368</b>
	Medium (20-99)	711	377	527	
	Large (100 or more)	321	96	265	
<b>Jadranska Hrvatska</b>	Small (5-19)	178	508	452	<b>2350</b>
	Medium (20-99)	429	130	439	
	Large (100 or more)	64	29	121	
<b>Total</b>		<b>2365</b>	<b>1982</b>	<b>2371</b>	<b>6718</b>

Source: World Bank and Dunn & Bradstreet

#### Croatia ES Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Kontinentalna Hrvatska</b>	Small (5-19)	42	42	47	<b>233</b>
	Medium (20-99)	31	17	27	
	Large (100 or more)	12	10	5	
<b>Jadranska Hrvatska</b>	Small (5-19)	18	28	32	<b>127</b>
	Medium (20-99)	9	10	19	
	Large (100 or more)	5	5	1	
<b>Total</b>		<b>117</b>	<b>112</b>	<b>131</b>	<b>360</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Kontinentalna</b>	Small (5-19)	11	20	14	<b>127</b>

Hrvatska	Medium (20-99)	16	4	5	<b>83</b>
	Large (100 or more)	20	20	17	
Jadranska Hrvatska	Small (5-19)	3	6	8	
	Medium (20-99)	18	3	8	
	Large (100 or more)	12	20	5	
<b>Total</b>		<b>80</b>	<b>73</b>	<b>57</b>	

#### Original Sample Design (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Kontinentalna Hrvatska	Small (5-19)	20	20	12	<b>126</b>
	Medium (20-99)	18	14	20	
	Large (100 or more)	10	8	4	
Jadranska Hrvatska	Small (5-19)	5	18	13	<b>64</b>

	Medium (20-99)	7	0	4	
	Large (100 or more)	3	2	0	
Jadranska Hrvatska	Small (5-19)	2	2	8	<b>22</b>
	Medium (20-99)	0	2	4	
	Large (100 or more)	2	2	0	
<b>Total</b>		<b>27</b>	<b>16</b>	<b>28</b>	<b>71</b>

#### A.7.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>515</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>490</b>

<sup>16</sup> Based on out of target and ineligible contacts.

		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	5
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	9
		4. Eligible establishment (Moved and traced)	7
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	4
<b>2180</b>	<b> Screener refusal</b>	<b>13. Refuses to answer the screener</b>	<b>2180</b>
<b>337</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	61
		616. The firm discontinued businesses - (Establishment went bankrupt)	58
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	12
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	132
		621. The firm discontinued businesses - (Other)	12
		71. Ineligible legal status: not a business, but private household	5
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	5
<b>313</b>	<b>Out of Target</b>	8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	52
		151. Out of target - outside the covered regions	1
		152. Out of target - moved abroad	1
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	68
157. Out of target - location that is not HQ and does not have financial statements prepared separately	243		
<b>248</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	48
		92. Line out of order	22
		93. No tone	10
		94. Phone number does not exist	132
		10. Answering machine	8
		11. Fax line- data line	17
		12. Wrong address/ moved away and could not get the new references	11
<b>3593</b>	<b>Total contacted</b>		

#### Response Outcomes: Croatia ES 2019

<b>Target and totals</b>	Sample target	400
	Sample target completion rate	101.0%
	Total contacts available in frame	6718
	Total contacts issued	4175

	Total contacts contacted	3593
Screening phase	Screening in process	0
	Eligibles	515
	Screener refusal	2180
	Ineligible + out of target	650
	Unobtainable	248
Interview phase (only if eligible)	Complete interviews without extra module	64
	Complete interviews with extra module	340
	Eligible in process + incomplete interviews	0
	Interview refusal	111
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	60.7%
	Ineligible + out of target rate	18.1%
	Unobtainable rate	6.9%
	Interview conversion rate	11.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	3.1%

### A.7.3. Universe estimates

Universe estimates for the number of establishments in each cell in Croatia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Croatia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Kontinentalna Hrvatska	Small (5-19)	267	609	196	1612
	Medium (20-99)	136	172	56	
	Large (100 or more)	72	48	56	
Jadranska Hrvatska	Small (5-19)	117	357	169	921
	Medium (20-99)	57	101	48	
	Large (100 or more)	18	27	27	
<b>Total</b>		<b>667</b>	<b>1314</b>	<b>552</b>	<b>2533</b>

##### Median Universe Estimates – Fresh:

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Kontinentalna Hrvatska</b>	Small (5-19)	1636	4198	1375	<b>10337</b>
	Medium (20-99)	833	1195	387	
	Large (100 or more)	268	203	242	
<b>Jadranska Hrvatska</b>	Small (5-19)	645	2206	1056	<b>5404</b>
	Medium (20-99)	318	626	298	
	Large (100 or more)	49	103	102	
<b>Total</b>		<b>3749</b>	<b>8532</b>	<b>3461</b>	<b>15741</b>

#### **Weak Universe Estimates – Fresh:**

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Kontinentalna Hrvatska</b>	Small (5-19)	1792	4616	1483	<b>11297</b>
	Medium (20-99)	920	1324	421	
	Large (100 or more)	279	212	248	
<b>Jadranska Hrvatska</b>	Small (5-19)	714	2451	1151	<b>5966</b>
	Medium (20-99)	354	702	328	
	Large (100 or more)	51	109	106	
<b>Total</b>		<b>4111</b>	<b>9414</b>	<b>3737</b>	<b>17263</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### **A.7.4. Non-response**

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. For this survey there were zero non-responses for the sales variable, d2. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.11.<sup>17</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.64.

<sup>17</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Rejection rate and Interviews per Contact,  
Croatia ES, 2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Croatia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.8 Czech Republic

### A.8.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 254 firms from the Czech Republic 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Dun and Bradstreet was used.

Regional stratification for the Czech Republic ES was done across four regions: Central comprising Prague (CZ01) and Central Bohemia (CZ02); South comprising Jihozápad (CZ03) and Jihovýchod (CZ06); North comprising Severozápad (CZ04) and Severovýchod (CZ05) and East comprising Moravskoslezsko (CZ08) and Střední Morava (CZ07)).

NUTS-3	NUTS-2	Grouping to be used for stratification purposes in BEEPS VI
Prague	Prague (CZ01)	Central
Central Bohemian Region	Střední Čechy (Central Bohemia) (CZ02)	
South Bohemian Region	Jihozápad (CZ03)	South
Plzeň Region	Jihovýchod (CZ06)	
Vysočina Region		
South Moravian Region	Severozápad (CZ04)	North
Karlovy Vary Region		
Ústí nad Labem Region		
Liberec Region		
Hradec Králové Region	Severovýchod (CZ05)	North
Pardubice Region		
Moravian-Silesian Region	Moravskoslezsko (CZ08)	East
Olomouc Region	Střední Morava (CZ07)	
Zlín Region

### A.8.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>1271</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	1235
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	4
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	6
		4. Eligible establishment (Moved and traced)	20
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	6
<b>9475</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>9475</b>
<b>2907</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	1996
		616. The firm discontinued businesses - (Establishment went bankrupt)	62
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	53
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	27
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	194
		621. The firm discontinued businesses - (Other)	131
		71. Ineligible legal status: not a business, but private household	78
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	318
<b>367</b>	<b>Out of Target</b>	8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	48
		151. Out of target - outside the covered regions	8
		152. Out of target - moved abroad	3
		153. Out of target - Not registered with Statistical Authority	26
		154. Out of target - establishment is HQ without production or sales of goods or services	9
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	31
		156. Duplicated firm within the sample	134
157. Out of target - location that is not HQ and does not have financial statements prepared separately	156		

3124	Unobtainable	91. No reply after having called in different days of the week and in different business hours	1829
		92. Line out of order	18
		93. No tone	8
		94. Phone number does not exist	957
		10. Answering machine	27
		11. Fax line- data line	3
		12. Wrong address/ moved away and could not get the new references	282
17144	Total contacted		

### Response Outcomes: Czech Republic ES 2019:

Target and totals	Sample target	480
	Sample target completion rate	104.6%
	Total contacts available in frame	20308
	Total contacts issued	17242
	Total contacts contacted	17144
Screening phase	Screening in process	0
	Eligibles	1271
	Screener refusal	9475
	Ineligible + out of target	3274
	Unobtainable	3124
Interview phase (only if eligible)	Complete interviews without extra module	15
	Complete interviews with extra module	487
	Eligible in process + incomplete interviews	8
	Interview refusal	757
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	55.3%
	Ineligible + out of target rate	19.1%
	Unobtainable rate	18.2%
	Interview conversion rate	2.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	4.4%

### A.8.3. Universe estimates

Universe estimates for the number of establishments in each cell in Czech Republic were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Czech Republic were produced for the strict, weak and median eligibility definitions. Tables below

shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights  
Strict Universe Estimates – Fresh:**

		Food	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>Central</b>	Small (5-19)	20	39	13	86	68	0	<b>879</b>
	Medium (20-99)	13	19	14	54	19	0	
	Large (100 or more)	7	7	7	29	6	35	
	Small and Medium (5-99)	0	0	0	0	0	443

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

**A.8.4. Non-Response**

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.03.<sup>19</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.59.

<sup>19</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Czech Republic. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.9 Egypt

### A.9.1. Sampling structure and implementation

The sample frame, shown in the accompanying Implementation Report Excel file (sheet “Egypt ES Sample Frame”) consisted of listings of firms from several sources. For panel firms, the list of 1814 firms from the Egypt 2016 ES was used and for fresh firms (i.e., firms not covered in 2016), firm data from Central Agency for Public Mobilization and Statistics (CAPMAS) and the 2013 Egypt Business census was used.

Regional stratification was done across six regions: Greater Cairo, West Delta, Suez region, Middle and East Delta, Northern Upper Egypt and Southern Upper Egypt.

<b>Egypt Regional Units</b>	<b>Grouping to be used for stratification purposes in BEEPS VI</b>
Greater Cairo Regional Unit	Greater Cairo
Alexandria Regional Unit	West Delta
Suez Canal Regional Unit	Suez region
Asyut Regional Unit	Middle and East Delta
Delta Regional Unit	
North Upper Egypt Regional Unit	Northern Upper Egypt
South Upper Egypt Regional Unit	Southern Upper Egypt

		<b>217</b>	<b>131</b>	<b>82</b>	<b>99</b>	<b>142</b>	<b>149</b>	<b>125</b>	<b>78</b>	<b>122</b>	<b>23</b>	<b>115</b>	<b>232</b>	<b>195</b>	<b>104</b>	<b>1814</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 9.3% (377 out of 3643 establishments).<sup>20</sup>

<sup>20</sup> Based on out of target and ineligible contacts.

Breaking down by industry and size, the sample targets were achieved.

## A.9.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>3075</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	2855
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	110
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	57
		4. Eligible establishment (Moved and traced)	48
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	5

<b>33</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>33</b>
<b>246</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	1
		616. The firm discontinued businesses - (Establishment went bankrupt)	14
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	22
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	2
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	36
		621. The firm discontinued businesses - (Other)	79
		71. Ineligible legal status: not a business, but private household	45
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	2
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	45
<b>91</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	5
		152. Out of target - moved abroad	5
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	1
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	1
		156. Duplicated firm within the sample	79
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>198</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	15
		92. Line out of order	3
		93. No tone	6
		94. Phone number does not exist	7
		10. Answering machine	2
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	165

<b>3643</b>	<b>Total contacted</b>

<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	3075
	Eligible in process + incomplete interviews	0
	Interview refusal	0

<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	0.9%
	Ineligible + out of target rate	9.3%
	Unobtainable rate	5.4%
	Interview conversion rate	84.4%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.0%

### A.9.3. Universe estimates

Universe estimates for the number of establishments in each cell in Egypt were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Egypt were produced for the strict, weak and median eligibility definitions. Tables below shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.9.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.84.<sup>21</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.01.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Egypt. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>21</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.10 Estonia

### A.10.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 273 firms from the Estonia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Credit Info was used.

Regional stratification for the Estonia ES was done across three regions: Põhja-Eesti, Lääne-Eesti/Kesk-Eesti ja Kirde-Eesti and Lõuna-Eesti.

Counties	Grouping used for stratification purposes in BEEPS VI
Tallinn	Põhja-Eesti
Harjumaa	
Hiiumaa	Lääne-Eesti, Kesk-Eesti ja Kirde-Eesti
Läänemaa	
Pärnumaa	
Saaremaa

<b>32</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	32
<b>966</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	922
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	1
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	2
		4. Eligible establishment (Moved and traced)	33
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	8
<b>1311</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	1311
<b>110</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	80
		616. The firm discontinued businesses - (Establishment went bankrupt)	6
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	1
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	3
		621. The firm discontinued businesses - (Other)	4
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	0
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	16
<b>204</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	1
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	42
		156. Duplicated firm within the sample	123
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	38
<b>254</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	159

		92. Line out of order	38
		93. No tone	0
		94. Phone number does not exist	1
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	56
<b>2877</b>	<b>Total contacted</b>		

#### Response Outcomes: Estonia ES 2019:

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	100.0%
	Total contacts available in frame	4155
	Total contacts issued	3218
	Total contacts contacted	2877
<b>Screening phase</b>	Screening in process	32
	Eligibles	966
	Screener refusal	1311
	Ineligible + out of target	314
	Unobtainable	254
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	1
	Complete interviews with extra module	359
	Eligible in process + incomplete interviews	0
	Interview refusal	606
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	1.1%
	Screener refusal rate	45.6%
	Ineligible + out of target rate	10.9%
	Unobtainable rate	8.8%
	Interview conversion rate	12.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	21.1%

#### A.10.3. Universe estimates

Universe estimates for the number of establishments in each cell in Estonia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Estonia were produced for the strict, weak and median eligibility definitions. Tables below

show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Universe

		Manufacturing	Retail	Other Services	Grand Total
Põhja-Eesti	Small (5-19)	860	514	3410	6336
	Medium (20-99)	415	113	756	
	Large (100 or more)	91	47	130	
Lääne-Eesti, Kesk-Eesti ja Kirde-Eesti	Small (5-19)	443	247	1419	2722
	Medium (20-99)	252	40	231	
	Large (100 or more)	65	9	16	
Lõuna-Eesti	Small (5-19)	361	162	1162	2224
	Medium (20-99)	210	27	223	
	Large (100 or more)	52	15	12	
		2749	1174	7359	11282

**Note:** The sampling frame used and the universe are from separate sources

#### Universe Estimates

		Manufacturing	Retail	Other Services	Grand Total
Põhja-Eesti	Small (5-19)	860	514	3410	6336
	Medium (20-99)	415	113	756	
	Large (100 or more)	91	47	130	
Lääne-Eesti, Kesk-Eesti ja Kirde-Eesti	Small (5-19)	443	247	1419	2722
	Medium (20-99)	252	40	231	
	Large (100 or more)	65	9	16	
Lõuna-Eesti	Small (5-19)	361	162	1162	2224
	Medium (20-99)	210	27	223	
	Large (100 or more)	52	15	12	
		2749	1174	7359	11282

**Note:** Adjustments for strict, median and weak assumptions were not applied to universe estimates because the universe and the frame were from separate sources hence scenarios that apply to the frame cannot be assumed in the universe

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.10.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.13.<sup>23</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.67.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Estonia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## **A.11 Georgia**

### **A.11.1. Sampling structure and implementation**

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Georgia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from GeoStat was used.

Regional stratification was done across five regions: Tbilisi; East; Adjara; Guria, Samegrelo, Zemo Svaneti; and Center.

<b>Regions of Georgia</b>	<b>Grouping to be used for stratification purposes in BEEPS VI</b>
Tbilisi	Tbilisi
Kakheti	East
Kvemo Kartli	
Adjara	Adjara
Samegrelo-Zemo Svaneti	Guria, Samegrelo, Zemo Svaneti
Guria	

<sup>23</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Imereti	Center
Shida Kartli	
Samtskhe-Javakheti	
Mtskheta-Mtianeti	
Racha-Lechkhumi and Kvemo Svaneti	
Abkhazia	Not covered

**A.11.2. Status Codes**

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>651</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	647
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	4
<b>911</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	911
<b>621</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	85
		616. The firm discontinued businesses - (Establishment went bankrupt)	6
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	13
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	19
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	218
		621. The firm discontinued businesses - (Other)	97
		71. Ineligible legal status: not a business, but private household	111
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	27
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	45
<b>44</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	1
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	3
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	15
		156. Duplicated firm within the sample	24
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	1
<b>764</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	599
		92. Line out of order	39
		93. No tone	6
		94. Phone number does not exist	35
		10. Answering machine	3
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	82
<b>2991</b>	<b>Total contacted</b>		

**Response Outcomes: Georgia ES 2019:**

<b>Target and totals</b>	Sample target	580
	Sample target completion rate	100.2%
	Total contacts available in frame	12222
	Total contacts issued	3357
	Total contacts contacted	2991
<b>Screening phase</b>	Screening in process	0
	Eligibles	651
	Screener refusal	911
	Ineligible + out of target	665
	Unobtainable	764
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	581
	Eligible in process + incomplete interviews	0
	Interview refusal	66
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	30.5%
	Ineligible + out of target rate	22.2%
	Unobtainable rate	25.5%
	Interview conversion rate	19.4%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	2.2%

**A.11.3. Universe estimates**

Universe estimates for the number of establishments in each cell in Georgia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Georgia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

## Universe Estimate Based on Sampling Weights

### Strict Universe Estimates – Fresh:

		Food	Other Manufacturing	Retail	Hotels and Restaurants	Other Services	Grand Total

		<b>701</b>	<b>1006</b>	<b>1800</b>	<b>355</b>	<b>5550</b>	<b>9412</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.11.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.20.<sup>25</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.32.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the

<sup>25</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Georgia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.12 Greece

### A.12.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 323 firms from the 2016 EBRD survey was used; for fresh firms (i.e., firms not covered in 2016), establishment-level firm data from ERGANI was used.

Regional stratification for the Greece ES was done across four regions: Northern Greece, Central Greece, Attica, and Aegean Islands, Crete.

NUTS 1	Grouping to be used for stratification purposes in BEEPS VI
North Greece	North Greece
Central Greece	Central Greece
Attica	Attica
Aegean Islands, Crete	Aegean Islands, Crete

#### Greece ES Sample Frame (Fresh and Panel Combined)

		Food	Fabricated Metal Products	Other Manufacturing	Retail	Other Services	Grand Total

#### A.12.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>961</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>954</b>
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	<b>0</b>

<sup>26</sup> Based on out of target and ineligible contacts.

		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	5
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	2
974	<b> Screener refusal</b>	13. Refuses to answer the screener	974
58	<b> Ineligible</b>	5. The establishment has less than 5 permanent full time employees	0
		616. The firm discontinued businesses - (Establishment went bankrupt)	1
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	1
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	11
		621. The firm discontinued businesses - (Other)	12
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	31
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	2
42	<b> Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	20
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	10
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	12
23	<b> Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	7
		92. Line out of order	5
		93. No tone	0
		94. Phone number does not exist	5
		10. Answering machine	3
		11. Fax line- data line	2
		12. Wrong address/ moved away and could not get the new references	1
2058	<b> Total contacted</b>		

#### Response Outcomes: Greece ES 2019

<b>Target and totals</b>	Sample target	600
	Sample target completion rate	100.0%
	Total contacts available in frame	56420
	Total contacts issued	2558
	Total contacts contacted	2058
	Screening in process	0

<b>Screening phase</b>	Eligibles	961
	Screeners refusal	974
	Ineligible + out of target	100
	Unobtainable	23
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	28
	Complete interviews with extra module	572
	Eligible in process + incomplete interviews	0
	Interview refusal	354
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screeners refusal rate	47.3%
	Ineligible + out of target rate	4.9%
	Unobtainable rate	1.1%
	Interview conversion rate	29.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	17.2%

### A.12.3. Universe estimates

Universe estimates for the number of establishments in each cell in Greece were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Greece were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Food	Fabricated Metal Products	Other Manufacturing	Retail	Other Services	Grand Total
<b>North Greece</b>	Small (5-19)	428	102	552	1126	2402	<b>5745</b>
	Medium (20-99)	116	33	179	273	439	
	Large (100 or more)	31	3	24	10	28	
<b>Central Greece</b>	Small (5-19)	287	74	239	732	1624	<b>3674</b>
	Medium (20-99)	84	24	93	213	244	
	Large (100 or more)	14	4	26	4	11	

<b>Attica</b>	Small (5-19)	354	122	661	1688	3469	<b>1935</b>
	Medium (20-99)	82	36	227	393	895	
	Large (100 or more)	16	5	36	36	83	
<b>Aegean Island, Crete</b>	Small (5-19)	112	21	67	390	1007	<b>19535</b>
	Medium (20-99)	25	2	15	90	169	
	Large (100 or more)	2	0	1	3	29	
<b>Total</b>		<b>1551</b>	<b>425</b>	<b>2120</b>	<b>4960</b>	<b>10401</b>	<b>19458</b>

#### Median Universe Estimates – Fresh:

		Food	Fabricated Metal Products	Other Manufacturing	Retail	Other Services	Grand Total
<b>North Greece</b>	Small (5-19)	892	181	1179	2117	6705	<b>13403</b>
	Medium (20-99)	213	51	337	454	1082	
	Large (100 or more)	57	4	46	17	69	
<b>Central Greece</b>	Small (5-19)	670	148	572	1544	5085	<b>9633</b>

<b>Aegean Island, Crete</b>	Small (5-19)	300	49	185	948	3633	<b>6058</b>
	Medium (20-99)	60	4	37	194	538	
	Large (100 or more)	5	0	6	5	93	
		<b>3561</b>	<b>844</b>	<b>5032</b>	<b>10601</b>	<b>33224</b>	<b>53262</b>

#### Weak Universe Estimates – Fresh:

		Food	Fabricated Metal Products	Other Manufacturing	Retail	Other Services	Grand Total
<b>North Greece</b>	Small (5-19)	904	183	1186	2122	6794	<b>13533</b>
	Medium (20-99)	215	51	338	453	1093	
	Large (100 or more)	57	4	46	17	69	
<b>Central Greece</b>	Small (5-19)	682	150	578	1555	5176	<b>9771</b>
	Medium (20-99)	176	42	198	398	684	
	Large (100 or more)	30	8	56	7	31	
<b>Attica</b>	Small (5-19)	947	279	1805	4038	12453	<b>24463</b>
	Medium (20-99)	194	73	545	827	2827	
	Large (100 or more)	37	10	87	76	264	
<b>Aegean Island, Crete</b>	Small (5-19)	307	50	187	959	3715	<b>6179</b>
	Medium (20-99)	61	4	38	196	549	
	Large (100 or more)	5	0	9	5	94	
		<b>3615</b>	<b>853</b>	<b>5074</b>	<b>10654</b>	<b>33750</b>	<b>53946</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.12.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer

some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. For this survey there were zero non-responses for the sales variable, *d2*. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.29.<sup>27</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.65.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Greece. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## **A.13 Hungary**

### **A.13.1. Sampling structure and implementation**

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 310 firms from the Hungary 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Dunn & Bradstreet was used.

Regional stratification for the Hungary ES was done across seven regions: Central Hungary (Közép-Magyarország), Central Transdanubia (Közép-Dunántúl), Northern Great Plain (Észak-Alföld),

---

<sup>27</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Northern Hungary (Észak-Magyarország), Southern Great Plain (Dél-Alföld), Southern Transdanubia (Dél-Dunántúl) and Western Transdanubia (Nyugat-Dunántúl).

NUTS1	NUTS2	NUTS3	Grouping used for stratification purposes in BEEPS VI
Central Hungary (Közép-Magyarország)	Budapest	Budapest	Central Hungary (Közép-Magyarország)

### Hungary Sample Frame (Panel)

		Food	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
Central Hungary	Small (5-19)	3	2	5	11	29	27	136
	Medium (20-99)	1	4	2	5	11	12	
	Large (100 or more)	2	1	0	2	8	11	
Central Transdanubia	Small (5-19)	0	0	0	5	9	5	28
	Medium (20-99)	0	0	0	2	0	0	
	Large (100 or more)	0	0	0	3	2	2	
Western Transdanubia	Small (5-19)	1	1	1	1	7	9	36
	Medium (20-99)	1	0	0	3	0	4	
	Large (100 or more)	1	0	0	4	1	2	
Southern Transdanubia	Small (5-19)	2	0	0	0	5	5	21
	Medium (20-99)	0	0	0	2	2	1	
	Large (100 or more)	0	0	0	2	1	1	
Northern Hungary	Small (5-19)	1	2	0	2	4	4	23
	Medium (20-99)	0	0	0	2	2	1	
	Large (100 or more)	0	0	0	1	1	3	
Northern Great Plain	Small (5-19)	1	2	0	2	4	5	29
	Medium (20-99)	2	1	1	3	1	2	
	Large (100 or more)	3	0	0	1	1	0	
Southern Great Plain	Small (5-19)	1	1	0	4	15	9	37
	Medium (20-99)	0	0	0	0	3	0	
	Large (100 or more)	1	0	0	0	1	2	
		20	14	9	55	107	105	310

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

		<b>18</b>	<b>12</b>	<b>6</b>	<b>34</b>	<b>45</b>	<b>55</b>	<b>170</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 8.0% (617 out of 7697 establishments).<sup>28</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Food	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>Central Hungary</b>	Small (5-19)	6	9	7	5	10	40	<b>111</b>
	Medium (20-99)	3	3	2	3	4	7

		3	4	2	16	22	40	87

### A.13.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>808</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	808
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
<b>5187</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	5187
<b>506</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	0
		616. The firm discontinued businesses - (Establishment went bankrupt)	37
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	8
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	17
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	82
		621. The firm discontinued businesses - (Other)	41
		71. Ineligible legal status: not a business, but private household	22
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	4
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	295
<b>111</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	83
		152. Out of target - moved abroad	11
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	2
		156. Duplicated firm within the sample	15
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>1085</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	1034
		92. Line out of order	6
		93. No tone	1
		94. Phone number does not exist	2
		10. Answering machine	7
		11. Fax line- data line	0

		12. Wrong address/ moved away and could not get the new references	35
7697	Total contacted		

### Response Outcomes: Hungary ES 2019

Target and totals	Sample target	840
	Sample target completion rate	95.8%
	Total contacts available in frame	10184
	Total contacts issued	7697
	Total contacts contacted	7697

Screening phase	Screening in process	0
	Eligibles	808
	Screener refusal	5187
	Ineligible + out of target	617
	Unobtainable	1085
Interview phase (only if eligible)	Complete interviews without extra module	0
	Complete interviews with extra module	805
	Eligible in process + incomplete interviews	0
	Interview refusal	3

Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	67.4%
	Ineligible + out of target rate	8.0%
	Unobtainable rate	14.1%
	Interview conversion rate	10.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.0%

### A.13.3. Universe estimates

Universe estimates for the number of establishments in each cell in Hungary were produced for the strict, weak and median eligibility definitions described 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Hungary were produced for the strict, weak and median eligibility definitions. Tables below shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

**Strict Universe Estimates – Fresh:**

		Food	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>Central Hungary</b>	Small (5-19)	24	31	14	60	164	360	<b>885</b>

		<b>2024</b>	<b>2514</b>	<b>669</b>	<b>5383</b>	<b>8556</b>	<b>27724</b>	<b>46869</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.13.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.11.<sup>29</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.67.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames

<sup>29</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

are not unique to Hungary. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## **A.14 Italy**

### **A.14.1. Sampling structure and implementation**

The sample frame consisted of a listing of establishments from Dun & Bradstreet. For establishments that were part of a multi-establishment firm and did not have establishment-level information on size, size information of the immediate headquarters was used to impute size bands as follows:

- If the immediate headquarters was small, the establishment was classified as small.
- If the immediate headquarters was medium or large, the establishment was classified as medium.

Regional stratification for the Italy ES was done across the five NUTS1 regions: Northwest, Northeast, Center, South and Islands.

<b>NUTS-2 regions</b>	<b>NUTS-1 regions</b>	<b>Grouping to be used for stratification purposes in BEEPS VI</b>
Piemonte	Northwest Italy	Northwest

		<b>2035</b>	<b>2161</b>	<b>2125</b>	<b>2413</b>	<b>2208</b>	<b>3000</b>	<b>13942</b>

Source: Dun & Bradstreet

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		Food	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>Northwest</b>	Small (5-19)	3	9	5	18	12	33	<b>160</b>

### A.14.3. Universe estimates

Universe figures for the number of establishments in each cell in Italy were obtained from Istat's 2015 ASIA registry (Registro statistico delle imprese attive).

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Weights for the probability of selection were computed using the number of completed interviews for each cell.

For this survey, because the source of the sample was different than the source of universe figures, eligibility adjustments were not made, and wstrict, wmedian and wweak coincide.

Note: The sampling frame used and the universe are from separate sources.

#### A.14.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.17.<sup>31</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.28.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Italy. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

---

<sup>31</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.15 Jordan

### A.15.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 573 firms from the Jordan 2013 ES was used and for fresh firms (i.e., firms not covered in 2013), lists of firms from the local Chambers of Commerce were compiled and used.

Regional stratification was done across five regions: Amman, Irbid, Zarqa, North and Central (Ajloun, Balqa, Jarash, Madaba, Ma'raq) and South (Aqaba, Karak, Ma'an, Tafilah).

Governorates of Jordan	Grouping used for stratification purposes in BEEPS VI
Irbid	Irbid
Ajloun	North and Central
Jerash	
Ma'raq	
Balqa	
Madaba	
Zarqa	Zarqa
Amman	Amman
Karak	South
Tafilah	
Ma'an	
Aqaba	

#### Jordan ES Sample Frame (Fresh and Panel Combined)

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total

#### Jordan Sample Frame (Panel)

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total
<b>Amman</b>	Small (5-19)	16	11	37	26	34	<b>302</b>
	Medium (20-99)	15	12	35	13	36	
	Large (100 or more)	11	5	28	11	12	
<b>Irbid</b>	Small (5-19)	3	0	10	18	7	<b>95</b>

	Medium (20-99)	11	3	8	5	6	
	Large (100 or more)	0	19	5	0	0	
<b>Zarqa</b>	Small (5-19)	7	6	10	11	11	<b>92</b>
	Medium (20-99)	9	1	6	2	2	
	Large (100 or more)	7	9	11	0	0	
<b>North and Central</b>	Small (5-19)	4	0	7	5	5	<b>36</b>
	Medium (20-99)	3	0	3	2	0	
	Large (100 or more)	1	0	5	1	0	
<b>South</b>	Small (5-19)	1	0	13	11	13	<b>48</b>
	Medium (20-99)	0	0	3	1	5	
	Large (100 or more)	0	0	0	0	1	
		<b>88</b>	<b>66</b>	<b>181</b>	<b>106</b>	<b>132</b>	<b>573</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Full)

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total
<b>Amman</b>	Small (5-19)	2	2	2	6	11	<b>78</b>
	Medium (20-99)	2	2	4	30	4	
	Large (100 or more)	2	2	2	4	3

		<b>83</b>	<b>71</b>	<b>46</b>	<b>65</b>	<b>85</b>	<b>350</b>

#### Original Sample Design (Panel)

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total
<b>Amman</b>	Small (5-19)	3	2	6	4	7	<b>62</b>
	Medium (20-99)	3	2	6	10	6	
	Large (100 or more)	2	1	5	3	2	
<b>Irbid</b>	Small (5-19)	2	0	8	8	1	<b>58</b>
	Medium (20-99)	8	2	6	4	1	
	Large (100 or more)	0	14	4	0	0	
<b>Zarqa</b>	Small (5-19)	5	5	8	8	2	<b>65</b>
	Medium (20-99)	7	1	5	2	2	
	Large (100 or more)	5	7	8	0	0	
	Small (5-19)	3	0	5	4	4	<b>28</b>

<b>North and Central</b>	Medium (20-99)	2	0	2	2	0	
	Large (100 or more)	1	0	4	1	0	
<b>South</b>	Small (5-19)	1	0	10	8	10	<b>37</b>
	Medium (20-99)	0	0	2	1	4	
	Large (100 or more)	0	0	0	0	1	
		<b>42</b>	<b>34</b>	<b>79</b>	<b>55</b>	<b>40</b>	<b>250</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 11.6% (507 out of 4357 establishments)<sup>32</sup>.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Archieved Interviews (Fresh and Panel Combined)

### A.15.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>1552</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	1546
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	2
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	1
		4. Eligible establishment (Moved and traced)	2
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	1
<b>764</b>	<b> Screener refusal</b>	13. Refuses to answer the screener	<b>764</b>
<b>417</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	202
		616. The firm discontinued businesses - (Establishment went bankrupt)	0
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	0
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	1
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	41
		621. The firm discontinued businesses - (Other)	103
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	0
<b>90</b>	<b>Out of Target</b>	8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	70
		151. Out of target - outside the covered regions	22
		152. Out of target - moved abroad	0

		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	68
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
1534	Unobtainable	91. No reply after having called in different days of the week and in different business hours	315
		92. Line out of order	604
		93. No tone	3
		94. Phone number does not exist	611
		10. Answering machine	0
		11. Fax line- data line	1
		12. Wrong address/ moved away and could not get the new references	0
<b>4357</b>	<b>Total contacted</b>		

### Response Outcomes: Jordan ES 2019

<b>Target and totals</b>	Sample target	600
	Sample target completion rate	100.2%
	Total contacts available in frame	13255
	Total contacts issued	4357
	Total contacts contacted	4357

<b>Screening phase</b>	Screening in process	0
	Eligibles	1552
	Screener refusal	764
	Ineligible + out of target	507
	Unobtainable	1534
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	601
	Eligible in process + incomplete interviews	0
	Interview refusal	945

<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	17.5%
	Ineligible + out of target rate	11.6%
	Unobtainable rate	35.2%
	Interview conversion rate	13.8%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	21.7%

### A.15.3. Universe estimates

Universe estimates for the number of establishments in each cell in Jordan were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Jordan were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		<b>790</b>	<b>319</b>	<b>1913</b>	<b>4665</b>	<b>4683</b>	<b>12370</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.15.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer

some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- c) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- d) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.14.<sup>33</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.39.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Jordan. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

---

<sup>33</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.16 Kazakhstan

### A.16.1. Sampling structure and implementation

The sample frame consisted of listings of establishments from two sources: for panel firms, the list of 600 firms from the Kazakhstan 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the National Committee on Statistics, was used. The establishments in the listing are all registered as businesses with the Public Registration Center.

Regional stratification for the Kazakhstan ES was done across eleven regions: Akmola Region; Aktobe Region; Almaty; Almaty Region; Nur-Sultan; Atyrau Region; Mangystau and West Kazakhstan; East Kazakhstan; Karaganda Region; Kostanay, North Kazakhstan, Pavlodar and Kyzylorda Region, South Kazakhstan, Jambyl.

Regions of Kazakhstan	Grouping to be used for stratification purposes in BEEPS VI
Akmola Region	Akmola Region
Aktobe Region	Aktobe Region
Almaty	Almaty
Almaty Region	Almaty Region
Atyrau Region	Atyrau Region
East Kazakhstan Region	East Kazakhstan
Pavlodar Region	Kostanay, North Kazakhstan, Pavlodar
Kostanay Region	
North Kazakhstan Region	
Mangystau Region	Mangystau and West Kazakhstan
West Kazakhstan Region	
Nur-Sultan	Nur-Sultan
Karaganda Region	Karaganda Region
Kyzylorda Region	Kyzylorda Region, South Kazakhstan, Jambyl
South Kazakhstan Region	
Symkent	
Jambyl Region	
Baikonur	Not covered

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 40.5% (4674 out of 11530 establishments)<sup>34</sup>.

<sup>34</sup> Based on out of target and ineligible contacts

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

**A.16.2. Status codes**

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>2695</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	2461
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	39
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	40
		4. Eligible establishment (Moved and traced)	147
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	8
<b>2917</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	2917
<b>3810</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	718
		616. The firm discontinued businesses - (Establishment went bankrupt)	131
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	128
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	95
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	1468
		621. The firm discontinued businesses - (Other)	929
		71. Ineligible legal status: not a business, but private household	78
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	49
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	214
<b>864</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	127
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	11
		154. Out of target - establishment is HQ without production or sales of goods or services	6
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	636
		156. Duplicated firm within the sample	7
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	77
<b>1244</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	184
		92. Line out of order	2
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	1058
<b>11530</b>	<b>Total contacted</b>		

## Response Outcomes: Kazakhstan ES 2019

<b>Target and totals</b>	Sample target	1440
	Sample target completion rate	100.4%
	Total contacts available in frame	143509
	Total contacts issued	11779
	Total contacts contacted	11530
<b>Screening phase</b>	Screening in process	0
	Eligibles	2695
	Screener refusal	2917
	Ineligible + out of target	4674
	Unobtainable	1244
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	35
	Complete interviews with extra module	1411
	Eligible in process + incomplete interviews	0
	Interview refusal	1249
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	25.3%
	Ineligible + out of target rate	40.5%
	Unobtainable rate	10.8%
	Interview conversion rate	12.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	10.8%

### A.16.3. Universe estimates

Universe estimates for the number of establishments in each cell in Kazakhstan were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

Universe estimates for the number of establishments in each cell in Kazakhstan were produced for the strict, weak and median eligibility definitions described below. The estimates were the multiple of the relative eligible proportions.

Universe estimates for the number of establishments in each industry-region-size cell in Kazakhstan were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		Food	Garments	Non Metallic Mineral Products	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total

#### A.16.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.13.<sup>35</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.36.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Kazakhstan. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

#### A.16.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	Name: Ipsos in Kazakhstan
--------------	---------------------------

<sup>35</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

	<p>Region: Kazakhstan</p> <p>Membership of KAPIOR – Kazakhstan Association of professional researchers of public opinion and market. A non-profit organization whose mission is to develop and expand the market for research services and protect the rights and interests of its members. It unites legal entities from among the leading marketing and sociological organizations of the Republic of Kazakhstan, organizations interested in conducting professional research and effective use of their results.</p> <p>Membership of ESOMAR.</p> <p>Activities in Kazakhstan since: 2012</p>
Enumerators involved:	<p>Recruiters: 14</p> <p>Interviewers: 52</p> <p>Recruiters + Interviewers: 15</p>
Other staff involved:	<p>Fieldwork Coordinators: 22 regional supervisors</p> <p>Data Processing: Ipsos was responsible for all data processing</p>

### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	National Statistical Committee
Year:	January 2018
Comments on the quality of sample frame:	The sample frame was of poor quality, because the last update was quite a long time ago. It contains many enterprises that no longer exist, for which contact details were incorrect or that had moved or changed operations in some way. The number of employees was not always accurate.

### Sample

Comments/ problems for particular regions:	<p>On regions:</p> <p>3 regions included 2-3 geographically different and very distant from each other regions (Kostanay, North Kazakhstan, Pavlodar; Mangystau and West Kazakhstan; Kyzylorda Region, South Kazakhstan, Jambyl), which complicated compliance with the preference order and additional efforts had to be made to consolidate the work of these regions.</p> <p>In Atyrau and Kostanay+ there were many enterprises that were located far from the city, in remote settlements where there was no regular transport. Public transport allows you to travel to these localities only once or twice a day. This created additional logistical difficulties during field work and made it difficult to agree on the timing of interviews with respondents.</p> <p>Atyrau, Kostanay+ and Mangystau+ are very specific regions, with a special mentality, it is very difficult to contact representatives of these regions.</p>
Comments on the response rate:	Response rate for Kazakhstan is 26%. This is a good response rate considering the specifics of the target audience, as well as the specifics and duration of the interview.
Comments on the sample design:	To divide the regions in which several regions (Kostanay, North Kazakhstan, Pavlodar; Mangystau and West Kazakhstan; Kyzylorda Region, South Kazakhstan, Jambyl).
Other comments:	No

### Fieldwork

Date of Fieldwork	10 January 2019 to 31 October 2019
-------------------	------------------------------------

Country	Kazakhstan
Number of interviews	1440
Problems found during fieldwork:	Sample frame was of poor quality, with rather outdated data. The interview length and low interest in participation meant that many business executives were reluctant to take part and recruiters had to work hard to convince them to participate. Many managers indicated that they were not allowed to participate in surveys concerning the activities of the enterprise, citing the terms of the contract, which included the clause - a trade secret.
Other observations:	The general attitude of the respondents to the survey was rather negative.

### Questionnaires

Problems for the understanding of questions (indicate question number)	H1, H5
Not relevant Questions	BMGe 1
Questions that imply confidential information in the answer, causing anger and refusal to answer	D2, N2, N2e1, N7a, K11, K4b, BMK10
Comments on questionnaires length:	About 20-30% of respondents complained about the excessive length of the interview distracting them from their main duties.
Suggestions or other comments on the questionnaire:	Add the answer option REFUSE to all questions. Use a simpler vocabulary when formulating questions.

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

### Country/ region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Kazakhstan's economy is the largest in Central Asia and the second in the post-Soviet space (after Russia). Since 1 January 2015, the Republic is a member of the Eurasian Economic Union and since 22 June 2015 a member of the World Trade Organization. Kazakhstan's membership in the OSCE, WTO, and the Eurasian economic Union (EEU). In Kazakhstan, there are 11 Special economic zones with different characteristics of activity and 22 Industrial zones. According to the statistics Committee of the Republic of Kazakhstan, there is a smooth annual increase in GDP. Even though Kazakhstan's economy is at a stage of moderate growth Kazakhstan's economy is not diversified and depends on the USD and oil prices.
Relevant country events occurred during fieldwork:	During the fieldwork period there was a turbulent political situation in the country. The country's President, who had been in power for more than 20 years, resigned. This was followed by early elections of the President of the Republic of Kazakhstan, the results of which people were dissatisfied

	<p>with. All this has contributed to the growing concern among the population. After the elections, there was a wave of rallies, which continue periodically.</p> <p>Astana is renamed Nur-Sultan since 23 March 2019, that also caused discontent of the population (waste of money).</p> <p>On 24 June in Arys (45 000 population, 85 km from Shymkent) in the military unit with storage area of 15 hectares (89 storages) there was a fire on the territory of the military unit, and then there were explosions of ammunition. The explosions damaged about 85% of residential buildings, more than 20 houses burned down completely. The explosions shook the whole country and affected the course of life of all country. The business community was actively engaged in providing temporary accommodation and other assistance to the affected population, and in helping to restore houses in Arys.</p>
Other aspects:	No

## A.17 Kosovo

### A.17.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 202 firms from the Kosovo 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of firms from Kosovo Business Registration Agency (KBRA), within Ministry of Trade and Industry, was used. The firms in the listing are all registered as businesses with the same agency.

Regional stratification for the Kosovo ES was done across seven regions: Gjakovës/Đakovički, Pejës/Pečki, Prizrenit/Prizrenski, Gjilanit/Gnjilanski, Mitrovicës/Kosovskomitrovački, Prishtinës/Prištinski and Ferizajit/Uroševački.

Districts of Kosovo	Grouping to be used for stratification purposes in BEEPS VI
District of Ferizaj	Ferizajit/Uroševački
District of Gjakova	Gjakovës/Đakovički
District of Gjilan	Gjilanit/Gnjilanski
District of Mitrovica	Mitrovicës/Kosovskomitrovački
District of Peja/Peć	Pejës/Pečki
District of Pristina	Prishtinës/Prištinski
District of Prizren	Prizrenit/Prizrenski

### Kosovo ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Services	Grand Total
<b>Gjakovës/Đakovički</b>	Small (5-19)	112	265	<b>410</b>
	Medium (20-99)	18	12	
	Large (100 or more)	2	1	
<b>Pejës/Pečki</b>	Small (5-19)	127	223	<b>383</b>
	Medium (20-99)	16	11	
	Large (100 or more)	4	2	
<b>Prizrenit/Prizrenski</b>	Small (5-19)	164	327	<b>557</b>
	Medium (20-99)	21	34	
	Large (100 or more)	7	4	

<b>Gjilanit/Gnjilanski</b>	Small (5-19)	118	260	<b>427</b>
	Medium (20-99)	23	19	
	Large (100 or more)	6	1

### Kosovo Sample Frame (Panel)

		<b>Manufacturing</b>	<b>Services</b>	<b>Grand Total</b>
<b>Gjakovës/Đakovički</b>	Small (5-19)	6	9	<b>18</b>
	Medium (20-99)	3	0	
	Large (100 or more)	0	0	
<b>Pejës/Pečki</b>	Small (5-19)	3	6	<b>14</b>
	Medium (20-99)	2	3	
	Large (100 or more)	0	0	
<b>Prizrenit/Prizrenski</b>	Small (5-19)	5	9	<b>28</b>
	Medium (20-99)	5	7	
	Large (100 or more)	1	1	
<b>Gjilanit/Gnjilanski</b>	Small (5-19)	1	8	<b>21</b>
	Medium (20-99)	6	4	
	Large (100 or more)	2	0	
<b>Mitrovicës/Kosovsko-mitrovački</b>	Small (5-19)	2	10	<b>16</b>
	Medium (20-99)	2	1	
	Large (100 or more)	1	0	
<b>Prishtinës/Prištinski</b>	Small (5-19)	8	36	<b>84</b>
	Medium (20-99)	11	21	
	Large (100 or more)	1	7	
<b>Ferizajit/Uroševački</b>	Small (5-19)	6	7	<b>21</b>
	Medium (20-99)	6	2	
	Large (100 or more)	0	0	
		<b>71</b>	<b>131</b>	<b>202</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		<b>Manufacturing</b>	<b>Services</b>	<b>Grand Total</b>
<b>Gjakovës/Đakovički</b>	Small (5-19)	9	3	<b>21</b>

	Large (100 or more)	1	5	
<b>Ferizajit/Uroševački</b>	Small (5-19)	4	3	<b>12</b>
	Medium (20-99)	3	2	
	Large (100 or more)	0	0	
		<b>50</b>	<b>58</b>	<b>108</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number

of sampled establishments contacted for the survey was 18.5% (252 out of 1364 establishments).<sup>36</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Services	Grand Total
<b>Gjakovës/Đakovički</b>	Small (5-19)	16	15	<b>42</b>
	Medium (20-99)	5	4

		<b>35</b>	<b>43</b>	<b>78</b>

### A.17.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>324</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>312</b>
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	<b>3</b>
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	<b>5</b>
		4. Eligible establishment (Moved and traced)	<b>5</b>
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	<b>0</b>
<b>125</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>125</b>
<b>146</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	<b>14</b>
		616. The firm discontinued businesses - (Establishment went bankrupt)	<b>46</b>
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	<b>3</b>
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	<b>1</b>
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	<b>27</b>
		621. The firm discontinued businesses - (Other)	<b>38</b>
		71. Ineligible legal status: not a business, but private household	<b>0</b>
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	<b>0</b>
<b>106</b>	<b>Out of Target</b>	8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	<b>16</b>
		151. Out of target - outside the covered regions	<b>82</b>
		152. Out of target - moved abroad	<b>0</b>
		153. Out of target - Not registered with Statistical Authority	<b>0</b>
		154. Out of target - establishment is HQ without production or sales of goods or services	<b>0</b>
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	<b>0</b>

		156. Duplicated firm within the sample	24
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
663	Unobtainable	91. No reply after having called in different days of the week and in different business hours	84
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	579
1364	Total contacted		

### Response Outcomes: Kosovo ES 2019

Target and totals	Sample target	270
	Sample target completion rate	100.4%
	Total contacts available in frame	4491
	Total contacts issued	1364
	Total contacts contacted	1364
Screening phase	Screening in process	0
	Eligibles	324
	Screener refusal	125
	Ineligible + out of target	252
	Unobtainable	663
Interview phase (only if eligible)	Complete interviews without extra module	50
	Complete interviews with extra module	221
	Eligible in process + incomplete interviews	0
	Interview refusal	53
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	9.2%
	Ineligible + out of target rate	18.5%
	Unobtainable rate	48.6%
	Interview conversion rate	19.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	3.9%

#### A.17.3. Universe estimates

Universe estimates for the number of establishments in each cell in Kosovo were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Kosovo were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Services	Grand Total
<b>Gjakovës/Đakovički</b>	Small (5-19)	32	64	<b>109</b>
	Medium (20-99)	8	4	
	Large (100 or more)	1	1	
<b>Pejë/Pečki</b>	Small (5-19)	22	32	<b>63</b>
	Medium (20-99)	0	4	
	Large (100 or more)	0	1	
	Medium and Large (20+)	4	0	
<b>Prizrenit/Prizrenski</b>	Small (5-19)	29	49	<b>99</b>
	Medium (20-99)	7	0	
	Large (100 or more)	4	0	
	Medium and Large (20+)	0	10	
<b>Gjilanit/Gnjilanski</b>	Small (5-19)	33	62	<b>114</b>
	Medium (20-99)	10	0	
	Large (100 or more)	2	0	
	Medium and Large (20+)	0	6	
<b>Mitrovicës/Kosovsko-mitrovački</b>	Small (5-19)	14	36	<b>64</b>
	Medium (20-99)	5	7	
	Large (100 or more)	1	1	
<b>Prishtinës/Prištinski</b>	Small (5-19)	36	131	<b>215</b>
	Medium (20-99)	0	29	
	Large (100 or more)	0	7	
	Medium and Large (20+)	12	0	
<b>Ferizajit/Uroševački</b>	Small (5-19)	28	56	<b>106</b>
	Medium (20-99)	9	8	
	Large (100 or more)	3	2	
		<b>260</b>	<b>511</b>	<b>771</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Services	Grand Total
<b>Gjakovës/Đakovički</b>	Small (5-19)	36	79	<b>131</b>
	Medium (20-99)	8	5	
	Large (100 or more)	1	1	

<b>Pejë/Pečki</b>	Small (5-19)	29	47	<b>87</b>
	Medium (20-99)	0	4	
	Large (100 or more)	0	1	
	Medium and Large (20+)	6	0	
<b>Prizrenit/Prizrenski</b>	Small (5-19)	40	73	<b>136</b>
	Medium (20-99)	7	0	
	Large (100 or more)	4	0	
	Medium and Large (20+)	0	12	
<b>Gjilanit/Gnjilanski</b>	Small (5-19)	39	80	<b>141</b>
	Medium (20-99)	11	0	
	Large (100 or more)	2	0	
	Medium and Large (20+)	0	8	
<b>Mitrovicës/Kosovsko-mitrovački</b>	Small (5-19)	20	55	<b>89</b>
	Medium (20-99)	5	7	
	Large (100 or more)	1	1	
<b>Prishtinës/Prištinski</b>	Small (5-19)	57	229	<b>361</b>
	Medium (20-99)	0	47	
	Large (100 or more)	0	14	
	Medium and Large (20+)	15	0	
<b>Ferizajit/Uroševački</b>	Small (5-19)	38	83	<b>149</b>
	Medium (20-99)	10	12	
	Large (100 or more)	4	2	
		<b>333</b>	<b>761</b>	<b>1094</b>

#### Weak Universe Estimates – Fresh:

		<b>Manufacturing</b>	<b>Services</b>	<b>Grand Total</b>
<b>Gjakovës/Đakovički</b>	Small (5-19)	103	244	<b>375</b>
	Medium (20-99)	15	10	
	Large (100 or more)	2	1	
<b>Pejë/Pečki</b>	Small (5-19)	113	201	<b>342</b>
	Medium (20-99)	0	9	
	Large (100 or more)	0	2	
	Medium and Large (20+)	18	0	
<b>Prizrenit/Prizrenski</b>	Small (5-19)	132	264	<b>447</b>
	Medium (20-99)	15	0	
	Large (100 or more)	5	0	
	Medium and Large (20+)	0	30	
<b>Gjilanit/Gnjilanski</b>	Small (5-19)	82	183	<b>299</b>
	Medium (20-99)	15	0	
	Large (100 or more)	5	0	
	Medium and Large (20+)	0	14	
<b>Mitrovicës/Kosovsko-mitrovački</b>	Small (5-19)	63	193	<b>284</b>
	Medium (20-99)	9	14	
	Large (100 or more)	2	2	
<b>Prishtinës/Prištinski</b>	Small (5-19)	244	1055	<b>1512</b>
	Medium (20-99)	0	141	
	Large (100 or more)	0	28	
	Medium and Large (20+)	45	0	
<b>Ferizajit/Uroševački</b>	Small (5-19)	96	226	<b>364</b>

	Medium (20-99)	13	21	
	Large (100 or more)	5	3	
		<b>983</b>	<b>2640</b>	<b>3624</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.17.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.20.<sup>37</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.13.

<sup>37</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Kosovo. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.17.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: Ipsos Kosovo Region: Republic of Kosovo Ipsos Kosovo is registered as a Branch Office of Ipsos Macedonia and part of the Ipsos Adria group. It is a full-service fieldwork agency for market, media research and public opinion polls. Ipsos Adria based its activities on ESOMAR and ISI regulations and guidelines Ipsos Adria has a unique market positioning, specializing in a single business – survey-based research – through five specializations: Advertising research, Marketing research, Media research, Opinion and social research, Quality and customer satisfaction research. Ipsos Adria is the leading MR company in the region Activities since: 2006
Enumerators involved:	Enumerators: 14 Recruiters: 2
Other staff involved:	Data Processing: Ipsos was responsible for all data processing

#### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Kosovo Business Registration Agency
Year:	June 2018
Comments on the quality of sample frame:	The quality of the sample frame was generally good although it did contain some out of date information, including businesses that were no longer in operation, wrong numbers and the number of employees was not always accurate.

#### Sample

Comments/ problems for particular regions:	On regions: No comments
Comments on the response rate:	The response rate was not very good. Some companies refused to participate in the study because of the length of the interview, being too busy and also lack of interest.
Comments on the sample design:	Mostly the sample model worked well. Sampling problems are the ones already mentioned above, like the wrong numbers. But we did not make any changes to the sample.
Other comments:	No

#### Fieldwork

Date of Fieldwork	22 December 2018 to 11 October 2019
Country	The Republic of Kosovo

Number of interviews	270
Problems found during fieldwork:	The interview length meant that many business executives were reluctant to take part and recruiters had to work hard to convince them to participate. And some businesses let us wait too long, scheduling the interview week after week.
Other observations:	The general attitude of the respondents to the survey was quite positive. Even refusals were mostly polite and tactful.

### Questionnaires

Problems for the understanding of questions (indicate question number)	D.2, n2i
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	Comments from interviewers about the length of questionnaires are that about 40% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties and they don't have so much time, etc.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	During fieldwork the situation between Kosovo and Serbia was tense with Kosovo introducing a 100% customs duty on goods from Serbia. Economically it has been the tax that Kosovo has imposed on Serbia. Parliamentary elections in the Republic of Kosovo were also held.
Relevant country events occurred during fieldwork:	The eighteenth "Fair EXPOKOS 2019" fair was held in Pristina, which lasted about 3 days in which numerous businesses participated. Pristina International Fair 2019, organized by the Kosovo Chamber of Commerce in cooperation with the Government. Over 100 businesses were represented and promoted their products at the event.
Other aspects	No

## A.18 Kyrgyz Republic

### A.18.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 270 firms from the Kyrgyz Republic 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the National Statistical Committee of the Kyrgyz Republic was used, dated as of April 2018. The establishments in the listing are all registered as businesses with the Ministry of Justice.

Regional stratification was done across three regions: Bishkek; Chui, Jalalabad, Issyk-Kul; and Talas, Naryn, Osh, Batken.

Official regions	Grouping used for stratification purposes in BEEPS VI
Bishkek city	Bishkek
Chui oblast	Chui, Jalalabad, Issyk-Kul
Jalalabad oblast	
Issyk – Kul oblast	
Osh oblast + Osh city	Talas, Naryn, Osh, Batken
Batken Oblasty	
Talas Oblasty	
Naryn Oblasty	

#### Kyrgyz Republic ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	168	109	606	<b>1193</b>
	Medium (20-99)	79	36	110	
	Large (100 or more)	31	12	42	
<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	144	28	115	<b>505</b>
	Medium (20-99)	104	7	55	
	Large (100 or more)	42	0	10	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	83	30	81	<b>302</b>
	Medium (20-99)	42	9	36	
	Large (100 or more)	13	0	8	
		<b>706</b>	<b>231</b>	<b>1063</b>	<b>2000</b>

Source: World Bank and National Statistical Committee of the Kyrgyz Republic

#### Kyrgyz Republic Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	12	12	23	<b>127</b>
	Medium (20-99)	20	12	24	
	Large (100 or more)	6	2	16	
<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	12	9	14	<b>96</b>
	Medium (20-99)	19	2	26	
	Large (100 or more)	8	0	6	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	8	6	5	<b>47</b>
	Medium (20-99)	8	2	14	
	Large (100 or more)	3	0	1	
		<b>96</b>	<b>45</b>	<b>129</b>	<b>270</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	3	27	20	<b>90</b>
	Medium (20-99)	3	10	3	
	Large (100 or more)	10	4	10	

<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	11	8	3	<b>62</b>
	Medium (20-99)	18	2	4	
	Large (100 or more)	14	0	2	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	11	10	8	<b>61</b>
	Medium (20-99)	14	3	8	
	Large (100 or more)	4	0	3	
		<b>88</b>	<b>64</b>	<b>61</b>	<b>213</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Bishkek</b>	Small (5-19)	2	7	10	<b>50</b>
	Medium (20-99)	2	10	2	
	Large (100 or more)	5	2	10	
<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	9	8	7	<b>58</b>
	Medium (20-99)	10	2	10	
	Large (100 or more)	7	0	5	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	7	5	4	<b>39</b>
	Medium (20-99)	7	2	10	
	Large (100 or more)	3	0	1	
		<b>52</b>	<b>36</b>	<b>59</b>	<b>147</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 24.5% (197 out of 804 establishments).<sup>38</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Bishkek</b>	Small (5-19)	11	33	32	<b>149</b>
	Medium (20-99)	11	16	13

### A.18.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>360</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>330</b>
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	<b>0</b>
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	<b>1</b>
		4. Eligible establishment (Moved and traced)	<b>24</b>
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	<b>5</b>
<b>223</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>223</b>
<b>186</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	<b>10</b>
		616. The firm discontinued businesses - (Establishment went bankrupt)	<b>77</b>
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	<b>22</b>
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	<b>5</b>
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	<b>8</b>
		621. The firm discontinued businesses - (Other)	<b>24</b>
		71. Ineligible legal status: not a business, but private household	<b>18</b>
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	<b>8</b>
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	<b>14</b>
<b>11</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	<b>0</b>
		152. Out of target - moved abroad	<b>0</b>
		153. Out of target - Not registered with Statistical Authority	<b>0</b>
		154. Out of target - establishment is HQ without production or sales of goods or services	<b>0</b>
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	<b>4</b>
		156. Duplicated firm within the sample	<b>6</b>
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	<b>1</b>

24	Unobtainable	91. No reply after having called in different days of the week and in different business hours	2
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	22
804	Total contacted		

### Response Outcomes: Kyrgyz Republic ES 2019

Target and totals	Sample target	360
	Sample target completion rate	100.0%
	Total contacts available in frame	2000
	Total contacts issued	910
	Total contacts contacted	804
Screening phase	Screening in process	0
	Eligibles	360
	Screener refusal	223
	Ineligible + out of target	197
	Unobtainable	24
Interview phase (only if eligible)	Complete interviews without extra module	0
	Complete interviews with extra module	360
	Eligible in process + incomplete interviews	0
	Interview refusal	0
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	27.7%
	Ineligible + out of target rate	24.5%
	Unobtainable rate	3.0%
	Interview conversion rate	44.8%
	Eligible in process + incomplete interviews rate	0.0%
Interview refusal rate	0.0%	

### A.18.3. Universe Estimates

Universe estimates for the number of establishments in each cell in Kyrgyz Republic were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions, Percent Eligible,  
Kyrgyz Republic ES 2019

Universe estimates for the number of establishments in each industry-region-size cell in Kyrgyz Republic were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	64	34	174	<b>387</b>
	Medium (20-99)	30	16	32	
	Large (100 or more)	14	5	18	
<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	74	15	45	<b>241</b>
	Medium (20-99)	54	3	22	
	Large (100 or more)	21	0	8	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	49	18	36	<b>163</b>
	Medium (20-99)	25	4	17	
	Large (100 or more)	10	0	3	
		<b>341</b>	<b>95</b>	<b>356</b>	<b>792</b>

**Median Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	119	77	403	<b>811</b>
	Medium (20-99)	54	25	71	
	Large (100 or more)	23	8	31	
<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	107	21	80	<b>364</b>
	Medium (20-99)	74	5	37	
	Large (100 or more)	33	0	9	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	64	23	59	<b>226</b>
	Medium (20-99)	32	7	25	
	Large (100 or more)	11	0	6	
		<b>517</b>	<b>165</b>	<b>719</b>	<b>1401</b>

**Weak Universe Estimates – Fresh:**

		Manufacturing	Retail	Other Services	Grand Total
<b>Bishkek</b>	Small (5-19)	119	73	404	<b>817</b>
	Medium (20-99)	57	25	75	
	Large (100 or more)	24	9	32	

<b>Chui, Jalalabad, Issyk-Kul</b>	Small (5-19)	113	21	85	<b>394</b>
	Medium (20-99)	83	5	41	
	Large (100 or more)	36	0	9	
<b>Talas, Naryn, Osh, Batken</b>	Small (5-19)	72	25	66	<b>257</b>
	Medium (20-99)	38	7	30	
	Large (100 or more)	12	0	7	
		<b>553</b>	<b>165</b>	<b>749</b>	<b>1467</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### **A.18.4. Non-response**

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.45.<sup>39</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.28.

<sup>39</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Rejection rate and Interviews per Contact, Kyrgyz Republic ES  
2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Kyrgyz Republic. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

#### A.18.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	Name: SIAR research and consulting LLC Region: Kyrgyz Republic Membership of international organizations: SIAR research and consulting LLC is a member of ESOMAR (European Society of Marketing Research Professionals), International Sociological Association, Bishkek Business Club and Kyrgyz National Monitoring and Evaluation Network. Activities since: 1998
Enumerators involved:	Enumerators: 24 Recruiters: 10 (also did work of enumerators)
Other staff involved:	Fieldwork Coordinators: 5 regional supervisors Editing: 1 Data Processing: Ipsos was responsible for all data processing

##### Sample Frame

Characteristic of sample frame used:	Electronic database
Source:	National Statistical Committee of the Kyrgyz Republic
Year:	June 2018
Comments on the quality of sample frame:	The quality of the sample frame was generally satisfactory. However, the sample frame was not fully up-to-date i.e. contained incorrect and old contact information, closed and not operating enterprises, the number of employees was indicated incorrectly.

##### Sample

Comments/ problems for particular regions:	On regions: There were no major problems in arranging and conducting interviews in specific regions. However, enumerators faced
--	--

	difficulties with transportation. In particular, going to remote villages in the southern part of the country was challenging as public transportation is not available.
Comments on the response rate:	Overall, 804 enterprises were contacted, of which 28% refused to participate in the survey while 27% were found ineligible. Response rate for Kyrgyz Republic is statistically valid and considered as good one for Kyrgyz Republic.
Comments on the sample design:	The only comment for sample design for Kyrgyzstan is to take into consideration that large companies are usually joint stock companies and to participate in such a research project, permission and consent needs to be obtained from each stockowner. Not many of them give consent and permission, which makes it difficult to reach the needed number of large company participants in the survey.
Other comments:	No other comments.

### Fieldwork

Date of Fieldwork	11 December 2018 to 5 July 2019
Country	Kyrgyz Republic
Number of interviews	360
Problems found during fieldwork:	As described above, the sample frame was not fully up-to-date i.e. it contained incorrect and old contact information, closed and not operating enterprises, the number of employees was indicated incorrectly. According to respondents and potential respondents, the main interview was considered too long which made it hard for recruiters to convince executives to take part. Some of the enterprises, especially joint stock companies, refused to participate or give information on finances due to company privacy policies (see above). Some managers also indicated that they were not allowed to participate in surveys concerning the activities of the enterprise, citing the terms of their employment contract which included a clause on trade secrets.
Other observations:	Many executives expressed interest in future partnerships with EBRD, EIB and WBG.

### Questionnaires

Problems for the understanding of questions (indicate question number)	No major problems occurred in comprehension of the questions.
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	About 40% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

## Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	During the fieldwork period the general political and economic situation was fairly calm in the Kyrgyz Republic. In the World Bank's 'Doing Business 2019 rating' Kyrgyz Republic has the 70th position among 190 countries.
Relevant country events occurred during fieldwork:	The following events occurred during fieldwork which would have been noted in the business community: A statement announcing that Chinese businessmen would replace Dordoi's marketers was made at the meeting of the President with businessmen by the chairman of the Dordoi trade union. The State Service for Combating Economic Crimes (SESEC, Finpol) inspected the property of former Deputy Chairman of the State Customs Service Raiymbek Matraimov in Kyrgyzstan. A rise in gasoline and diesel fuel prices took place in Kyrgyzstan. The rise in price was due to the growth of wholesale prices at Russian refineries. In Bishkek, a number of activists were rallying in Ala-Too Square. Protesters opposed the Chinese expansion in the Kyrgyz Republic and demanded a moratorium on the granting of Kyrgyz citizenship to Chinese representatives. The action gathered about 100 people. Prime Minister of the Kyrgyz Republic signed an order according to which under the legislative regulation in pursuance of the resolution of the Kyrgyz Republic "On the measures to ensure radiation safety of the population of the Kyrgyz Republic" it is prohibited to carry out works on the licensed areas provided for the purposes of geological study and development of radioactive elements (uranium). Actions of the Kazakh authorities to check cargoes from Kyrgyzstan were reported to cause significant damage to domestic entrepreneurs and reduce trade turnover.
Other aspects:	No

## A.19 Latvia

### A.19.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 336 firms from the Latvia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Business Register of CSB was used.

Regional stratification for the Latvia ES was done across three regions: Riga & Pieriga, Kurzeme & Zemgale and Vidzeme & Latgale.

Regions of Latvia	Grouping to be used for stratification purposes in BEEPS VI
Riga	Riga & Pieriga
Pieriga	
Kurzeme	Kurzeme & Zemgale
Zemgale	
Vidzeme	Vidzeme & Latgale

Latgale	
---------	--

### Latvia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
Riga & Pieriga	Small (5-19)	1308	1988	6463	12274

#### Original Sample Design (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Riga & Pieriga	Small (5-9)	4	4	6	47
	Medium (10-49)	4	4	10	

	Large (100 or more)	6	2	7	
<b>Kurzeme &amp; Zemgale</b>	Small (5-9)	9	18	10	<b>58</b>
	Medium (10-49)	11	2	4	
	Large (100 or more)	2	1	1	
<b>Vidzeme &amp; Latgale</b>	Small (5-9)	11	14	14	<b>55</b>
	Medium (10-49)	3	4	3	
	Large (100 or more)	3	1	2	
		<b>53</b>	<b>50</b>	<b>57</b>	<b>160</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 17.3% (426 out of 2462 establishments)<sup>40</sup>.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Riga &amp; Pieriga</b>	Small (5-19)	11	11	20	<b>122</b>
	Medium (20-99)	10	10	8	
	Large (100 or more)	20	5	27	
<b>Kurzeme &amp; Zemgale</b>	Small (5-19)	12	23	12	<b>120</b>
	Medium (20-99)	17	25	16	
	Large (100 or more)	8	4	3	
<b>Vidzeme &amp; Latgale</b>	Small (5-19)	13	21	15	<b>117</b>
	Medium (20-99)	18	18	17	
	Large (100 or more)	10	2	3	
		<b>119</b>	<b>119</b>	<b>121</b>	<b>359</b>

#### Achieved Interviews (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Riga &amp; Pieriga</b>	Small (5-19)	4	6	9	<b>43</b>
	Medium (20-99)	6	5	4	
	Large (100 or more)	4	1	4	
<b>Kurzeme &amp; Zemgale</b>	Small (5-19)	2	3	3	<b>19</b>
	Medium (20-99)	4	3	3	
	Large (100 or more)	0	1	0	
<b>Vidzeme &amp; Latgale</b>	Small (5-19)	6	7	5	<b>28</b>
	Medium (20-99)	2	4	1	
	Large (100 or more)	1	1	1	
		<b>29</b>	<b>31</b>	<b>30</b>	<b>90</b>

#### A.19.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>448</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>433</b>

<sup>40</sup> Based on out of target and ineligible contacts

		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	3
		4. Eligible establishment (Moved and traced)	6
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	6
<b>1400</b>	<b> Screener refusal</b>	13. Refuses to answer the screener	1400
<b>340</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	29
		616. The firm discontinued businesses - (Establishment went bankrupt)	48
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	6
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	16
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	102
		621. The firm discontinued businesses - (Other)	24
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	108
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	7
<b>86</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	1
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	4
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	6
		156. Duplicated firm within the sample	24
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	51
<b>188</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	136
		92. Line out of order	2
		93. No tone	1
		94. Phone number does not exist	36
		10. Answering machine	1
		11. Fax line- data line	1
		12. Wrong address/ moved away and could not get the new references	11
<b>2462</b>	<b>Total contacted</b>		

#### Response Outcomes: Latvia ES 2019

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	99.7%
	Total contacts available in frame	3106
	Total contacts issued	2588

	Total contacts contacted	2462
<b>Screening phase</b>	Screening in process	0
	Eligibles	448
	Screener refusal	1400
	Ineligible + out of target	426
	Unobtainable	188
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	1
	Complete interviews with extra module	358
	Eligible in process + incomplete interviews	29
	Interview refusal	58
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	56.9%
	Ineligible + out of target rate	17.3%
	Unobtainable rate	7.6%
	Interview conversion rate	14.6%
	Eligible in process + incomplete interviews rate	1.2%
	Interview refusal rate	2.4%

### A.19.3. Universe estimates

Universe estimates for the number of establishments in each cell in Latvia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Latvia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Riga &amp; Pieriga</b>	Small (5-19)	160	167	571	<b>1311</b>
	Medium (20-99)	95	47	217	
	Large (100 or more)	21	5	27	
<b>Kurzeme &amp; Zemgale</b>	Small (5-19)	69	80	158	<b>490</b>
	Medium (20-99)	77	25	59	
	Large (100 or more)	13	4	4	
<b>Vidzeme &amp; Latgale</b>	Small (5-19)	65	75	132	<b>413</b>

	Medium (20-99)	59	19	46	
	Large (100 or more)	11	2	3	
		<b>571</b>	<b>426</b>	<b>1217</b>	<b>2214</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Riga &amp; Pieriga</b>	Small (5-19)	942	1598	4112	<b>8564</b>
	Medium (20-99)	365	296	1025	
	Large (100 or more)	77	33	115	
<b>Kurzeme &amp; Zemgale</b>	Small (5-19)	344	653	971	<b>2624</b>
	Medium (20-99)	253	102	237	
	Large (100 or more)	43	6	15	
<b>Vidzeme &amp; Latgale</b>	Small (5-19)	315	595	784	<b>2212</b>
	Medium (20-99)	189	97	180	
	Large (100 or more)	35	4	13	
		<b>2563</b>	<b>3384</b>	<b>7453</b>	<b>13400</b>

#### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Riga &amp; Pieriga</b>	Small (5-19)	1097	1733	4793	<b>9731</b>
	Medium (20-99)	407	308	1144	
	Large (100 or more)	86	35	128	
<b>Kurzeme &amp; Zemgale</b>	Small (5-19)	398	704	1125	<b>2946</b>
	Medium (20-99)	280	105	263	
	Large (100 or more)	47	6	17	
<b>Vidzeme &amp; Latgale</b>	Small (5-19)	360	634	899	<b>2453</b>
	Medium (20-99)	207	99	198	
	Large (100 or more)	39	4	14	
		<b>2922</b>	<b>3628</b>	<b>8581</b>	<b>15131</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.19.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.15.<sup>41</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.59.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Latvia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.20 Lebanon

### A.20.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 561 firms from the Lebanon 2013 ES was used and for fresh firms (i.e., firms not covered in 2013), lists of firms from the local Chambers of Commerce were compiled and used.

Regional stratification was done across five regions: Beirut, Bekaa Valley & North Lebanon, Mount Lebanon, Nabatieh and South Lebanon.

Governorates of Lebanon	Grouping used for stratification purposes in BEEPS VI
Beirut	Beirut
Bekaa	Bekaa Valley & North Lebanon

<sup>41</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

North Lebanon	
Mount Lebanon	Mount Lebanon
Nabatiyeh	Nabatieh
South Lebanon	South Lebanon
Akkar	Not covered
Baalbeck-Hermel	Not covered

#### Lebanon ES Sample Frame (Fresh and Panel Combined)

		Food	Other Manufacturing	Wholesale and Retail	Other Services	Grand Total
<b>Beirut</b>	Small (5-19)	16	63	588	362	<b>1680</b>

Source: World Bank and Lebanon Chambers of Commerce.

#### Lebanon Sample Frame (Panel)

		Food	Other Manufacturing	Wholesale and Retail	Other Services	Grand Total
<b>Beirut</b>	Small (5-19)	4	16	20	12	<b>123</b>
	Medium (20-99)	6	12	21	9	
	Large (100 or more)	2	7	7	7	
<b>Bekaa Valley &amp; North Lebanon</b>	Small (5-19)	14	17	31	12	<b>162</b>
	Medium (20-99)	18	18	22	17	
	Large (100 or more)	3	3	6	1	
<b>Mount Lebanon</b>	Small (5-19)	3	15	20	17	<b>139</b>
	Medium (20-99)	7	14	14	7	
	Large (100 or more)	11	18	9	4	
<b>Nabatieh</b>	Small (5-19)	4	6	12	5	<b>39</b>
	Medium (20-99)	3	3	3	1	
	Large (100 or more)	1	0	1	0	
<b>South Lebanon</b>	Small (5-19)	7	10	27	12	<b>98</b>
	Medium (20-99)	6	9	13	4	
	Large (100 or more)	0	2	7	1	
		<b>89</b>	<b>150</b>	<b>213</b>	<b>109</b>	<b>561</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		Food	Other Manufacturing	Wholesale and Retail	Other Services	Grand Total
<b>Beirut</b>	Small (5-19)	6	2	6	4	<b>66</b>

	Unknown	0	0	0	0	
		<b>71</b>	<b>47</b>	<b>72</b>	<b>60</b>	<b>250</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 11.8% (188 out of 1597 establishments).<sup>42</sup>

For the Lebanon 2019 ES, the survey was plagued by political turmoil, strikes, riots, and road closures (particularly in and around Beirut) from September 2019 to March 2020; further, fieldwork ended because of shutdowns due to the COVID-19 outbreak.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Food	Other Manufacturing	Wholesale and Retail	Other Services	Grand Total
<b>Beirut</b>	Small (5-19)	4	7	0	0	<b>80</b>

	Ineligible + out of target rate	11.8%
	Unobtainable rate	26.2%
	Interview conversion rate	33.3%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.4%

### A.20.3. Universe estimates

Universe estimates for the number of establishments in each cell in Lebanon were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Lebanon were produced for the strict, weak and median eligibility definitions. Tables below shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Food	Other Manufacturing	Wholesale and Retail	Other Services	Grand Total
<b>Beirut</b>	Small (5-19)	4	75	0	0	<b>502</b>
	Medium (20-99)	4	61	106	59	
	Large (100 or more)	2	5	11	11	
	Small and Unknown	0	0	86	76	
<b>Bekaa Valley &amp; North Lebanon</b>	Small (5-19)	14	27	56	30	<b>301</b>
	Medium (20-99)	23	23	20	20	
	Large (100 or more)	2	2	6	2	
	Unknown	0	8	67	1

	Unknown	0	11	46	9	
<b>Nabatieh</b>	Small (5-19)	4	0	14	0	<b>1073</b>
	Medium (20-99)	0	0	3	2	
	Large (100 or more)	0	0	2	0	
	Unknown	0	107	922	0	
	Medium and Large (20+)	3	0	0	0	
	Small and Medium (5-99)	0	5	0	0	
	Small and Unknown	0	0	0	11	
<b>South Lebanon</b>	Small (5-19)	7	11	50	20	<b>1820</b>
	Medium (20-99)	0	9	12	8	
	Large (100 or more)	0	2	6	4	
	Unknown	0	255	1416	11	
	Medium and Large (20+)	8	0	0	0	
		<b>236</b>	<b>1492</b>	<b>5614</b>	<b>1548</b>	<b>8889</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.20.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

Sales Non-response Rates Lebanon ES, 2019

As the following graph shows, the number of interviews per contacted establishments was 0.33.<sup>43</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.29.

Rejection rate and Interviews per Contact Lebanon ES, 2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames

<sup>43</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

are not unique to Lebanon. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.21 Lithuania

### A.21.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 270 firms from the Lithuania 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of firms from JSC - Creditreform Lietuva was used.

Regional stratification for the Lithuania ES was done across three regions: Vilnius county, Kaunas & Klaipeda counties and the Rest of the Country comprising Marijampolė County, Panevėžys County, Šiauliai County, Tauragė County, Telšiai County and Utena County.

NUTS Regions of Lithuania	Grouping to be used for stratification purposes in BEEPS VI
Vilnius County	Vilnius
Kaunas County	Kaunas & Klaipeda
Klaipėda County	
Marijampolė County	Rest of the country
Panevėžys County	
Šiauliai County	
Tauragė County	
Telšiai County	
Utena County	
Alytus County	

### Lithuania ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
Vilnius	Small (5-19)	779	726	4364	8027
	Medium (20-99)	386	152	1260	
	Large (100 or more)	107	53	200	
Kaunas & Klaipeda	Small (5-19)	926	791	3847	7619
	Medium (20-99)	491	134	1077	
	Large (100 or more)	168	28	157	
Rest of the Country	Small (5-19)	872	924	3009	6560
	Medium (20-99)	468	151	857	
	Large (100 or more)	168	29	82	
		<b>4365</b>	<b>2988</b>	<b>14853</b>	<b>22206</b>

Source: World Bank and JSC - Creditreform Lietuva

### Lithuania ES Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Vilnius	Small (5-19)	13	18	25	88
	Medium (20-99)	7	6	8	
	Large (100 or more)	4	4	3	
Kaunas & Klaipeda	Small (5-19)	11	11	12	67
	Medium (20-99)	14	3	8	
	Large (100 or more)	5	2	1	

<b>Rest of the Country</b>	Small (5-19)	20	23	22	<b>115</b>
	Medium (20-99)	14	10	13	
	Large (100 or more)	10	1	2	
		<b>98</b>	<b>78</b>	<b>94</b>	<b>270</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Vilnius</b>	Small (5-19)	5	5	24	<b>87</b>
	Medium (20-99)	9	8	6	
	Large (100 or more)	13	14	3	
<b>Kaunas &amp; Klaipeda</b>	Small (5-19)	6	6	22	<b>81</b>
	Medium (20-99)	5	11	6	
	Large (100 or more)	13	9	3	
<b>Rest of the Country</b>	Small (5-19)	5	9	18	<b>67</b>
	Medium (20-99)	4	5	5	
	Large (100 or more)	8	10	3	
		<b>68</b>	<b>77</b>	<b>90</b>	<b>235</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Vilnius</b>	Small (5-19)	2	5	2	<b>33</b>
	Medium (20-99)	5	5	6	
	Large (100 or more)	3	3	2	
<b>Kaunas &amp; Klaipeda</b>	Small (5-19)	4	7	2	<b>39</b>
	Medium (20-99)	11	2	6	
	Large (100 or more)	4	2	1	
<b>Rest of the Country</b>	Small (5-19)	4	10	2	<b>53</b>
	Medium (20-99)	11	8	7	
	Large (100 or more)	8	1	2	
		<b>52</b>	<b>43</b>	<b>30</b>	<b>125</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 6.9% (128 out of 1868 establishments).<sup>44</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Archived Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Vilnius</b>	Small (5-19)	9	14	29	<b>111</b>

<sup>44</sup> Based on out of target and ineligible contacts.

	Medium (20-99)	12	15	8

	Total contacts issued	2237
	Total contacts contacted	1868
<b>Screening phase</b>	Screening in process	0
	Eligibles	717
	Screener refusal	939
	Ineligible + out of target	128
	Unobtainable	84
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	358
	Eligible in process + incomplete interviews	0
	Interview refusal	359
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	50.3%
	Ineligible + out of target rate	6.9%
	Unobtainable rate	4.5%
	Interview conversion rate	19.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	19.2%

#### A.21.3. Universe estimates

Universe estimates for the number of establishments in each cell in Lithuania were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Lithuania were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh

		Manufacturing	Retail	Other Services	Grand Total
<b>Vilnius</b>	Small (5-19)	274	280	1423	<b>2809</b>
	Medium (20-99)	154	68	477	
	Large (100 or more)	45	20	67	
<b>Kaunas &amp; Klaipeda</b>	Small (5-19)	410	429	1597	<b>3478</b>
	Medium (20-99)	260	99	513	
	Large (100 or more)	87	18	67	
<b>Rest of the Country</b>	Small (5-19)	404	601	1375	<b>3379</b>
	Medium (20-99)	265	131	448	
	Large (100 or more)	94	17	43	
		<b>1993</b>	<b>1663</b>	<b>6010</b>	<b>9666</b>

#### Median Universe Estimates – Fresh

		Manufacturing	Retail	Other Services	Grand Total
<b>Vilnius</b>	Small (5-19)	812	918	4357	<b>8171</b>
	Medium (20-99)	377	184	1212	
	Large (100 or more)	103	50	158	
<b>Kaunas &amp; Klaipeda</b>	Small (5-19)	885	1025	3568	<b>7381</b>
	Medium (20-99)	465	197	950	
	Large (100 or more)	144	32	115	
<b>Rest of the Country</b>	Small (5-19)	895	1472	3149	<b>7387</b>
	Medium (20-99)	487	267	850	
	Large (100 or more)	159	32	76	
		<b>4327</b>	<b>4177</b>	<b>14435</b>	<b>22939</b>

#### Weak Universe Estimates – Fresh

		Manufacturing	Retail	Other Services	Grand Total
<b>Vilnius</b>	Small (5-19)	846	945	4574	<b>8489</b>
	Medium (20-99)	381	184	1233	
	Large (100 or more)	108	52	166	
	Small (5-19)	993	1137	4037	<b>8256</b>

<b>Kaunas &amp; Klaipeda</b>	Medium (20-99)	506	211	1042	
	Large (100 or more)	162	36	131	
<b>Rest of the Country</b>	Small (5-19)	944	1534	3347	<b>7751</b>
	Medium (20-99)	498	270	876	
	Large (100 or more)	169	33	81	
		<b>4606</b>	<b>4402</b>	<b>15488</b>	<b>24496</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### **A.21.4. Non-Response**

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.19.<sup>45</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.70.

<sup>45</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Lithuania. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.22 Malta

### A.22.1. Sampling structure and implementation

The sample frame consisted of listings of firms from Misco Malta internal list enriched with information from Business Registrar.

There was no regional stratification in the Malta ES 2019.

#### Malta ES Sample Frame

		Manufacturing	Services	Grand Total
Malta	Small (5-9)	129	1069	2765
	Medium (10-49)	190	849	
	Large (50-249)	66	290	
	Very Large (250 or more)	14	158	
		399	2366	2765

Source: Misco Malta

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Services	Grand Total
Malta	Small (5-9)	44	39	240
	Medium (10-49)	48	29	
	Large (50-249)	23	27	
	Very Large (250 or more)	5	25	
		120	120	240

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual

observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 28.6% (524 out of 1829 establishments).<sup>46</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews

		Manufacturing	Services	Grand Total
<b>Malta</b>	Small (5-9)	13	50	<b>244</b>
	Medium (10-49)	56	58	
	Large (50-249)	13	41	
	Very Large (250 or more)	5	8	
		<b>87</b>	<b>158</b>	<b>244</b>

#### A.22.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>248</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	246
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0

<b>490</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	490
<b>222</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	157
		616. The firm discontinued businesses - (Establishment went bankrupt)	0
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	2
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	7
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	7
		621. The firm discontinued businesses - (Other)	38
		71. Ineligible legal status: not a business, but private household	2
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	2
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	7
<b>302</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	122
		152. Out of target - moved abroad	1
		153. Out of target - Not registered with Statistical Authority	1
		154. Out of target - establishment is HQ without production or sales of goods or services	41
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	15

<sup>46</sup> Based on out of target and ineligible contacts.

		156. Duplicated firm within the sample	94
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	28
<b>567</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	157
		92. Line out of order	1
		93. No tone	5
		94. Phone number does not exist	228
		10. Answering machine	6
		11. Fax line- data line	15
		12. Wrong address/ moved away and could not get the new references	155
<b>1829</b>	<b>Total contacted</b>		

### Response Outcomes: Malta ES 2019

<b>Target and totals</b>	Sample target	240
	Sample target completion rate	101.7%
	Total contacts available in frame	2765
	Total contacts issued	1829
	Total contacts contacted	1829
<b>Screening phase</b>	Screening in process	0
	Eligibles	248
	Screener refusal	490
	Ineligible + out of target	524
	Unobtainable	567
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	244
	Eligible in process + incomplete interviews	0
	Interview refusal	4
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	26.8%
	Ineligible + out of target rate	28.6%
	Unobtainable rate	31.0%
	Interview conversion rate	13.3%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.2%

### A.22.3. Universe estimates

Universe estimates for the number of establishments in each cell in Malta were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Malta were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Services	Grand Total
<b>Malta</b>	Small (5-9)	19	75	<b>373</b>
	Medium (10-49)	65	140	
	Large (50-249)	17	41	
	Very Large (250 or more)	5	11	
		<b>106</b>	<b>267</b>	<b>373</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Services	Grand Total
<b>Malta</b>	Small (5-9)	59	331	<b>1137</b>
	Medium (10-49)	135	409	
	Large (50-249)	41	123	
	Very Large (250 or more)	5	35	
		<b>240</b>	<b>898</b>	<b>1137</b>

#### Weak Universe Estimates – Fresh:

		Manufacturing	Services	Grand Total
<b>Malta</b>	Small (5-9)	98	702	<b>1986</b>
	Medium (10-49)	174	672	
	Large (50-249)	53	203	
	Very Large (250 or more)	8	76	
		<b>333</b>	<b>1653</b>	<b>1986</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.22.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.13.<sup>47</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.27.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Malta. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>47</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.23 Moldova

### A.23.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Moldova 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of firms from the National Bureau of Statistics of the Republic of Moldova was used.

Regional stratification was done across three regions: North, Center and South.

Grouping used for stratification purposes in BEEPS VI (municipalities in brackets)	
<b>North</b>	(municipality Balti, raionuls Briceni, Donduseni, Drochia, Edinet, Falesti, Floresti, Glodeni, Rezina, Riscani, Singerei, Ocnita, Soroaca, Soldanesti)
<b>Center</b>	(municipality Chisinau, raionuls Anenii Noi, Causeni, Calarasi, Criuleni, Hincesti, Ialoveni, Leova, Nisporeni, Orhei, Straseni, Ungheni, Telenesti)
<b>South</b>	(republica Gaugazia, municipality Comrat, raionuls Cahul, Cantemir, Cimislia, Taraclia, Bender, Tiraspol, raionuls Basarabeasca, Dubasari, Stefan Voda)

#### Moldova ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	175	448	610	<b>1626</b>
	Medium (20-99)	84	76	159	
	Large (100 or more)	48	5	21	
<b>Center</b>	Small (5-19)	858	1300	3568	<b>7602</b>
	Medium (20-99)	388	218	931	
	Large (100 or more)	142	51	146	
<b>South</b>	Small (5-19)	115	265	285	<b>861</b>
	Medium (20-99)	59	47	62	
	Large (100 or more)	18	2	8	
		<b>1887</b>	<b>2412</b>	<b>5790</b>	<b>10089</b>

Source: World Bank and National Bureau of Statistics of the Republic of Moldova

#### Moldova Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	11	17	20	<b>78</b>
	Medium (20-99)	6	9	10	
	Large (100 or more)	4	1	0	
<b>Center</b>	Small (5-19)	32	53	34	<b>211</b>
	Medium (20-99)	24	14	28	
	Large (100 or more)	11	7	8	
<b>South</b>	Small (5-19)	11	24	11	<b>71</b>
	Medium (20-99)	5	8	9	
	Large (100 or more)	2	0	1	
		<b>106</b>	<b>133</b>	<b>121</b>	<b>360</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total

<b>North</b>	Small (5-19)	2	3	5	<b>59</b>
	Medium (20-99)	6	6	2	
	Large (100 or more)	22	2	11	
<b>Center</b>	Small (5-19)	6	9	24	<b>68</b>
	Medium (20-99)	3	2	7	
	Large (100 or more)	6	9	2	
<b>South</b>	Small (5-19)	2	2	2	<b>53</b>
	Medium (20-99)	14	15	5	
	Large (100 or more)	8	1	4	
		<b>69</b>	<b>49</b>	<b>62</b>	<b>180</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>North</b>	Small (5-19)	4	11	8	<b>44</b>
	Medium (20-99)	4	7	6	
	Large (100 or more)	3	1	0	
<b>Center</b>	Small (5-19)	12	20	13	<b>89</b>
	Medium (20-99)	9	6	11	
	Large (100 or more)	7	5	6	
<b>South</b>	Small (5-19)	6	15	6	<b>47</b>
	Medium (20-99)	4	6	7	
	Large (100 or more)	2	0	1	
		<b>51</b>	<b>71</b>	<b>58</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 15.4% (136 out of 882 establishments).<sup>48</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>North</b>	Small (5-19)	5	7	14	<b>103</b>
	Medium (20-99)	19	14	12	
	Large (100 or more)	21	1	10	
<b>Center</b>	Small (5-19)	14	33	37	<b>157</b>
	Medium (20-99)	11	11	20	
	Large (100 or more)	11	13	7	
<b>South</b>	Small (5-19)	7	21	7	<b>100</b>
	Medium (20-99)	20	0	7	
	Large (100 or more)	12	0	6	
	Medium and Large (20+)	0	20	0	
		<b>120</b>	<b>120</b>	<b>120</b>	<b>360</b>

#### Achieved Interviews (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>North</b>	Small (5-19)	3	1	7	<b>23</b>
	Medium (20-99)	3	3	5	

<sup>48</sup> Based on out of target and ineligible contacts.

	Large (100 or more)	1	0	0	
<b>Center</b>	Small (5-19)	7	25	13	<b>82</b>
	Medium (20-99)	6	5	12	
	Large (100 or more)	5	4	5	
<b>South</b>	Small (5-19)	5	12	5	<b>37</b>
	Medium (20-99)	5	0	4	
	Large (100 or more)	2	0	0	
	Medium and Large (20+)	0	4	0	
		<b>37</b>	<b>54</b>	<b>51</b>	<b>142</b>

### A.23.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>0</b>
<b>360</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	<b>336</b>
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	<b>0</b>
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	<b>0</b>
		4. Eligible establishment (Moved and traced)	<b>1</b>
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	<b>23</b>
<b>202</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>202</b>
<b>131</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	<b>8</b>
		616. The firm discontinued businesses - (Establishment went bankrupt)	<b>77</b>
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	<b>1</b>
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	<b>1</b>
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	<b>1</b>
		621. The firm discontinued businesses - (Other)	<b>0</b>
		71. Ineligible legal status: not a business, but private household	<b>0</b>
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	<b>31</b>
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	<b>12</b>
<b>6</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	<b>0</b>
		152. Out of target - moved abroad	<b>0</b>
		153. Out of target - Not registered with Statistical Authority	<b>0</b>
		154. Out of target - establishment is HQ without production or sales of goods or services	<b>0</b>
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	<b>5</b>
		156. Duplicated firm within the sample	<b>1</b>
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	<b>0</b>
<b>189</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	<b>100</b>
		92. Line out of order	<b>19</b>
		93. No tone	<b>8</b>

		94. Phone number does not exist	39
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	23
<b>888</b>	<b>Total contacted</b>		

### Response Outcomes: Moldova ES 2019

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	100.0%
	Total contacts available in frame	10089
	Total contacts issued	1054
	Total contacts contacted	888
<b>Screening phase</b>	Screening in process	0
	Eligibles	360
	Screener refusal	202
	Ineligible + out of target	137
	Unobtainable	189
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	360
	Eligible in process + incomplete interviews	0
	Interview refusal	0
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	22.7%
	Ineligible + out of target rate	15.4%
	Unobtainable rate	21.3%
	Interview conversion rate	40.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.0%

### A.23.3. Universe estimates

Universe estimates for the number of establishments in each cell in Moldova were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Moldova were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	70	132	233	<b>606</b>
	Medium (20-99)	38	25	69	
	Large (100 or more)	26	2	11	
<b>Center</b>	Small (5-19)	319	353	1258	<b>2690</b>
	Medium (20-99)	163	67	372	
	Large (100 or more)	71	19	69	
<b>South</b>	Small (5-19)	56	94	132	<b>386</b>
	Medium (20-99)	33	0	32	
	Large (100 or more)	12	0	6	
	Medium and Large (20+)	0	20	0	
		<b>789</b>	<b>711</b>	<b>2181</b>	<b>3682</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	109	233	350	<b>939</b>
	Medium (20-99)	54	41	94	
	Large (100 or more)	39	3	16	
<b>Center</b>	Small (5-19)	608	768	2331	<b>5046</b>
	Medium (20-99)	284	133	628	
	Large (100 or more)	131	39	124	
<b>South</b>	Small (5-19)	79	151	180	<b>543</b>
	Medium (20-99)	42	0	40	
	Large (100 or more)	16	0	7	
	Medium and Large (20+)	0	29	0	
		<b>1362</b>	<b>1396</b>	<b>3770</b>	<b>6529</b>

#### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	163	356	540	<b>1428</b>
	Medium (20-99)	82	63	148	
	Large (100 or more)	50	4	21	
<b>Center</b>	Small (5-19)	784	1012	3094	<b>6617</b>
	Medium (20-99)	372	178	847	
	Large (100 or more)	145	44	141	
<b>South</b>	Small (5-19)	98	192	230	<b>677</b>
	Medium (20-99)	53	0	52	
	Large (100 or more)	17	0	7	
	Medium and Large (20+)	0	29	0	
		<b>1764</b>	<b>1878</b>	<b>5080</b>	<b>8722</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.23.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.41.<sup>49</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.23.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Moldova. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>49</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.24 Mongolia

### A.24.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the Mongolia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the Business Register of the National Statistical Office of Mongolia was used, dated the first quarter of 2018. The establishments in the listing are all registered as businesses with the State Registration Office, under the General Department of State Taxation.

Regional stratification for the Mongolia ES was done across five regions:

- Central Mongolia – comprising Darkhan-Uul, Dornogovi, Dundgovi, Govisumber, Ömnögovi, Selenge, and Töv
- Ulaanbaatar
- East Mongolia – comprising Dornod, Khentii, Sükhbaatar
- Khangai – comprising Arkhangai, Bayankhongor, Bulgan, Khövsgöl, Orkhon, Övörkhangai
- West Mongolia. – comprising Bayan-Ölgii, Govi-Altai, Khovd, Uvs, Zavkhan

For the purposes of achieving representativeness of the sample, the ES indicators are calculated with some regions combined. Specifically, Central and East Mongolia are combined into one region called East Mongolia, so are Khangai and West Mongolia to form West Mongolia.

Regions	Grouping used for stratification purposes in BEEPS VI (aimags in brackets)
Central (incl. Ulaanbaatar)	<b>Central Mongolia</b> (Darkhan-Uul, Dornogovi, Dundgovi, Govisumber, Ömnögovi, Selenge, and Töv)
	<b>Ulaanbaatar</b>
East	<b>East Mongolia</b> (Dornod, Khentii, Sükhbaatar)
Khangai	<b>Khangai</b> (Arkhangai, Bayankhongor, Bulgan, Khövsgöl, Orkhon, Övörkhangai)
West	<b>West Mongolia</b> (Bayan-Ölgii, Govi-Altai, Khovd, Uvs, Zavkhan)

#### Mongolia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Central Mongolia</b>	Small (5-19)	123	158	110	<b>561</b>
	Medium (20-99)	37	15	104	
	Large (100 or more)	6	0	8	
<b>Ulaanbaatar</b>	Small (5-19)	122	132	444	<b>1659</b>
	Medium (20-99)	245	136	149	
	Large (100 or more)	79	44	308	
<b>East Mongolia</b>	Small (5-19)	51	54	79	<b>243</b>

	Medium (20-99)	3	6	3	
	Large (100 or more)	3	1	7	
West Mongolia	Small (5-19)	3	3	3	26
	Medium (20-99)	4	5	3	
	Large (100 or more)	1	0	4	
		61	53	66	180

#### Original Sample Design (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Central Mongolia	Small (5-19)	5	10	8	44
	Medium (20-99)	6	4	9	
	Large (100 or more)	1	0	1	
Ulaanbaatar	Small (5-19)	2	4	13	69
	Medium (20-99)	8	13	6	
	Large (100 or more)	7	3	13	
East Mongolia	Small (5-19)	2	2	1	10
	Medium (20-99)	2	0	2	

	Large (100 or more)	1	0	0	
<b>Khangai</b>	Small (5-19)	5	8	2	<b>34</b>
	Medium (20-99)	7	5	6	
	Large (100 or more)	0	0	1	
<b>West Mongolia</b>	Small (5-19)	6	7	2	<b>23</b>
	Medium (20-99)	2	1	4	
	Large (100 or more)	0	0	1	
		<b>54</b>	<b>57</b>	<b>69</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 25.5% (181 out of 709 establishments).<sup>50</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Central Mongolia</b>	Small (5-19)	8	18	10	<b>81</b>
	Medium (20-99)	17	11	11	
	Large (100 or more)	3	0	3	
<b>Ulaanbaatar</b>	Small (5-19)	6	7	25	<b>133</b>

#### A.24.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>376</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	332
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	6
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	5
		4. Eligible establishment (Moved and traced)	27
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	6
<b>101</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	101
<b>166</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	18
		616. The firm discontinued businesses - (Establishment went bankrupt)	51
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	5
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	7
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	10
		621. The firm discontinued businesses - (Other)	9
		71. Ineligible legal status: not a business, but private household	38
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	17
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	11
<b>15</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	1
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	8
		156. Duplicated firm within the sample	2
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	4
<b>51</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	10
		92. Line out of order	0
		93. No tone	0

		94. Phone number does not exist	1
		10. Answering machine	1
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	39
<b>709</b>	<b>Total contacted</b>		

### Response Outcomes: Mongolia ES 2019

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	100.0%
	Total contacts available in frame	3641
	Total contacts issued	856
	Total contacts contacted	709
<b>Screening phase</b>	Screening in process	0
	Eligibles	376
	Screener refusal	101
	Ineligible + out of target	181
	Unobtainable	51
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	360
	Eligible in process + incomplete interviews	0
	Interview refusal	13
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	14.2%
	Ineligible + out of target rate	25.5%
	Unobtainable rate	7.2%
	Interview conversion rate	50.8%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	1.8%

### A.24.3. Universe estimates

Universe estimates for the number of establishments in each cell in Mongolia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Mongolia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Central Mongolia</b>	Small (5-19)	66	65	170	<b>405</b>
	Medium (20-99)	21	11	66	
	Large (100 or more)	3	0	3	
<b>Ulaanbaatar</b>	Small (5-19)	219	124	990	<b>2251</b>
	Medium (20-99)	113	59	593	
	Large (100 or more)	30	16	107	
<b>East Mongolia</b>	Small (5-19)	20	18	39	<b>110</b>
	Medium (20-99)	8	4	19	
	Large (100 or more)	1	0	1	
<b>Khangai</b>	Small (5-19)	96	68	181	<b>461</b>
	Medium (20-99)	25	0	66	
	Large (100 or more)	3	0	8	
	Medium and Large (20+)	0	14	0	
<b>West Mongolia</b>	Small (5-19)	66	35	94	<b>266</b>
	Medium (20-99)	11	6	49	
	Large (100 or more)	1	0	4	
		<b>683</b>	<b>419</b>	<b>2391</b>	<b>3494</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Central Mongolia</b>	Small (5-19)	65	67	177	<b>402</b>
	Medium (20-99)	18	11	56	
	Large (100 or more)	3	0	5	
<b>Ulaanbaatar</b>	Small (5-19)	382	226	1811	<b>3902</b>
	Medium (20-99)	161	87	882	
	Large (100 or more)	65	36	251	
<b>East Mongolia</b>	Small (5-19)	22	21	45	<b>118</b>
	Medium (20-99)	7	4	18	
	Large (100 or more)	1	0	1	
<b>Khangai</b>	Small (5-19)	118	87	233	<b>560</b>
	Medium (20-99)	25	0	69	
	Large (100 or more)	4	0	10	
	Medium and Large (20+)	0	15	0	
<b>West Mongolia</b>	Small (5-19)	73	41	109	<b>291</b>
	Medium (20-99)	10	6	47	
	Large (100 or more)	1	0	4	
		<b>956</b>	<b>600</b>	<b>3718</b>	<b>5274</b>

#### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Central Mongolia</b>	Small (5-19)	82	87	223	<b>499</b>
	Medium (20-99)	20	11	66	
	Large (100 or more)	4	0	5	
<b>Ulaanbaatar</b>	Small (5-19)	447	271	2122	<b>4465</b>
	Medium (20-99)	177	98	970	
	Large (100 or more)	69	39	271	
<b>East Mongolia</b>	Small (5-19)	23	23	49	<b>127</b>
	Medium (20-99)	7	4	18	

	Large (100 or more)	1	0	1	
<b>Khangai</b>	Small (5-19)	133	100	263	<b>626</b>
	Medium (20-99)	26	0	73	
	Large (100 or more)	5	0	10	
	Medium and Large (20+)	0	15	0	
<b>West Mongolia</b>	Small (5-19)	81	46	121	<b>319</b>
	Medium (20-99)	11	6	48	
	Large (100 or more)	1	0	4	
		<b>1088</b>	<b>701</b>	<b>4247</b>	<b>6035</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.24.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.51.<sup>51</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.16.

<sup>51</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Rejection rate and Interviews per Contact Mongolia ES,  
2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Mongolia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

#### A.24.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	Name: SIAR Research and Consultancy (in collaboration with Operative Research Center - SIAR's supplier for fieldwork in Mongolia) Region: Mongolia Membership of international organizations: Group 789 Association of regional research companies, member of ESOMAR (Russia) Activities since: 2000
Enumerators involved:	Enumerators: 24 Recruiters: 10
Other staff involved:	Fieldwork Coordinators: 8 regional supervisors Editing: 1 Data Entry: 3 Data Processing: Ipsos was responsible for all data processing

##### Sample Frame

Characteristic of sample frame used:	Electronic database
Source:	NSO Mongolia
Year:	2018
Comments on the quality of sample frame:	The quality of the sample frame was generally good although it did contain some out of date information, including businesses that were no longer in operation and the number of employees was not always accurate.

##### Sample

Comments/ problems for particular regions:	On regions: There were no particular problems to do with regions.
Comments on the response rate:	Response rate was good for Mongolia, almost half of the heads of enterprises that were asked to participate in the study gave their consent and were interviewed.
Comments on the sample design:	No comments and problems

Other comments:	No
-----------------	----

### Fieldwork

Date of Fieldwork	10 November 2018 to 03 June 2019
Country	Mongolia
Number of interviews	360
Problems found during fieldwork:	Many small panel companies had moved, changed names and addresses, or became non-existing. In many cases, because of wrong contact information in the sample, the staff needed to go to the address, and encounter that the enterprises in question no longer existed. This situation was challenging and time-consuming.
Other observations:	Respondents were always asking about their benefits from participation in the survey. They wanted to see immediate profits.

### Questionnaires

Problems for the understanding of questions (indicate question number)	D.2, N.3, N.2e1, N.7
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	About 80% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	Due to slow Internet speed in Mongolia, especially in rural areas, the difficulties with submission-filled questionnaires in programs were common.
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Mongolia is a peaceful country, free of political unrest and violence. Nevertheless, during the survey period, the media focused on grand corruption case where many members of the Parliament were accused of inappropriate loan dissemination of the Fund for Development of Small and Medium enterprises. This stirred anger among general public. The respondents expressed negative emotions towards two leading political parties and their misbehavior.
Relevant country events occurred during fieldwork:	Above
Other aspects:	No

## A.25 Montenegro

### A.25.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 150 firms from the Montenegro 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments and firms from the Department of Public Revenues was used, dated December 2018. The establishments in the listing are all registered as businesses with the Central Registry.

Regional stratification for the Montenegro ES was done across three regions: North Montenegro comprising Bijelo Polje, Mojkovac, Pljevlja, Plužine, Šavnik, Žabljak; Center and South Montenegro comprising Andrijevica, Berane, Cetinje, Danilovgrad, Gusinje, Kolašin, Nikšić, Petnjica, Plav, Podgorica, Rožaje; and Coastal Montenegro comprising Bar, Budva, Herceg Novi, Kotor, Tivat, Ulcinj. For the purposes of achieving representative samples, the ES indicators are calculated with all of the regions combined.

Grouping used for stratification purposes in BEEPS VI (municipalities in brackets)
<b>North Montenegro:</b> Bijelo Polje, Mojkovac, Pljevlja, Plužine, Šavnik, Žabljak
<b>Center and South Montenegro:</b> Andrijevica, Berane, Cetinje, Danilovgrad, Gusinje, Kolašin, Nikšić, Petnjica, Plav, Podgorica, Rožaje
<b>Coastal Montenegro:</b> Bar, Budva, Herceg Novi, Kotor, Tivat, Ulcinj

#### Montenegro ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	51	131	<b>215</b>
	Medium (20-99)	11	17	
	Large (100 or more)	4	1	
<b>Center and South Montenegro</b>	Small (5-19)	190	899	<b>1428</b>
	Medium (20-99)	49	227	
	Large (100 or more)	10	53	
<b>Coastal Montenegro</b>	Small (5-19)	88	761	<b>1015</b>
	Medium (20-99)	10	133	
	Large (100 or more)	1	22	
		<b>414</b>	<b>2244</b>	<b>2658</b>

Source: World Bank and Department of Public Revenues

#### Montenegro Sample Frame (Panel)

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	9	8	<b>26</b>
	Medium (20-99)	4	5	
	Large (100 or more)	0	0	
<b>Center and South Montenegro</b>	Small (5-19)	16	31	<b>72</b>
	Medium (20-99)	5	10	
	Large (100 or more)	3	7	
<b>Coastal Montenegro</b>	Small (5-19)	8	27	<b>52</b>
	Medium (20-99)	3	8	
	Large (100 or more)	1	5	
		<b>49</b>	<b>101</b>	<b>150</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	2	2	<b>13</b>
	Medium (20-99)	4	2	
	Large (100 or more)	2	1	
<b>Center and South Montenegro</b>	Small (5-19)	9	5	<b>40</b>
	Medium (20-99)	10	2	
	Large (100 or more)	4	10	
<b>Coastal Montenegro</b>	Small (5-19)	2	4	<b>22</b>
	Medium (20-99)	4	2	
	Large (100 or more)	0	10	
		<b>37</b>	<b>38</b>	<b>75</b>

#### Original Sample Design (Panel)

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	5	2	<b>12</b>
	Medium (20-99)	3	2	
	Large (100 or more)	0	0	
<b>Center and South Montenegro</b>	Small (5-19)	10	10	<b>40</b>
	Medium (20-99)	4	8	
	Large (100 or more)	2	6	
<b>Coastal Montenegro</b>	Small (5-19)	6	8	<b>23</b>
	Medium (20-99)	2	2	
	Large (100 or more)	1	4	
		<b>33</b>	<b>42</b>	<b>75</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 9% (26 out of 289 establishments).<sup>52</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	4	4	<b>23</b>
	Medium (20-99)	6	6	
	Large (100 or more)	2	1	
<b>Center and South Montenegro</b>	Small (5-19)	19	16	<b>79</b>
	Medium (20-99)	14	6	
	Large (100 or more)	8	16	
<b>Coastal Montenegro</b>	Small (5-19)	8	15	<b>48</b>
	Medium (20-99)	7	6	
	Large (100 or more)	1	11	

<sup>52</sup> Based on out of target and ineligible contacts.

		69	81	150
--	--	----	----	-----

### Achieved Interviews (Panel)

		Manufacturing	Services	Grand Total
North Montenegro	Small (5-19)	2	2	10

### A.25.3. Universe estimates

Universe estimates for the number of establishments in each cell in Montenegro were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions Percent Eligible  
Montenegro ES, 2019

Universe estimates for the number of establishments in each industry-region-size cell in Montenegro were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	37	66	<b>132</b>
	Medium (20-99)	12	13	
	Large (100 or more)	3	1	
<b>Center and South Montenegro</b>	Small (5-19)	99	327	<b>623</b>
	Medium (20-99)	39	128	
	Large (100 or more)	8	22	
<b>Coastal Montenegro</b>	Small (5-19)	55	333	<b>500</b>
	Medium (20-99)	10	90	
	Large (100 or more)	1	11	
		<b>263</b>	<b>991</b>	<b>1254</b>

**Median Universe Estimates – Fresh:**

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	52	131	<b>216</b>
	Medium (20-99)	11	17	
	Large (100 or more)	4	1	
<b>Center and South Montenegro</b>	Small (5-19)	182	840	<b>1336</b>
	Medium (20-99)	46	208	
	Large (100 or more)	9	49	
<b>Coastal Montenegro</b>	Small (5-19)	88	738	<b>985</b>
	Medium (20-99)	10	127	
	Large (100 or more)	1	21	
		<b>404</b>	<b>2132</b>	<b>2537</b>

**Weak Universe Estimates – Fresh:**

		Manufacturing	Services	Grand Total
<b>North Montenegro</b>	Small (5-19)	52	131	<b>216</b>
	Medium (20-99)	11	17	
	Large (100 or more)	4	1	
<b>Center and South Montenegro</b>	Small (5-19)	182	840	<b>1336</b>
	Medium (20-99)	46	208	
	Large (100 or more)	9	49	
<b>Coastal Montenegro</b>	Small (5-19)	88	738	<b>985</b>

	Medium (20-99)	10	127	
	Large (100 or more)	1	21	
		<b>404</b>	<b>2132</b>	<b>2537</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.25.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.52.<sup>53</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.39.

<sup>53</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Rejection rate and Interviews per Contact Montenegro ES,  
2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Montenegro. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

#### A.25.5. Local agency team involved in the study and its comments on the implementation

##### Local agency team involved in the survey

Local Agency	Name: Ipsos Montenegro Region: Montenegro Membership of international organization: Esomar Activities since: 2005
Enumerators involved:	Enumerators and Recruiters: 3. 3 recruiters and 9 enumerators
Other staff involved:	Fieldwork Coordinators: 2 supervisors Editing: 1 Data Entry: 0 Data Processing: Ipsos was responsible for all data processing

##### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Business Intelligence Consulting doo Podgorica
Year:	June 2018
Comments on the quality of sample frame:	The quality of the sample frame was generally good although it did contain some out of date information, including businesses that were no longer in operation and the number of employees was not always accurate.

##### Sample

Comments/ problems for particular regions:	The most difficult region to work in was the Centre and South Montenegro where most soft and hard refusals were encountered. Many businesses were also hard to find as they had changed names or gone bankrupt.
Comments on the response rate:	We expected a higher response rate in the North Montenegro.
Comments on the sample design:	No comments.
Other comments:	No other comments.

## Fieldwork

Date of Fieldwork	24 December 2018 to 10 July 2019
Country	Montenegro
Number of interviews	150
Problems found during fieldwork:	Problems that were encountered were to do with outdated sample frame which meant that many businesses were without phone numbers, names written wrongly and did not contain emails. The interview length meant that many business executives were reluctant to take part and recruiters had to work hard to convince them to participate. Some respondent refused to answer on some questions in N section by deciding not to open business reports and to provide answers based on their estimations.
Other observations:	The general attitude of the respondents to the survey was quite positive. Even refusals were mostly polite and tactful.

## Questionnaires

Problems for the understanding of questions (indicate question number)	D.2, N.3, N.2e1, N.7
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	About 45% of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

## Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

## Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	During the fieldwork period the general political and economic situation was fairly calm in Montenegro.
Relevant country events occurred during fieldwork:	Apart from the protests that took place during February 2019, because of the political affair over corruption of government officials, there were no significant political and economic instabilities in the country. Generally, business executives are always afraid that the Tax Service is involved in some way or that we will share their information with them which may have influenced their responses, particularly when it comes to financial information.
Other aspects:	No

## A.26 Morocco

### A.26.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 407 firms from the Morocco 2013 ES was used and for fresh firms (i.e., firms not covered in 2013), lists of firms from the Morocco Census of firms (2017) was used.

Regional stratification was done across eight regions: Tanger-Tétouan-Al Hoceima, Oriental, Fès-Meknès, Béni Mellal-Khénifra and Drâa-Tafilalet, Rabat-Salé-Kénitra, Casablanca-Settat, Marrakech-Safi and Souss-Massa.

Regions of Morocco	Grouping to be used for stratification purposes in BEEPS VI
Tanger-Tetouan-Al Hoceima	Tanger-Tétouan-Al Hoceima
Oriental	Oriental
Fès-Meknès	Fès-Meknès
Béni Mellal-Khénifra	Béni Mellal-Khénifra and Drâa-Tafilalet
Drâa-Tafilalet	
Rabat-Salé-Kénitra	Rabat-Salé-Kénitra
Casablanca-Settat	Casablanca-Settat
Marrakesh-Safi	Marrakech-Safi
Souss-Massa	Souss-Massa
Guelmim-Oued Noun	
Laâyoune-Sakia El Hamra	
Dakhla-Oued Ed-Dahab

### Morocco Sample Frame (Panel)

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total
<b>Tanger-Tétouan-Al Hoceima</b>	Small (5-19)	1	0	2	2	5	<b>32</b>
	Medium (20-99)	3	1	4	0	3	
	Large (100 or more)	0	4	3	1	3	
<b>Fès-Meknès</b>	Small (5-19)	0	1	3	3	10	<b>43</b>
	Medium (20-99)	2	1	4	1	5	
	Large (100 or more)	1	6	4	0	2	
<b>Béni Mellal-Khénifra and Drâa-Tafilalet</b>	Small (5-19)	0	0	1	0	3	<b>9</b>
	Medium (20-99)	0	0	2	1	2	
<b>Rabat-Salé-Kénitra</b>	Small (5-19)	2	0	5	1	7	<b>60</b>
	Medium (20-99)	0	2	6	3	15	
	Large (100 or more)	3	1	4	0	11	
<b>Casablanca-Settat</b>	Small (5-19)	3	2	15	4	42	<b>164</b>
	Medium (20-99)	4	6	15	9	21	
	Large (100 or more)	8	7	16	1	11	
<b>Marrakech-Safi</b>	Small (5-19)	0	0	3	4	8	<b>53</b>
	Medium (20-99)	4	4	3	2	13	
	Large (100 or more)	5	1	4	0	2	
<b>Souss-Massa</b>	Small (5-19)	1	1	1	3	8	<b>46</b>
	Medium (20-99)	3	1	3	1	9	
	Large (100 or more)	9	0	2	0	4	
		<b>49</b>	<b>38</b>	<b>100</b>	<b>36</b>	<b>184</b>	<b>407</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

		<b>29</b>	<b>31</b>	<b>43</b>	<b>22</b>	<b>63</b>	<b>188</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 1.3% (33 out of 2617 establishments).<sup>54</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

### Achieved Interviews (Fresh and Panel Combined)

<sup>54</sup> Based on out of target and ineligible contacts.

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total

### A.26.2. Status Codes

<b>1</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	<b>1</b>
<b>1096</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	1096
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
<b>1097</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>1097</b>
<b>33</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	0
		616. The firm discontinued businesses - (Establishment went bankrupt)	8
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	0
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	1
		621. The firm discontinued businesses - (Other)	9
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	15
<b>0</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	0
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>390</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	196
		92. Line out of order	5
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	189
<b>2617</b>	<b>Total contacted</b>		

## Response Outcomes: Morocco ES 2019

<b>Target and totals</b>	Sample target	1000
	Sample target completion rate	109.6%
	Total contacts available in frame	8103
	Total contacts issued	2968
	Total contacts contacted	2617
<b>Screening phase</b>	Screening in process	1
	Eligibles	1096
	Screener refusal	1097
	Ineligible + out of target	33
	Unobtainable	390
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	1096
	Complete interviews with extra module	0
	Eligible in process + incomplete interviews	0
	Interview refusal	0
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	41.9%
	Ineligible + out of target rate	1.3%
	Unobtainable rate	14.9%
	Interview conversion rate	41.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.0%

### A.26.3. Universe estimates

Universe estimates for the number of establishments in each cell in Morocco were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Morocco were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Food	Garments	Other Manufacturing	Retail	Other Services	Grand Total

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.26.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.42.<sup>55</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.42.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Morocco. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.27 North Macedonia

### A.27.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 360 firms from the North Macedonia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the Central Register of the Republic of North Macedonia (CRM) was used. The establishments in the listing are all registered with the same agency.

Regional stratification was done across three regions: Skopje; Eastern Macedonia comprising Northeastern, Eastern, Southeastern, and Vardar regions; and Western Macedonia comprising Polog, Southwestern and Pelagonia regions.

NUTS-3 statistical regions	Grouping to be used for stratification purposes in BEEPS VI
Skopje	Skopje
Eastern	Eastern Macedonia
North Eastern	

<sup>55</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

South Eastern	North-West & West Macedonia
South Western	
Poloski	
Vardarski	South Macedonia
Pelagoniski	

#### North Macedonia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	508	560	2002	<b>4006</b>
	Medium (20-99)	179	103	518	
	Large (100 or more)	48	26	62	
<b>Eastern Macedonia</b>	Small (5-19)	577	589	1247	<b>3214</b>
	Medium (20-99)	356	62	240	
	Large (100 or more)	114	11	18	
<b>Western Macedonia</b>	Small (5-19)	506	713	1094	<b>2823</b>
	Medium (20-99)	185	72	179	
	Large (100 or more)	52	8	14	
		<b>2525</b>	<b>2144</b>	<b>5374</b>	<b>10043</b>

Source: World Bank and Central Register of the Republic of North Macedonia (CRM)

#### North Macedonia Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	27	23	37	<b>132</b>
	Medium (20-99)	13	6	19	
	Large (100 or more)	4	1	2	
<b>Eastern Macedonia</b>	Small (5-19)	19	25	24	<b>110</b>
	Medium (20-99)	21	3	10	
	Large (100 or more)	6	1	1	
<b>Western Macedonia</b>	Small (5-19)	23	33	35	<b>118</b>
	Medium (20-99)	9	5	8	
	Large (100 or more)	3	1	1	
		<b>125</b>	<b>98</b>	<b>137</b>	<b>360</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	3	3	11	<b>59</b>
	Medium (20-99)	2	8	3	
	Large (100 or more)	8	14	7	
<b>Eastern Macedonia</b>	Small (5-19)	3	3	7	<b>57</b>
	Medium (20-99)	3	13	2	
	Large (100 or more)	12	6	8	
<b>Western Macedonia</b>	Small (5-19)	3	4	6	<b>64</b>
	Medium (20-99)	5	15	3	
	Large (100 or more)	17	4	7	
		<b>56</b>	<b>70</b>	<b>54</b>	<b>180</b>

##### Original Sample Design (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	4	12	12	<b>61</b>
	Medium (20-99)	10	5	12	
	Large (100 or more)	3	1	2	
<b>Eastern Macedonia</b>	Small (5-19)	10	12	12	<b>63</b>
	Medium (20-99)	12	2	8	
	Large (100 or more)	5	1	1	
<b>Western Macedonia</b>	Small (5-19)	11	12	12	<b>56</b>
	Medium (20-99)	7	4	6	
	Large (100 or more)	2	1	1	
		<b>64</b>	<b>50</b>	<b>66</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 7.2% (96 out of 1339 establishments)<sup>56</sup>.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	9	9	30	<b>121</b>
	Medium (20-99)	7	16	14

#### A.27.2. Status Codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
---	----------------------	---	---

<sup>56</sup> Based on out of target and ineligible contacts.

399	Eligible	1. Eligible establishment (Correct name and address)	380
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	4
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	3
		4. Eligible establishment (Moved and traced)	7
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	5
566	Screener refusal	13. Refuses to answer the screener	556
93	Ineligible	5. The establishment has less than 5 permanent full time employees	16
		616. The firm discontinued businesses - (Establishment went bankrupt)	23
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	4
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	2
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	13
		621. The firm discontinued businesses - (Other)	24
		71. Ineligible legal status: not a business, but private household	8
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	0
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	3
3	Out of Target	151. Out of target - outside the covered regions	2
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	0
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	1
278	Unobtainable	91. No reply after having called in different days of the week and in different business hours	40
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	238
1339	Total contacted		

#### Response Outcomes: North Macedonia ES 2019:

Target and totals	Sample target	360
	Sample target completion rate	100.0%

	Total contacts available in frame	10043
	Total contacts issued	1427
	Total contacts contacted	1339
<b>Screening phase</b>	Screening in process	0
	Eligibles	399
	Screener refusal	566
	Ineligible + out of target	96
	Unobtainable	278
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	6
	Complete interviews with extra module	354
	Eligible in process + incomplete interviews	0
	Interview refusal	39
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	42.3%
	Ineligible + out of target rate	7.2%
	Unobtainable rate	20.8%
	Interview conversion rate	26.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	2.9%

### A.27.3. Universe estimates

Universe estimates for the number of establishments in each cell in North Macedonia were produced for the strict, weak and median eligibility definitions in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in North Macedonia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Skopje</b>	Small (5-19)	99	86	309	<b>699</b>
	Medium (20-99)	45	20	102	
	Large (100 or more)	16	7	14	
<b>Eastern Macedonia</b>	Small (5-19)	185	148	315	<b>961</b>

	Medium (20-99)	145	20	77	
	Large (100 or more)	54	7	10	
<b>Western Macedonia</b>	Small (5-19)	144	159	245	<b>719</b>
	Medium (20-99)	67	23	51	
	Large (100 or more)	22	3	5	
		<b>777</b>	<b>472</b>	<b>1130</b>	<b>2379</b>

#### Median Universe Estimates – Fresh:

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Skopje</b>	Small (5-19)	329	359	1195	<b>2537</b>
	Medium (20-99)	130	74	347	
	Large (100 or more)	38	20	45	
<b>Eastern Macedonia</b>	Small (5-19)	408	412	812	<b>2261</b>
	Medium (20-99)	283	49	176	
	Large (100 or more)	98	9	14	
<b>Western Macedonia</b>	Small (5-19)	350	488	697	<b>1923</b>
	Medium (20-99)	144	55	128	
	Large (100 or more)	44	7	11	
		<b>1824</b>	<b>1473</b>	<b>3425</b>	<b>6721</b>

#### Weak Universe Estimates – Fresh:

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Skopje</b>	Small (5-19)	475	507	1850	<b>3741</b>
	Medium (20-99)	176	98	503	
	Large (100 or more)	47	25	60	
<b>Eastern Macedonia</b>	Small (5-19)	548	541	1169	<b>3052</b>
	Medium (20-99)	355	60	237	
	Large (100 or more)	114	11	18	
<b>Western Macedonia</b>	Small (5-19)	462	630	987	<b>2563</b>
	Medium (20-99)	178	67	170	
	Large (100 or more)	50	7	13	
		<b>2405</b>	<b>1945</b>	<b>5007</b>	<b>9356</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.27.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.27.<sup>57</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.45.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to North Macedonia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.27.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: Ipsos Skopje Region: Republic of North Macedonia Ipsos North Macedonia experts follow the highest professional ESOMAR and ISI standards, concerning survey design, sampling, data collection, processing and analysis. Ipsos North Macedonia conducts all types of opinion polls and marketing and media research projects (on the average more than 70 sample surveys yearly) as well as all kinds of qualitative projects and focus group discussions. Activities since: 2000
Enumerators involved:	Enumerators: 30 Recruiters: 4 Three of the recruiters were involved in field implementation.
Other staff involved:	Fieldwork Coordinators: 6 regional supervisors

<sup>57</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

	Screening: 2 Data Processing: Ipsos was responsible for all data processing
--	--

### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Central Register of the Republic of North Macedonia (CRM)
Year:	July 2018
Comments on the quality of sample frame:	The data was not updated and it contain establishments that were declared bankrupt or no longer existed. The number of employees and main sector were inaccurate. Lack of any contact information or company addresses.

### Sample

Comments/ problems for particular regions:	On regions: There were no large problems with different regions. For region of Skopje it was more difficult to find and schedule appointment compared to other two regions.
Comments on the response rate:	The response rate was lower than expected for North Macedonia. Decreased interest for participation in the study by enterprises, caused by the turbulent political and economic developments, was unexpected. 40% of screening refusal rate was difficult to overcome especially for panel companies which were limited leading to re-contact of companies that had already refused participation.
Comments on the sample design:	No problems with the sample design.
Other comments:	Many of the respondents shared with us that they would like to receive a summary of the results in the form of a Country Profile.

### Fieldwork

Date of Fieldwork	11 December 2018 to 15 October 2019.
Country	Republic of North Macedonia
Number of interviews	360
Problems found during fieldwork:	Sample frame was not fully up to date. Sample frame was without any contact details. The length of the questionnaire and the need to answer the financial questions led to a number of potential respondents refusing to participate.
Other observations:	In general, it was difficult to find companies to participate in the research, otherwise the companies that participated had a positive feedback.

### Questionnaires

Problems for the understanding of questions (indicate question number)	H6x, H7x, F1, D2, N3
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	About 40% of respondents had difficulty with completing the questionnaire without distractions or breaks due to excessive length of the interview. For the small companies it was difficult to answer the Green Economy module questions due to lack of awareness and working staff for the whole sector.

Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

### Country/ region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	<p>During the fieldwork period turbulent political and economic changes were observed in the North Macedonia.</p> <p>At the beginning of 2019 constitutional changes started, regarding the introduction of bilingualism which led to negative public reactions.</p> <p>On 30 September 2018 a referendum about name changes was implemented. In the following period there were tumultuous reactions among the public as well as in the political ranks. 2019 was marked as the year of changes of personal documentation for both private and legal entities.</p> <p>Republic of North Macedonia becomes the new official name of the country.</p> <p>NATO Members Start Ratification of NATO Agreement for Republic of North Macedonia.</p> <p>Introduction of minimum wage law. Net salary increase by 5.6% compared to 2017 and the introduction of a fixed minimum wage.</p> <p>Prolonging the date of negotiations with the EU for membership of Macedonia in the European Union.</p> <p>Opening of the "Racketeer" case and questioning the credibility of the Special Prosecutor's Office, responsible for convicting a large number of politicians and businessmen.</p>
Relevant country events occurred during fieldwork:	<p>Protests to improve working conditions and pay raises for heavy and light industry employees.</p> <p>The project for Energy efficiency was started with 21 firms. The positive results as well as the benefits of investing in energy efficiency have been reflected by imposing another 250 firms on investment in Energy efficiency.</p>
Other aspects:	No

## A.28 Poland

### A.28.1. Sampling structure and implementation

The sample frame consisted of listings of establishments from two sources: for panel firms, the list of 542 firms from the Poland 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Bisnode, was used. The establishments in the listing are all registered with the National Court Register.

Regional stratification for the Poland ES was done across six regions: Center (NUTS region PL1), South (PL2), East (PL3), Northwest (PL4), Southwest (PL5), North (PL6).

NUTS-2 regions	Grouping to be used for stratification purposes in BEEPS VI (NUTS-1 regions)
Lodzkie	Central

Mazowieckie	
Malopolskie	Southern
Slaskie	
Lubelskie	Eastern
Podkarpackie	
Podlaskie	
Swietokrzyskie	
Lubuskie	North-western
Wielkopolskie	
Zachodniopomorskie	
Dolnoslaskie	South-western
Opolskie	
Kujawsko-Pomorskie	Northern
Pomorskie	
Warminsko-Mazurskie

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 9.9% (460 out of 4669 establishments).<sup>58</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

	Total contacts contacted	4669
<b>Screening phase</b>	Screening in process	0
	Eligibles	2314
	Screener refusal	1716
	Ineligible + out of target	460
	Unobtainable	179
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	93
	Complete interviews with extra module	1276
	Eligible in process + incomplete interviews	12
	Interview refusal	926
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	36.8%
	Ineligible + out of target rate	9.9%
	Unobtainable rate	3.8%
	Interview conversion rate	29.3%
	Eligible in process + incomplete interviews rate	0.3%
	Interview refusal rate	19.8%

### A.28.3. Universe estimates

Universe estimates for the number of establishments in each cell in Poland were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Poland were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Universe**

**Note:** Adjustments for strict, median and weak assumptions were not applied to universe estimates because the universe and the frame were from separate sources hence scenarios that apply to the frame cannot be assumed in the universe

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.28.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.29.<sup>59</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.57.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Poland. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

---

<sup>59</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.28.5. Local agency team involved in the study and its comments on the implementation

### Local agency team involved in the survey

Local Agency	Name: Ipsos Sp. z o.o. Region: Poland Member of OFBOR (Organisation of Opinion and Market Research Companies). OFBOR is an association of employers, with only certified research providers as its members. Each year, Ipsos undergoes the OFBOR audit within its Interviewing Quality Control Programme (PKJPA). Ipsos is certified for all types of research conducted, incl. CAPI.
Enumerators involved:	Enumerators/recruiters: 128 Recruiters (on initial project phase): 14.
Other staff involved:	Fieldwork Coordinators: 16 Supervisors: 4 Quality Control: 2 back checkers

### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Bisnode
Year:	June 2018
Comments on the quality of sample frame:	Among the enterprise databases available in Poland, Ipsos uses Bisnode most frequently. According to the statistics of the Central Statistical Office of Poland (GUS), there are over 4 million registered business entities in Poland, and this number includes entities that have suspended or ceased their business but relevant information about this fact did not reach GUS. The Bisnode database has about 3 million enterprises and this number is much closer to the number of active businesses operating in Poland. The Bisnode database is updated on an ongoing basis. While this does not preclude erroneous database records, their share is relatively low, amounting to approx. 10%. Most discrepancies concern the contact details, which are usually provided at the time of registration, but companies later forget to update their details.

### Sample

Comments/problems for particular regions:	The basic organisational unit of the Ipsos interviewer network in Poland is NUTS2 (division into voivodships, i.e. provinces), their number being 16. Each of them has at least one Ipsos coordinator who is in charge of a group of interviewers. The BEEPS VI sample was divided into regions according to NUTS1, with two to four Ipsos coordinators operating within them at the voivodship level. There were differences in the performance of various coordinators. This was especially true for the North-Western and South-Western regions. In that situation, better performing coordinators supported coordinators from the neighbouring voivodships with their resources (interviewers). The Western and North-Eastern provinces are relatively poorly urbanised and the distances between the localities of interviewers and some locations in the sample exceeded 100 km. This entailed very high travel costs. A decision was made to allocate more contacts to interviewers than originally established in the sampling preferences. Even if some companies with a lower order of preference had to be rejected later when an interview with a higher preference was carried
---	--

	out, this procedure was cost-effective and positively influenced the fieldwork progress.
Comments on the response rate:	Comparing the response rate in BEEPS VI with other enterprise surveys conducted by Ipsos in Poland, it is exceptionally good. In Ipsos Poland's opinion, this was due to several reasons, primarily the decision to assign the best interviewing workforce to the project and maintain a high level of mobilisation throughout the entire fieldwork process. Other significant factors included the non-commercial purpose of the survey and the possibility to invoke the clients: WBG and EBRD, which was generally perceived positively and, at worst, neutrally. The long fieldwork period was the third key factor, as it allowed multiple recruitment attempts to finally find a time when an associate of the company was able to find enough time to respond.
Comments on the sample design:	In the case of "Garments", the share of this industry in the sample was disproportionately large versus the number of these enterprises represented in the database. A small surplus of companies, especially with regard to large enterprises, was a major impediment when interviewing this part of the sample.
Other comments:	No

### Fieldwork

Date of Fieldwork	12 December 2018 to 13 December 2019
Country	Poland
Number of interviews	1320
Problems found during fieldwork:	BEEPS VI places very high demands on the interviewing network, which revealed differences in performance that are not normally noticed in standard surveys. As a result, additional attention had to be paid to coordinators who had problems with implementing their part of the sample, and additional human resources had to be allocated to ensure support.
Other observations:	A point to consider: it might be advisable to abandon or simplify very detailed questions on certain financial issues in the future. For example, the question about the proportion of working capital originating from different sources and the one about the value of purchases of different assets turned out to be very difficult for the respondents, who often refused to provide detailed answers.

### Questionnaires

Problems for the understanding of questions (indicate question number)	I2, N.2e1, N.7
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	The information provided to potential respondents about the expected duration of the interview (approx. 1 hour) was a factor that resulted in many refusals to participate. On the other hand, if the interviewers understated the duration of the interview, the respondents became very irritated when the interview lasted longer. It is recommended that the interviewers should provide the real duration of the interview in terms of a time band.
Suggestions or other comments on the questionnaire:	None

## Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	None

## Country/ region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	
Relevant country events occurred during fieldwork:	The parliamentary elections held in October 2019 ensured the continued rule of the coalition led by the Law and Justice party (PiS).
Other aspects:	No

## A.29 Portugal

### A.29.1. Sampling structure and implementation

The sample frame consisted of listings of establishments from Dun and Bradstreet and BvD.

Regional stratification for the Portugal ES was done across seven regions: North, Algarve, Center, Lisbon Metropolitan Area, Alentejo, Autonomous Region of the Azores and Autonomous Region of Madeira. For the purposes of achieving the thresholds for representativeness, the ES indicators are calculated with some regions combined. In particular, Autonomous Region of the Azores and Autonomous Region of Madeira are combined.

NUTSII Regions of Portugal	Grouping to be used for stratification purposes in BEEPS VI
North	North
Centre	Centre
Lisbon Metropolitan Area	Lisbon Metropolitan Area
Alentejo	Alentejo
Algarve	Algarve
Autonomous Region of the Azores	Autonomous Region of the Azores
Autonomous Region of Madeira	Autonomous Region of Madeira

Source: Dun & Bradstreet and BvD

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design (Fresh)

		Food	Garments	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total
<b>North</b>	Small (5-19)	5	26	9	14	6	9	25	<b>262</b>

<b>Center</b>	Small (5-19)	5	10	7	14	5	6	13	<b>188</b>
	Medium (20-99)	5	18	10	21	5	5	5	
	Large (100 or more)	7	8	9	5	20	5	5	
<b>Lisbon Metropolitan Area</b>	Small (5-19)	5	10	5	12	5	7	15	<b>150</b>
	Medium (20-99)	5	4	6	20	5	5	6	
	Large (100 or more)	6	0	3	2	19	5	5	
<b>Alentejo</b>	Small (5-19)	8	2	20	11	19	5	5	<b>150</b>
	Medium (20-99)	14	1	5	3	26	5	5	
	Large (100 or more)	4	0	0	0	9	0	8	
<b>Autonomous Region of the Azores and Autonomous Region of Madeira</b>	Small (5-19)	12	1	22	5	23	8	5	<b>150</b>
	Medium (20-99)	19	0	5	1	11	9	5	
	Large (100 or more)	5	0	1	0	1	5	12	
		<b>140</b>	<b>140</b>	<b>140</b>	<b>140</b>	<b>220</b>	<b>120</b>	<b>150</b>	<b>1050</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 2.9% (124 out of 4342 establishments).<sup>60</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Archieved Interviews

		Food	Garments	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total

**A.29.2. Status Codes**

144	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	144
1064	Eligible	1. Eligible establishment (Correct name and address)	1064
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
968	Screener refusal	13. Refuses to answer the screener	968
69	Ineligible	5. The establishment has less than 5 permanent full time employees	21
		616. The firm discontinued businesses - (Establishment went bankrupt)	19
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	2
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	5
		621. The firm discontinued businesses - (Other)	8
		71. Ineligible legal status: not a business, but private household	4
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	8
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	2
55	Out of Target	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	1
		154. Out of target - establishment is HQ without production or sales of goods or services	8
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	31
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	15
2042	Unobtainable	91. No reply after having called in different days of the week and in different business hours	1275
		92. Line out of order	38
		93. No tone	4
		94. Phone number does not exist	687
		10. Answering machine	18
		11. Fax line- data line	10
		12. Wrong address/ moved away and could not get the new references	10
4342	Total contacted		

## Response Outcomes: Portugal ES 2019

<b>Target and totals</b>	Sample target	1050
	Sample target completion rate	101.1%
	Total contacts available in frame	13818
	Total contacts issued	5003
	Total contacts contacted	4342
<b>Screening phase</b>	Screening in process	144
	Eligibles	1064
	Screener refusal	968
	Ineligible + out of target	124
	Unobtainable	2042
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	0
	Complete interviews with extra module	1062
	Eligible in process + incomplete interviews	2
	Interview refusal	0
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	3.3%
	Screener refusal rate	22.3%
	Ineligible + out of target rate	2.9%
	Unobtainable rate	47.0%
	Interview conversion rate	24.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	0.0%

### A.29.3. Universe estimates

Universe estimates for the number of establishments in each cell in Portugal were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Portugal were produced for the strict, weak and median eligibility definitions. Table shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.29.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.25.<sup>61</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.22.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Portugal. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>61</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.30 Republic of Cyprus

### A.30.1. Sampling structure and implementation

The sample frame consisted of listings of firms from three sources: For panel firms, the list of 360 firms from the 2016 EBRD survey was used; and for fresh firms (i.e., firms not covered in 2016), a listing of establishments from Business Register of Central Statistical office – 2015 was used in the Republic of Cyprus and a listing of establishments from Chamber of Commerce and Chamber of Industry was used in the Turkish Cypriot community.

The sample was stratified into Republic of Cyprus and Turkish Cypriot community.

#### Republic of Cyprus ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Republic of Cyprus</b>	Small (5-9)	474	625	1199	<b>4352</b>
	Medium (10-49)	481	319	949	
	Large (50-249)	61	49	157	
	Very Large (250 or more)	6	11	21	
<b>Turkish Cypriot Community</b>	Small (5-19)	238	112	105	<b>738</b>
	Medium (20-99)	103	27	84	
	Large (100 or more)	18	8	43	
		<b>1381</b>	<b>1151</b>	<b>2558</b>	<b>5090</b>

Source: European Bank for Reconstruction and Development, World Bank, Business Registry, Central Statistical Office-2015, and TCC Chamber of Commerce and Chamber of Industry.

#### Republic of Cyprus Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Republic of Cyprus</b>	Small (5-9)	28	47	49	<b>240</b>
	Medium (10-49)	30	25	36	
	Large (50-249)	8	6	7	
	Very Large (250 or more)	1	0	3	
<b>Turkish Cypriot Community</b>	Small (5-19)	18	47	28	<b>120</b>
	Medium (20-99)	5	5	14	
	Large (100 or more)	0	0	3	
		<b>90</b>	<b>130</b>	<b>140</b>	<b>360</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Republic of Cyprus</b>	Small (5-9)	5	5	11	<b>117</b>
	Medium (10-49)	22	3	9	
	Large (50-249)	14	11	26	
	Very Large (250 or more)	1	3	7	
	Small (5-19)	2	12	9	<b>60</b>

	Large (100 or more)	0	0	2	
		<b>55</b>	<b>78</b>	<b>50</b>	<b>183</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 16.0% (89 out of 556 establishments) in the Republic of Cyprus and 24.1% (73 out of 303 establishments) in the Turkish Cypriot community.<sup>62</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>

	Unobtainable rate	3.1%
	Interview conversion rate	41.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	3.7%

### A.30.3. Universe estimates

Universe estimates for the number of establishments in each cell in Republic of Cyprus were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions Percent Eligible  
Turkish Cypriot Community ES, 2019

Universe estimates for the number of establishments in each industry-region-size cell in Republic of Cyprus were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Republic of Cyprus	Small (5-9)	155	186	450	1756
	Medium (10-49)	207	124	468	
	Large (50-249)	27	19	94	
	Very Large (250 or more)	3	6	17	
Turkish Cypriot Community	Small (5-19)	99	85	302	753
	Medium (20-99)	78	54	98	
	Large (100 or more)	12	7	19	
		581	481	1447	2509

#### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Republic of Cyprus	Small (5-9)	365	431	1159	3974
	Medium (10-49)	419	248	1040	
	Large (50-249)	48	34	184	
	Very Large (250 or more)	5	10	32	
Turkish Cypriot Community	Small (5-19)	156	137	561	1207
	Medium (20-99)	91	64	133	
	Large (100 or more)	19	12	35	
		1102	936	3144	5181

#### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
Republic of Cyprus	Small (5-9)	368	436	1190	4023
	Medium (10-49)	416	246	1050	
	Large (50-249)	48	34	188	
	Very Large (250 or more)	5	10	32	
Turkish Cypriot Community	Small (5-19)	170	168	652	1382
	Medium (20-99)	96	77	152	
	Large (100 or more)	18	13	36	
		1121	983	3300	5405

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.30.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.43 in the Republic of Cyprus and 0.40 in the Turkish Cypriot community.<sup>63</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.34 in the Republic of Cyprus and 0.29 in the Turkish Cypriot community.

<sup>63</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Rejection rate and Interviews per Contact Republic of Cyprus ES,  
2019

Rejection rate and Interviews per Contact Turkish Cypriot  
Community ES, 2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level of strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Republic of Cyprus. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### **A.31 Romania**

#### **A.31.1. Sampling structure and implementation**

#### **A.31.2. Status codes**

#### **A.31.3. Universe estimates**

#### **A.31.4. Non-response**

### **A.32 Russia**

#### **A.32.1. Sampling structure and implementation**

The sample frame consisted of listings of mix of firms and establishments from two sources: for panel firms, the list of 4220 firms from the Russia 2012 ES was used; and for fresh firms (i.e., firms not covered in 2012), a listing of establishments and firms from FIRA PRO/Federal State Statistics Service (Rosstat) was used. The establishments in the listing are all registered as businesses with the Federal Tax Service.

Regional stratification for the Russia ES was done across seven regions: Central Federal District, South (combining Southern Federal District and North-Caucasian Federal District), North-West

Federal District, Far Eastern Federal District, Siberian Federal District, Ural Federal District and Volga Federal District.

<b>Federal Districts</b>	<b>Grouping used for stratification purposes in BEEPS VI</b>
Central	Central Federal District
North Western	North-West Federal District
Southern	South Federal District
North Caucasian	
Volga	Volga Federal District
Ural	Ural Federal District
Siberian	Siberian Federal District
Far Eastern	Far Eastern Federal District

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 1.0% (50 out of 5195 establishments)<sup>64</sup>.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

	Ineligible + out of target rate	1.0%
	Unobtainable rate	38.5%
	Interview conversion rate	25.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	33.5%

### A.32.3. Universe estimates

Universe estimates for the number of establishments in each cell in Russia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Russia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**  
**Strict Universe Estimates – Fresh:**

		Food	Garments	Non Metallic Mineral Products	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Retail	Other Services	Grand Total

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.32.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.26.<sup>65</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.35.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Russia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>65</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

### A.32.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	<p>Name: Ipsos Region: Russia Ipsos LLC in Russia is ISO 20252:2012 and ISO 9001:2015 certified to comply to international standard for Social Opinion and Market Research. As the member of ESOMAR, we subscribe to the ICC/ESOMAR International Code On Market And Social Research and ensure compliance of every aspect of our work with the standards set by the Code. Ipsos in Russia is a member of the non-profit organization Association of Enterprises of the Goods and Services Industry for Children (AIDT), which unites the professional community in the development, production, sale of goods and services for children and families with children. Activities since: 1998</p>
Enumerators involved:	<p>Enumerators: 74 Recruiters: 30</p>
Other staff involved:	<p>Fieldwork Coordinators: 10 regional supervisors Editing: 1 Data Processing: Ipsos was responsible for all data processing</p>

#### Sample Frame

Characteristic of sample frame used:	Electronic database
Source:	FIRA
Year:	June 2018
Comments on the quality of sample frame:	<p>The quality of the database was satisfactory, but it contained information on companies that had already closed, or the information was not accurate. We would like to note that for future projects it is necessary to add the column with company TIN number. This data helped to find more accurate contact information about the company, since the TIN is assigned to all registered companies in Russia by the Government. Also, in the Russian databases there is no gradation according to the number of company employees. Companies are divided by turnover, therefore, during the initial analysis of the databases it was difficult to isolate suitable companies for the survey.</p>

#### Sample:

Comments/ problems for particular regions:	<p>There are a number of business environment surveys conducted in certain regions of Russia in recent years. In regions such as the Urals, Siberia, the Center, and North-West, B2B surveys are conducted more often, so it was easier to recruit respondents in these regions, they were more willing to participate. In the Far East, there were difficulties with Manufacturing companies. Factories are located in cities which are remote and difficult to reach. In addition, almost all manufacturing enterprises in this region had a very strict system for processing the invitation letters that were sent to potential respondents so it was difficult to reach the relevant managers in a timely manner. Companies</p>
--	--

	involved in retail trade and other services are represented in this region, so it was easier to gain their participation.
Comments on the response rate:	43% of the business leaders who were invited to participate in the study agreed to participate in the study. This is a high response rate for Russia.
Comments on the sample design:	Among the industries that are hard to recruit, we can distinguish companies that are engaged in metallurgical production, the production of petroleum products, and chemicals. This is due to their secrecy and access control at enterprises.
Other comments:	No

## Fieldwork

Date of Fieldwork	6 December 2018 to 26 July 2019
Country	Russia
Number of interviews	1320
Problems found during fieldwork:	High refusal rate Long interview length Reluctance of respondents to disclose financial information
Other observations:	The general attitude of the respondents to the survey was quite positive except disclosure of financial information

## Questionnaires

Problems for the understanding of questions (indicate question number)	C7, C8a, C8b, BMt1, J2
Problems found in the navigability of –questionnaires (for example, skip patterns).	No problems.
Comments on questionnaires length:	About 70% of respondents complained about the excessive length of the interview.
Suggestions or other comments on the questionnaire:	No

## Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

## Country/Region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	The political and economic situation was quite positive in Russia during the field period. According to the results of the first half of the year, the Ministry of Economic Development estimates the growth of Russia's GDP at 0.7%. Annual inflation in the Russian Federation as of July 15 fell to 4.5%. In the World Bank's 'Doing Business 2019 rating' Russia has the 31st position among 190 EMEA countries. During the field period there were no aspects that could affect the results of the survey.
Relevant country events occurred during fieldwork:	Russia is regularly used as a destination for large international economic forums that attract companies and investors from all over

	<p>the world. Below are the biggest events that were held during fieldwork (but which did not have an impact on fieldwork):</p> <ol style="list-style-type: none"> <li>1) Russian Investment Forum in Sochi (14-15th of February 2019) The Russian Investment Forum is a traditional platform for presenting the investment and economic potential of Russia.</li> <li>2) Russian Business Week 2019 (11-15th of March 2019). The Russian Union of Industrialists and Entrepreneurs (RSPP) holds the annual Week of Russian Business - a key event at which proposals are formulated and discussed on relevant areas of government-business interaction</li> <li>3) St. Petersburg International Economic Forum (6-9th of June 2019) This forum is a leading global platform for communication between representatives of the business community and discussion of key economic issues facing Russia, emerging markets and worldwide in general</li> </ol>
Other aspects:	No

## A.33 Serbia

### A.33.1. Sampling structure and implementation

The sample frame consisted of listings of a mix of establishments and firms from two sources: for panel firms, the list of 360 firms from the Serbia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments and firms from the Statistical Office of the Business Registers Agency (SBRA) was used. The establishments and firms in the listing are all registered with the Business Registers Agency (SBRA).

Regional stratification was done across four regions: Belgrade, Šumadija and Western Serbia, Southern and Eastern Serbia, and Vojvodina. For the purposes of achieving the thresholds for representativeness, the ES indicators are calculated with some regions combined. In particular, Šumadija and Western Serbia, and Southern and Eastern Serbia are combined.

NUTS 2 regions	Grouping to be used for stratification purposes in BEEPS VI
Vojvodina	Vojvodina
Belgrade	Belgrade
Šumadija and Western Serbia	Šumadija and Western Serbia
Southern and Eastern Serbia	Southern and Eastern Serbia

#### Serbia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Belgrade</b>	Small (5-19)	1040	448	3862	<b>7291</b>
	Medium (20-99)	418	115	1044	
	Large (100 or more)	102	55	207	
<b>Šumadija and Western Serbia</b>	Small (5-19)	1123	311	1709	<b>4357</b>
	Medium (20-99)	532	72	369	
	Large (100 or more)	174	8	59

### Serbia Sample Frame (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Belgrade</b>	Small (5-19)	20	15	19	<b>116</b>
	Medium (20-99)	7	13	19	
	Large (100 or more)	4	11	8	
<b>Šumadija and Western Serbia</b>	Small (5-19)	17	11	18	<b>78</b>
	Medium (20-99)	10	8	7	
	Large (100 or more)	4	2	1	
<b>Southern and Eastern Serbia</b>	Small (5-19)	12	13	16	<b>66</b>
	Medium (20-99)	5	9	5	
	Large (100 or more)	2	2	2	
<b>Vojvodina</b>	Small (5-19)	14	17	24	<b>100</b>
	Medium (20-99)	13	7	9	
	Large (100 or more)	6	8	2	
		<b>114</b>	<b>116</b>	<b>130</b>	<b>360</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design (Fresh)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Belgrade</b>	Small (5-19)	10	5	10	<b>58</b>
	Medium (20-99)	4	3	7	
	Large (100 or more)	7	9	3	
<b>Šumadija and Western Serbia</b>	Small (5-19)	4	3	8	<b>34</b>
	Medium (20-99)	3	3	3	
	Large (100 or more)	4	3	3	
<b>Southern and Eastern Serbia</b>	Small (5-19)	3	3	4	<b>30</b>
	Medium (20-99)	3	3	3	
	Large (100 or more)	3	5	3	
<b>Vojvodina</b>	Small (5-19)	6	4	10	<b>57</b>
	Medium (20-99)	4	9	3	
	Large (100 or more)	10	7	4	
		<b>61</b>	<b>57</b>	<b>61</b>	<b>179</b>

### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Belgrade</b>	Small (5-19)	6	8	10	<b>62</b>
	Medium (20-99)	6	9	9	
	Large (100 or more)	3	8	3	
<b>Šumadija and Western Serbia</b>	Small (5-19)	8	2	10	<b>36</b>

	Medium (20-99)	4	4	2	
	Large (100 or more)	3	2	1	
<b>Southern and Eastern Serbia</b>	Small (5-19)	2	2	2	<b>20</b>
	Medium (20-99)	2	4	2	
	Large (100 or more)	2	2	2	
<b>Vojvodina</b>	Small (5-19)	10	10	10	<b>63</b>
	Medium (20-99)	9	5	6	
	Large (100 or more)	4	7	2	
		<b>59</b>	<b>63</b>	<b>59</b>	<b>181</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 7.0% (69 out of 988 establishments).<sup>66</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Belgrade</b>	Small (5-19)	19	7	24	<b>121</b>
	Medium (20-99)	8	12	13	
	Large (100 or more)	8	21	9	
<b>Šumadija and Western Serbia</b>	Small (5-19)	12	7	18	<b>74</b>
	Medium (20-99)	9	10	5	
	Large (100 or more)	8	2	3

### A.33.2. Status codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>404</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	367
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	2
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	5
		4. Eligible establishment (Moved and traced)	15
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	15
<b>438</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	438
<b>67</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	6
		616. The firm discontinued businesses - (Establishment went bankrupt)	7
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	3
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	4
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	19
		621. The firm discontinued businesses - (Other)	17
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	0
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	11
<b>2</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	2
		156. Duplicated firm within the sample	0
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>77</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	45
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	32

988	Total contacted
-----	-----------------

### Response Outcomes: Serbia ES 2019

<b>Target and totals</b>	Sample target	360
	Sample target completion rate	100.3%
	Total contacts available in frame	18823
	Total contacts issued	1134
	Total contacts contacted	988
<b>Screening phase</b>	Screening in process	0
	Eligibles	404
	Screener refusal	438
	Ineligible + out of target	69
	Unobtainable	77
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	1
	Complete interviews with extra module	360
	Eligible in process + incomplete interviews	0
	Interview refusal	43
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	44.3%
	Ineligible + out of target rate	7.0%
	Unobtainable rate	7.8%
	Interview conversion rate	36.5%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	4.4%

### A.33.3. Universe estimates

Universe estimates for the number of establishments in each cell in Serbia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Serbia were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

## Universe Estimate Based on Sampling Weights

### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Belgrade</b>	Small (5-19)	331	148	937	<b>2122</b>
	Medium (20-99)	179	51	340	
	Large (100 or more)	44	25	68	
<b>Šumadija and Western Serbia</b>	Small (5-19)	455	131	528	<b>1721</b>
	Medium (20-99)	289	41	153	
	Large (100 or more)	95	5	25	
<b>Southern and Eastern Serbia</b>	Small (5-19)	294	133	445	<b>1326</b>

	Large (100 or more)	99	55	203	
<b>Šumadija and Western Serbia</b>	Small (5-19)	1012	287	1559	<b>3991</b>
	Medium (20-99)	493	68	346	
	Large (100 or more)	162	8	56	
<b>Southern and Eastern Serbia</b>	Small (5-19)	467	209	941	<b>2225</b>
	Medium (20-99)	234	42	195	
	Large (100 or more)	97	12	28	
<b>Vojvodina</b>	Small (5-19)	863	344	2043	<b>4578</b>
	Medium (20-99)	458	67	509	
	Large (100 or more)	186	23	85	
		<b>5445</b>	<b>1660</b>	<b>10638</b>	<b>17743</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.33.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.37.<sup>67</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.49.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Serbia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

<sup>67</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

### A.33.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: Ipsos Region: Serbia Membership of international organizations: ESOMAR Activities since: 2005
Enumerators involved:	Enumerators only: 4 Recruiters only: 3 Recruiters and enumerators: 32
Other staff involved:	Fieldwork Coordinators: 8 regional supervisors Editing: 1 Data Entry: 0 Data Processing: Ipsos was responsible for all data processing

#### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	Statistical Office of the Republic of Serbia
Year:	December 2017
Comments on the quality of sample frame:	The quality of the sample frame was generally good although it did contain some out of date information, including businesses that were no longer in operation and the number of employees was not always accurate.

#### Sample

Comments/ problems for particular regions:	On regions: The most difficult regions to work in were Vojvodina and Belgrade, where most refusals were encountered. Many businesses were also hard to find as they had changed names or had gone bankrupt. In general, large companies were hardest to reach.
Comments on the response rate:	We expected a higher response rate in Vojvodina.
Comments on the sample design:	No comments.
Other comments:	No

#### Fieldwork

Date of Fieldwork	5 December 2018 to 30 September 2019
Country	Serbia
Number of interviews	360
Problems found during fieldwork:	Sample frame was not fully up to date (see above). There were problems with realization because of the position of respondents in the company and the length of the survey (senior management, mostly busy with business obligations and not having so much time to spend on research). For many prospective respondents, the topic of the research is sensitive, and additional assurances of anonymity were required to consent to the research.
Other observations:	The general attitude of the respondents to the survey was quite positive. Even refusals were mostly polite and tactful.

#### Questionnaires

Problems for the understanding of questions (indicate question number)	No significant problems were identified.
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	We can say that majority of respondents complained about the length of the interview or had comments on this.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	During the fieldwork period the general political and economic situation was fairly calm in Serbia. There were elections for President of the Republic, but they were held without any problems or post-election crisis.
Relevant country events occurred during fieldwork:	No
Other aspects:	No

## A.34 Slovak Republic

### A.34.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 268 firms from the Slovakia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from Albertina was used.

Regional stratification for the Slovakia ES was done across four regions: Bratislava Region, Western Slovakia (Západné Slovensko), Central Slovakia (Stredné Slovensko) and Eastern Slovakia (Východné Slovensko).

NUTS regions	NUTS regions	Grouping used for stratification purposes in BEEPS VI
Bratislava Region	Bratislava Region	Bratislava Region
Trnava Region	Western Slovakia (Západné Slovensko)	Western Slovakia (Západné Slovensko)
Trenčín Region		
Nitra Region		
Žilina Region	Central Slovakia (Stredné Slovensko)	Central Slovakia (Stredné Slovensko)
Banská Bystrica Region	Eastern Slovakia (Východné Slovensko)	Eastern Slovakia (Východné Slovensko)
Prešov Region		
Košice Region		

### Slovakia ES Sample Frame (Fresh and Panel)

		Food	Other Manufacturing	Retail	Other Services	Grand Total
<b>Bratislava Region</b>	Small (5-19)	135	802	1138	3660	<b>8353</b>
	Medium (20-99)	60	344	237	1209	
	Large (100 or more)	21	187	111	449

	Medium (20-99)	13	3	3	3	

	Large (100 or more)	5	8	4	4	
		<b>106</b>	<b>53</b>	<b>57</b>	<b>49</b>	<b>265</b>

### Original Sample Design (Panel)

		Food	Other Manufacturing	Retail	Other Services	Grand Total
<b>Bratislava Region</b>	Small (5-19)	0	9	10	11	<b>56</b>
	Medium (20-99)	0	2	5	7	
	Large (100 or more)	0	5	2	5	
<b>Western Slovakia (Západné Slovensko)</b>	Small (5-19)	3	8	12	14	<b>64</b>
	Medium (20-99)	2	7	5	5	
	Large (100 or more)	0	5	2	1	
<b>Central Slovakia (Stredné Slovensko)</b>	Small (5-19)	1	5	8	10	<b>45</b>
	Medium (20-99)	2	6	4	3	
	Large (100 or more)	2	2	1	1	
<b>Eastern Slovakia (Východné Slovensko)</b>	Small (5-19)	1	8	7	10	<b>50</b>
	Medium (20-99)	1	8	6	2	
	Large (100 or more)	2	2	1	2	
		<b>14</b>	<b>67</b>	<b>63</b>	<b>71</b>	<b>215</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 11.1% (913 out of 8189 establishments).<sup>68</sup>

For the Slovakia 2019 ES, the fieldwork ended due to the COVID-19 outbreak and sample exhaustion. Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

### Achieved Interviews (Fresh and Panel Combined)

		Food	Other Manufacturing	Retail	Other Services	Grand Total
<b>Bratislava Region</b>	Small (5-19)	2	22	26	19	<b>119</b>
	Medium (20-99)	0	7	8	9	
	Large (100 or more)	0	6	2	16

### A.34.2. Status codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
530	Eligible	1. Eligible establishment (Correct name and address)	529
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	1
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
4245	Screener refusal	13. Refuses to answer the screener	4245
211	Ineligible	5. The establishment has less than 5 permanent full time employees	19
		616. The firm discontinued businesses - (Establishment went bankrupt)	82
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	5
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	4
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	7
		621. The firm discontinued businesses - (Other)	63
		71. Ineligible legal status: not a business, but private household	18
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	7
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	6
702	Out of Target	151. Out of target - outside the covered regions	1
		152. Out of target - moved abroad	10
		153. Out of target - Not registered with Statistical Authority	1
		154. Out of target - establishment is HQ without production or sales of goods or services	0

		155. Out of target - establishment was not in operation for the entirety of last fiscal year	2
		156. Duplicated firm within the sample	682
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	6
<b>2501</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	157
		92. Line out of order	3
		93. No tone	100
		94. Phone number does not exist	93
		10. Answering machine	383
		11. Fax line- data line	295
		12. Wrong address/ moved away and could not get the new references	11
<b>8189</b>	<b>Total contacted</b>		<b>46</b>

### Response Outcomes: Slovakia ES 2019:

<b>Target and totals</b>	Sample target	429
	Sample target completion rate	100.0%
	Total contacts available in frame	33505
	Total contacts issued	8938
	Total contacts contacted	8189
<b>Screening phase</b>	Screening in process	0
	Eligibles	530
	Screener refusal	4245
	Ineligible + out of target	913
	Unobtainable	2501
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	3
	Complete interviews with extra module	426
	Eligible in process + incomplete interviews	0
	Interview refusal	101
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	51.8%
	Ineligible + out of target rate	11.1%
	Unobtainable rate	30.5%
	Interview conversion rate	5.2%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	1.2%

### A.34.3. Universe estimates

Universe estimates for the number of establishments in each cell in Slovakia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions  
Percent Eligible Slovakia ES, 2019

Universe estimates for the number of establishments in each industry-region-size cell in Slovakia were produced for the strict, weak and median eligibility definitions. Tables below shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Strict Universe Estimates – Fresh:**

		Food	Other Manufacturing	Retail	Other Services	Grand Total
<b>Bratislava Region</b>	Small (5-19)	8	26	54	235	<b>436</b>
	Medium (20-99)	0	8	8	58	
	Large (100 or more)	0	6	4	24	
	Medium and Large (20+)	3	0	0	0	
<b>Western Slovakia (Západné Slovensko)</b>	Small (5-19)	44	113	119	611	<b>1151</b>
	Medium (20-99)	17	51	15	113	
	Large (100 or more)	7	31	4	24	
<b>Central Slovakia (Stredné Slovensko)</b>	Small (5-19)	25	69	89	429	<b>782</b>
	Medium (20-99)	10	33	11	71	
	Large (100 or more)	4	21	5	15	
<b>Eastern Slovakia (Východné Slovensko)</b>	Small (5-19)	12	31	56	194	<b>379</b>
	Medium (20-99)	6	16	5	36	
	Large (100 or more)	3	10	2	8	
		<b>141</b>	<b>415</b>	<b>372</b>	<b>1819</b>	<b>2748</b>

**Median Universe Estimates – Fresh:**

		Food	Other Manufacturing	Retail	Other Services	Grand Total
<b>Bratislava Region</b>	Small (5-19)	94	497	781	2600	<b>5477</b>
	Medium (20-99)	0	183	136	728	
	Large (100 or more)	0	94	62	261	
	Medium and Large (20+)	42	0	0	0	
<b>Western Slovakia (Západné Slovensko)</b>	Small (5-19)	223	919	733	2873	<b>6454</b>
	Medium (20-99)	99	473	107	608	
	Large (100 or more)	35	242	30	112

	Medium (20-99)	64	324	81	406	
	Large (100 or more)	22	178	30	75	
<b>Eastern Slovakia (Východné Slovensko)</b>	Small (5-19)	144	591	814	2158	<b>4928</b>
	Medium (20-99)	72	346	75	459	
	Large (100 or more)	24	146	18	81	

		<b>956</b>	<b>4593</b>	<b>3454</b>	<b>12520</b>	<b>21522</b>
--	--	------------	-------------	-------------	--------------	--------------

#### Weak Universe Estimates – Fresh:

		<b>Food</b>	<b>Other Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Bratislava Region</b>	Small (5-19)	119	734	1078	3612	<b>7797</b>
	Medium (20-99)	0	293	205	1099	
	Large (100 or more)	0	140	87	365	
	Medium and Large (20+)	65	0	0	0	
<b>Western Slovakia (Západné Slovensko)</b>	Small (5-19)	304	1451	1084	4271	<b>9868</b>
	Medium (20-99)	147	811	171	983	
	Large (100 or more)	49	386	44	168	
<b>Central Slovakia (Stredné Slovensko)</b>	Small (5-19)	178	904	828	3066	<b>6798</b>
	Medium (20-99)	91	531	124	626	
	Large (100 or more)	29	270	42	108	
<b>Eastern Slovakia (Východné Slovensko)</b>	Small (5-19)	180	853	1097	2928	<b>6862</b>
	Medium (20-99)	98	542	110	676	
	Large (100 or more)	30	213	24	111	
		<b>1290</b>	<b>7128</b>	<b>4894</b>	<b>18012</b>	<b>31325</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.34.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. For this survey there were zero non-responses for the sales variable, d2. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.05.<sup>69</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.53.

<sup>69</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

### Rejection rate and Interviews per Contact Slovakia ES, 2019

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Slovakia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

## A.35 Slovenia

### A.35.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 270 firms from the Slovenia 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of firms from Bisnode was used. The firms in the listing are all registered at the electronic One-stop shop - E-vem.

Regional stratification was done across two regions: Eastern Slovenia (NUTS code SI03) and Western Slovenia (SI04).

NUTS-3 regions	Grouping (NUTS-2 regions)
Pomurska	Eastern Slovenija
Podravska	
Koroska	
Savinjska	
Zasavska	
Spodnjeposavska	
Jugovzhodna Slovenija	
Notranjsko-kraska	
Osrednjeslovenska	Western Slovenija
Gorenjska	
Goriska	
Obalno-kraska	

### Slovenia ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
Eastern Slovenia	Small (5-19)	969	233	2025	4264
	Medium (20-99)	412	45	382	
	Large (100 or more)	147	9	42	

<b>Western Slovenia</b>	Small (5-19)	1299	341	3339	<b>6436</b>
	Medium (20-99)	396	71	714	
	Large (100 or more)	146	26	104	
		<b>3369</b>	<b>725</b>	<b>6606</b>	<b>10700</b>

Source: World Bank and Bisnode

### Slovenia Sample Frame (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Eastern Slovenia</b>	Small (5-19)	23	19	37	<b>135</b>
	Medium (20-99)	13	17	10	
	Large (100 or more)	9	4	3	
<b>Western Slovenia</b>	Small (5-19)	24	20	30	<b>135</b>
	Medium (20-99)	10	16	11	
	Large (100 or more)	6	13	5	
		<b>85</b>	<b>89</b>	<b>96</b>	<b>270</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

	Large (100 or more)	25	2	12	
<b>Western Slovenia</b>	Small (5-19)	7	3	22	<b>119</b>
	Medium (20-99)	15	17	4	
	Large (100 or more)	25	4	22	
		<b>105</b>	<b>50</b>	<b>79</b>	<b>234</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>Eastern Slovenia</b>	Small (5-19)	5	14	23	<b>85</b>
	Medium (20-99)	10	14	7	
	Large (100 or more)	7	3	2	
<b>Western Slovenia</b>	Small (5-19)	3	16	23	<b>81</b>
	Medium (20-99)	5	13	3	
	Large (100 or more)	5	10	3	
		<b>35</b>	<b>70</b>	<b>61</b>	<b>166</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 3.5% (147 out of 4199 establishments).<sup>70</sup>

<sup>70</sup> Based on out of target and ineligible contacts.

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
Eastern Slovenia	Small (5-19)	31	25	33	206
	Medium (20-99)	37	10	40	
	Large (100 or more)	24	1	5	
Western Slovenia	Small (5-19)	17	27	46	203
	Medium (20-99)	39	10	31	
	Large (100 or more)	22	4	7	
		170	77	162	409

#### Achieved Interviews (Panel)

		Manufacturing	Retail	Other Services	Grand Total
Eastern Slovenia	Small (5-19)	6	6	10	40
	Medium (20-99)	2	7	3	
	Large (100 or more)	5	1	0	
Western Slovenia	Small (5-19)	6	4	9	39
	Medium (20-99)	5	5	2	
	Large (100 or more)	2	4	2	
		26	27	26	79

#### A.35.2. Status Codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
970	Eligible	1. Eligible establishment (Correct name and address)	944
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	1
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	16
		4. Eligible establishment (Moved and traced)	3
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	6
2596	Screener refusal	13. Refuses to answer the screener	2596
47	Ineligible	5. The establishment has less than 5 permanent full time employees	13
		616. The firm discontinued businesses - (Establishment went bankrupt)	8
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	0
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	2
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	3
		621. The firm discontinued businesses - (Other)	4
		71. Ineligible legal status: not a business, but private household	1

		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	3
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	13
<b>100</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	2
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	0
		154. Out of target - establishment is HQ without production or sales of goods or services	1
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	0
		156. Duplicated firm within the sample	97
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>486</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	331
		92. Line out of order	0
		93. No tone	11
		94. Phone number does not exist	10
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	134
<b>4199</b>	<b>Total contacted</b>		

#### Response Outcomes: Slovenia ES 2019:

<b>Target and totals</b>	Sample target	400
	Sample target completion rate	102.3%
	Total contacts available in frame	10700
	Total contacts issued	4199
	Total contacts contacted	4199
<b>Screening phase</b>	Screening in process	0
	Eligibles	970
	Screener refusal	2596
	Ineligible + out of target	147
	Unobtainable	486
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	3
	Complete interviews with extra module	406
	Eligible in process + incomplete interviews	0
	Interview refusal	561
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	61.8%
	Ineligible + out of target rate	3.5%
	Unobtainable rate	11.6%
	Interview conversion rate	9.7%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	13.4%

### A.35.3. Universe estimates

Universe estimates for the number of establishments in each cell in Slovenia were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Slovenia were produced for the strict, weak and median eligibility definitions. Table shows the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Universe

		Manufacturing	Retail	Other Services	Grand Total
<b>Eastern Slovenia</b>	Small (5-19)	1402	361	2953	<b>6103</b>
	Medium (20-99)	540	52	506	
	Large (100 or more)	211	19	59	
<b>Western Slovenia</b>	Small (5-19)	1191	362	3579	<b>6520</b>
	Medium (20-99)	326	68	718	
	Large (100 or more)	126	41	109	
		<b>3796</b>	<b>903</b>	<b>7924</b>	<b>12623</b>

**Note:** The sampling frame used and the universe are from separate sources

##### Universe Estimates

		Manufacturing	Retail	Other Services	Grand Total
<b>Eastern Slovenia</b>	Small (5-19)	1402	361	2953	<b>6103</b>
	Medium (20-99)	540	52	506	
	Large (100 or more)	211	19	59	
<b>Western Slovenia</b>	Small (5-19)	1299	362	3579	<b>6721</b>
	Medium (20-99)	396	71	718	
	Large (100 or more)	146	41	109	
		<b>3994</b>	<b>906</b>	<b>7924</b>	<b>12824</b>

**Note:** Adjustments for strict, median and weak assumptions were not applied to universe estimates because the universe and the frame were from separate sources hence scenarios that apply to the frame cannot be assumed in the universe.

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.35.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.10.<sup>71</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.75.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Slovenia. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

---

<sup>71</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

### A.35.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Agency	Name: Ipsos Region: Slovenia One of the biggest research agencies in Slovenia, with the most comprehensive experience for social research, especially large F2F CAPI (or mixed mode) surveys with random probability sampling. Ipsos is a member of ESOMAR. Ipsos is a national partner of Study SuperBrands and National provider of Slovenian Online Audience Measurement Ipsos has also ISO standard 20252.
Recruiters involved:	Recruiters: 11. Interviewers: 35 Recruiters and Interviewers: 1
Other staff involved:	Data Processing: Ipsos was responsible for all data processing

#### Sample Frame:

Characteristic of sample frame used:	Electronic data base
Source:	Bisnode
Year:	July 2018
Comments on the quality of sample frame:	The sample frame was of reasonable quality. The main issues were telephone or email contact details which were incorrect or missing. The number of employees was also not always accurate. The sample contained some out of date information, including businesses that were no longer in operation and the number of employees was not always accurate or was missing.

#### Sample:

Comments/ problems for particular regions:	On regions: No problems regarding regions were detected.
Comments on the response rate:	The response rate was as expected. The sample for Slovenia was quite big. These wave 400 interviews had to be completed in comparison to previous wave, when 270 interviews were completed.
Comments on the sample design:	Slovenia needed the redesign of the sample. After redesign still some quotas were not able to be fulfilled. The most difficult sector to engage with/complete was the retail sector.
Other comments:	No

#### Fieldwork:

Date of Fieldwork	11 December 2018 to 25 November 2019
Country	Slovenia
Number of interviews	410
Problems found during fieldwork:	The sample frame had duplicated firms (panel vs. fresh). This was resolved in two ways. Firstly, local team conducted the second in-depth deduplication of sample during the fieldwork. Secondly, all duplicated firms were detected and only panel firms were interviewed. Weekly progress reports and database were updated in alignment with these actions The interview length meant that many business executives were reluctant to take part and recruiters had to work hard to convince them to participate.

	Some managers indicated that they were not allowed to participate in surveys concerning the activities of the enterprise, citing the terms of the contract, which included the clause - a trade secret.
Other observations:	The general attitude of the respondents to the survey was quite positive.

### Questionnaires:

Problems for the understanding of questions (indicate question number)	No significant problems were identified.
Problems found in the navigability of – questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	Almost all respondents commented about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	The respondents comment it would be better to have an option for online interview.

### Database

Data entry program chosen	iField
Comments on the data entry program	No
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	No significant aspects to be mentioned.
Relevant country events occurred during fieldwork:	In January mostly all companies have to provide the completed financial report to the AJPES so the fieldwork was slower. When recruiting they asked to be called after January. As Slovenia is small and there were a number of surveys in the field between March and May, by other survey companies, we were struggling with getting interviews with medium and large companies.
Other aspects:	No

## A.36 Tajikistan

### A.36.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 359 firms from the Tajikistan 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from the State Committee on Statistics of the Republic of Tajikistan was used. The establishments in the listing are all registered as businesses with the State Registry at the Ministry of Justice.

Regional stratification for the Tajikistan ES was done across four regions: Sughd, Dushanbe, Region of Republican Subordination, and Khatlon. For the purposes of achieving the thresholds

for representativeness, the ES indicators are calculated with some regions combined. In particular, Region of Republican Subordination and Khatlon are combined.

Official provinces	Grouping used for stratification purposes in BEEPS VI
Sughd	Sughd
RRP – Region of Republican Subordination	RRP – Region of Republican Subordination Dushanbe
Khatlon	Khatlon
Gorno-Badakhshan Autonomous Province	Not covered

#### Tajikistan ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	239	113	371	<b>1110</b>
	Medium (20-99)	160	25	142	
	Large (100 or more)	37	4	19	
<b>Dushanbe</b>	Small (5-19)	184	110	433	<b>1120</b>
	Medium (20-99)	93	40	179	
	Large (100 or more)	19	7	55	
<b>Region of Republican Subordination</b>	Small (5-19)	101	58	169	<b>487</b>
	Medium (20-99)	46	9	76	
	Large (100 or more)	9	2	17	
<b>Khatlon</b>	Small (5-19)	110	65	267	<b>651</b>
	Medium (20-99)	58	20	88	
	Large (100 or more)	22	6	15	
		<b>1078</b>	<b>459</b>	<b>1831</b>	<b>3368</b>

Source: World Bank and State Committee on Statistics of the Republic of Tajikistan

#### Tajikistan Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	27	23	10	<b>120</b>
	Medium (20-99)	14	13	20	
	Large (100 or more)	8	2	3	
<b>Dushanbe</b>	Small (5-19)	10	12	30	<b>112</b>
	Medium (20-99)	11	16	19	
	Large (100 or more)	5	4	5	
<b>Region of Republican Subordination</b>	Small (5-19)	12	14	5	<b>49</b>
	Medium (20-99)	4	4	4	
	Large (100 or more)	3	1	2	
<b>Khatlon</b>	Small (5-19)	12	11	16	<b>78</b>
	Medium (20-99)	13	10	12	
	Large (100 or more)	3	1	0	
		<b>122</b>	<b>111</b>	<b>126</b>	<b>359</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

#### Original Sample Design

##### Original Sample Design (Fresh)

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	8	4	13	<b>58</b>

	Medium (20-99)	6	5	5	
	Large (100 or more)	12	1	4	
<b>Dushanbe</b>	Small (5-19)	7	4	15	<b>57</b>
	Medium (20-99)	4	7	6	
	Large (100 or more)	6	1	7	
<b>Region of Republican Subordination</b>	Small (5-19)	4	4	6	<b>30</b>
	Medium (20-99)	3	2	3	
	Large (100 or more)	2	0	6	
<b>Khatlon</b>	Small (5-19)	4	3	9	<b>35</b>
	Medium (20-99)	2	2	3	
	Large (100 or more)	8	2	2	
		<b>66</b>	<b>35</b>	<b>79</b>	<b>180</b>

#### Original Sample Design (Panel)

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	7	17	5	<b>62</b>
	Medium (20-99)	11	10	2	
	Large (100 or more)	6	2	2	
<b>Dushanbe</b>	Small (5-19)	3	10	11	<b>63</b>
	Medium (20-99)	9	13	6	
	Large (100 or more)	4	3	4	
<b>Region of Republican Subordination</b>	Small (5-19)	3	11	2	<b>30</b>
	Medium (20-99)	3	3	3	
	Large (100 or more)	2	1	2	
<b>Khatlon</b>	Small (5-19)	2	6	2	<b>25</b>
	Medium (20-99)	2	8	2	
	Large (100 or more)	2	1	0	
		<b>54</b>	<b>85</b>	<b>41</b>	<b>180</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 15.9% (152 out of 955 establishments).<sup>72</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	21	10	20	<b>123</b>

### A.36.3. Universe estimates

Universe estimates for the number of establishments in each cell in Tajikistan were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Tajikistan were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

### Universe Estimate Based on Sampling Weights

#### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	143	57	137	<b>575</b>
	Medium (20-99)	120	16	66	
	Large (100 or more)	26	3	7	
<b>Dushanbe</b>	Small (5-19)	75	38	109	<b>372</b>
	Medium (20-99)	48	20	56	
	Large (100 or more)	8	3	15	
<b>Region of Republican Subordination</b>	Small (5-19)	42	21	44	<b>167</b>
	Medium (20-99)	24	0	25	
	Large (100 or more)	4	0	5	
	Medium and Large (20+)	0	3	0	
<b>Khatlon</b>	Small (5-19)	58	29	87	<b>282</b>
	Medium (20-99)	38	11	36	
	Large (100 or more)	13	4	5	
		<b>600</b>	<b>205</b>	<b>591</b>	<b>1396</b>

#### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	206	89	298	<b>910</b>
	Medium (20-99)	135	19	112	
	Large (100 or more)	31	4	15	
<b>Dushanbe</b>	Small (5-19)	139	77	306	<b>799</b>
	Medium (20-99)	69	28	124	
	Large (100 or more)	14	6	37	
<b>Region of Republican Subordination</b>	Small (5-19)	96	51	149	<b>439</b>
	Medium (20-99)	43	0	66	
	Large (100 or more)	8	0	14	
	Medium and Large (20+)	0	12	0	
<b>Khatlon</b>	Small (5-19)	100	54	226	<b>557</b>
	Medium (20-99)	52	16	73	
	Large (100 or more)	19	5	12

#### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>Sughd</b>	Small (5-19)	231	107	330	<b>1006</b>

	Medium (20-99)	147	22	120	
	Large (100 or more)	31	4	14	
<b>Dushanbe</b>	Small (5-19)	161	94	349	<b>909</b>
	Medium (20-99)	77	33	137	
	Large (100 or more)	14	6	38	
<b>Region of Republican Subordination</b>	Small (5-19)	98	55	152	<b>445</b>
	Medium (20-99)	43	0	65	
	Large (100 or more)	7	0	13	
	Medium and Large (20+)	0	12	0	
<b>Khatlon</b>	Small (5-19)	110	63	246	<b>605</b>
	Medium (20-99)	55	19	77	
	Large (100 or more)	19	5	12	
		<b>994</b>	<b>420</b>	<b>1552</b>	<b>2966</b>

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.36.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.39.<sup>73</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.38.

<sup>73</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Tajikistan. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.36.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: SIAR Research and Consulting Group Region: Republic of Tajikistan SIAR Research and Consulting Group (SIAR), has grown from the SIAR Social and Marketing Research Center, which was established in 1993 in Baku, Azerbaijan, and is currently a leader of research market in Azerbaijan. Besides the Center, SIAR currently also includes SIAR Media (engaged in media and advertisement researches), SIAR Consulting (engaged in research-based consultancy), SIAR Healthcare (engaged in healthcare research), SIAR Tracking (tracking projects). In terms of geographical coverage, SIAR conducts researches within the whole territory of Azerbaijan, Georgia, Moldova as well as all five countries of the Central Asian region: Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan. Activities since: 1993
Enumerators involved:	Enumerators: 52 Recruiters: 8
Other staff involved:	Fieldwork Coordinators: 4 regional supervisors Editing: 1 Data Entry: 5 Data Processing: Ipsos was responsible for all data processing

#### Sample Frame

Characteristic of sample frame used:	List of companies with relevant columns/variables
Source:	State Committee on Statistics of the Republic of Tajikistan
Year:	The sample frame was directly sent to WB and EBRD by the State Committee on Statistics of the Republic of Tajikistan, and thus we do not possess information on Year
Comments on the quality of sample frame:	The sample frame contained quite outdated data about a fairly large number of enterprises. Some enterprises were liquidated or moved. The sample frame contained quite a large number of wrong phone numbers and addresses. Information on the size of enterprise and its field of activity was not always accurate.

## Sample

Comments/ problems for particular regions:	On regions: In general, there were no problems in individual regions.
Comments on the response rate:	As can be seen, about 38% of contacted records refused to be interviewed. This is considered a good result for the Republic of Tajikistan, given that this indicator includes quite a large number of soft refusals too.
Comments on the sample design:	Overall, the sample design served well and made work easier. In order to distinguish the enterprises of the same name by field of activity, more detailed stratification industry would be useful.
Other comments:	No

## Fieldwork

Date of Fieldwork	01 January to 28 August 2019
Country	The Republic of Tajikistan
Number of interviews	373
Problems found during fieldwork:	The sample frame contained quite outdated data about a fairly large number of enterprises. Information on the size of enterprise and its field of activity was not always accurate. Significant efforts were made to persuade businesses to conduct an interview, convincing that their answers are very important for research of business climate of country.
Other observations:	The general attitude of the respondents to the survey was quite positive.

## Questionnaires

Problems for the understanding of questions (indicate question number)	J30, BMB.8, BMB.8, h1, BMGC.1, BMGE.1
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	Almost all respondents, despite positive attitude to the survey, complained about the length of the questionnaire.
Suggestions or other comments on the questionnaire:	No

## Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

## Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Overall, a calm economic and political situation was observed in the Republic of Tajikistan during the fieldwork.
---	---

Relevant country events occurred during fieldwork:	<p>The massive sporting events were held in honor of the Day of the Armed Forces of Tajikistan. Competitions took place in the Republic on February 22 and 23.</p> <p>Central Asian DUst Conference (CADUC) was held on 8 - 12 April 2019 at the Academy of Sciences of the Republic of Tajikistan. Goal of the Central Asian DUst Conference is to bring scientists together and to gain more insight into the different aspects of Asian dust: its properties, its sources, its transport mechanisms and processes, its effects on humans and economies, and finally on its sinks.</p> <p>Dushanbe hosted the High-level Conference “International and Regional Cooperation on Countering Terrorism and Its Financing Through Illicit Drug Trafficking and Organized Crime”. The Conference was convened by the Government of the Republic of Tajikistan in close cooperation with the United Nations, the European Union and the Organization for Security and Co-operation in Europe from 16 to 17 May, 2019 in Dushanbe. CTED participated in a two-day high-level conference on “International and Regional Co-operation on Countering Terrorism and Its Financing through Illicit Drug Trafficking and Organized Crime”, held in Dushanbe on 16 and 17 May 2019.</p> <p>Conference on Interaction and Confidence-Building Measures in Asia (CICA) was held in Dushanbe on June 14-15.</p> <p>The Committee of Tourism Development under the Government of the Republic of Tajikistan host the 2019 International Tourism Forum and Exhibition of Tajikistan in the capital city of Dushanbe on 8-10 August 2019.</p> <p>Summer Festival 2019 was held on 17 August of 2019 in Dushanbe.</p>
Other aspects:	No

### **A.37 Tunisia**

#### **A.37.1. Sampling structure and implementation**

#### **A.37.2. Status codes**

#### **A.37.3. Universe estimates**

#### **A.37.4. Non-response**

### **A.38 Turkey**

#### **A.38.1. Sampling structure and implementation**

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 1344 firms from the Turkey 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of firms from the Turkish Statistical Institute (TUIK) was used, dated as of June 2018. The firms in the listing are all registered as businesses with the Trade Registry Office. Note that TUIK provided a subset of the full listing, this subset was selected randomly following the ES methodology. The ES team used this subset for the standard sampling procedures.

Regional stratification for the Turkey ES was done at the NUTS-1 level (12 regions), namely, Istanbul Region (TR1), West Marmara Region (TR2), East Marmara Region (TR4), Aegean Region (TR3), West Anatolia Region (TR5), Central Anatolia Region (TR7), Mediterranean Region (TR6), West Black Sea Region (TR8), East Black Sea Region (TR9), Northeast Anatolia Region (TRA), Central East Anatolia Region (TRB), Southeast Anatolia Region (TRC).

<b>NUTS-3 provinces</b>	<b>NUTS-2 regions</b>	<b>NUTS-1 regions</b>	<b>Grouping to be used for stratification purposes in BEEPS VI</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 1.4% (80 out of 5552 establishments).<sup>74</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		Food	Textiles	Garments	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Construction	Retail	Other Services	Grand Total
<b>Northeast Anatolia</b>	Small (5-19)	19			3	1	8	11	12	13	<b>139</b>

**A.38.2. Status codes**

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>1857</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	1649
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	40
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	20
		4. Eligible establishment (Moved and traced)	148
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
<b>381</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	<b>381</b>
<b>78</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	2
		616. The firm discontinued businesses - (Establishment went bankrupt)	29
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	4
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	4
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	22
		621. The firm discontinued businesses - (Other)	5
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	2
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	10
<b>7</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	2
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	5
		156. Duplicated firm within the sample	0
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
<b>3229</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	1498
		92. Line out of order	5
		93. No tone	1
		94. Phone number does not exist	1725
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	0
<b>5552</b>	<b>Total contacted</b>		

## Response Outcomes: Turkey ES 2019

<b>Target and totals</b>	Sample target	1680
	Sample target completion rate	99.0%

	Total contacts contacted	5552
<b>Screening phase</b>	Screening in process	0
	Eligibles	1857
	Screener refusal	381
	Ineligible + out of target	85
	Unobtainable	3229
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	26
	Complete interviews with extra module	1637
	Eligible in process + incomplete interviews	61
	Interview refusal	47
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	6.9%
	Ineligible + out of target rate	1.5%
	Unobtainable rate	58.2%
	Interview conversion rate	30.0%
	Eligible in process + incomplete interviews rate	1.1%
	Interview refusal rate	0.8%

### A.38.3. Universe estimates

Universe estimates for the number of establishments in each cell in Turkey were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Turkey were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**

**Strict Universe Estimates – Fresh:**

		Food	Textiles	Garments	Fabricated Metal Products	Machinery and Equipment	Other Manufacturing	Construction	Retail	Other Services	Grand Total

### A.38.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary.

As the following graph shows, the number of interviews per contacted establishments was 0.30.<sup>75</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.08.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Turkey. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.38.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: Yöntem Research Region: Turkey Membership of international organizations: ESOMAR Listing member Activities since: 1988
Enumerators involved:	Enumerators:82 Recruiters: 69  As the sample frame contained many missing or wrong contact information, some of the enumerators went directly to the offices to arrange an appointment.
Other staff involved:	Fieldwork Coordinators

<sup>75</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

	<p>Editing</p> <p>Data Entry: Data entry is done consecutively during the interview via CAPI system</p> <p>Data Processing</p>
--	--

### Sample Frame

Characteristic of sample frame used:	Sample frame is representative of Turkish establishment universe stratified by NUTS1 region, sector and size.
Source:	TURKSTAT
Year:	2017
Comments on the quality of sample frame:	Contact details for most of the firms in the sample; were not valid or even not available in the provided list. A desk research longer than the planned time and effort is conducted to obtain that contact information. However, for a large amount of sample, the address information was needed to be validated at its location. This enlengthened the project duration for getting in touch with the firms.

### Sample

Comments/ problems for particular regions:	Some of the cities especially in the East side of Turkey are geographically far away from each other although they are classified in the same region in the sampling. Hence, completing the quota in these regions required some extraordinary time. Secondly, most of the small and medium companies in the east side of Turkey do not have even any website so extra desk researches – which is mentioned above- could not be applied for these companies if sample does not contain the contact details of these companies. For these companies, validation of the company’s existence and location required going to the address.
Comments on the response rate:	Unlike previous waves of Enterprise Survey, it is observed that; Willingness to participate an interview has significantly decreased Even if the respondent accepted to participate, they hesitate to share information thinking that these are confidential However, due to sociological and political situations in Turkey this can be observed for our other studies in Turkey regardless of the topic.
Comments on the sample design:	The sample and quotas are designed based on geographical regions in which different cities are covered. However, in the NUTS1 classification, some cities in the same NUTS1 region are distant located. This was considered during the bidding and planning stage. However, the panel firms were not inline with this. As there were very limited panel firms, the sample provided in the same cells was limited. The enumerators went to the remote areas for arranging and conducting the interviews. However, in the cases where the quota is not reached and additional panel sample is obtained later, travelling to those remote locations again was both challenging and demotivating for the enumerators. Maybe, in the future rounds of this survey, at least the all panel firms may be provided from the very beginning of the survey.
Other comments:	During the fieldwork, the quotas had been revised by the approval of EBRD officials because of the insufficient sample list. That highlights the importance of the validation of the sample list provided.

### Fieldwork

Date of Fieldwork	24th Sept 2018 – 3rd June 2019
Country	Turkey
Number of interviews	1668
Problems found during fieldwork:	Due to political and economic situation of the country, the business environment had a stress. All the businesses were struggling to survive in the world of uncertainties. Hence, arranging and appointment didn't mean much during the fieldwork and there were many last-minute cancellations.
Other observations:	

### Questionnaires

Problems for the understanding of questions (indicate question number)	Profile of the entrepreneurs is very low in Turkey. Especially for small and medium sized companies the respondents are not good at understanding the questions. Even after a good explanation, some questions still do not mean anything for the respondents. However, for the large companies this was not a problem.
Problems found in the navigability of –questionnaires (for example, skip patterns).	No specific problems observed
Comments on questionnaires length:	The questionnaire was found to be very long to be answered within busy working hours. As it covers various aspects of business environment, sometimes more than one respondent was required and this definitely extended the duration of interview.
Suggestions or other comments on the questionnaire:	For the detailed questions like the leasing of building or land, a two-step question can be designed in a two different step, a yes/no question can be asked first to check the availability of any leased real estate, and then if the respondents say yes, then the second detailed question can be asked whether it is land or building and their percentages. This may decrease the confusion of low-profile entrepreneurs and the responses may be more reliable.

### Database

Data entry program chosen	In house
Comments on the data entry program	As in-house built CAPI system has been used in the project, interviewers were all familiar with the system which they can practically use. However, the same reason, using in house CAPI system, lead a challenge in the scripting and data checking phases. Thanks to setting up a strict script controls at the very beginning of the project enables us to proceed smoothly.
Comments on the data cleaning	Response rates relatively increased via call backs especially for financial questions. The respondents hesitate to answer financial questions at the beginning of the questionnaires like annual sale question which relatively take part at the beginning of the questionnaire. As the interview is being continued they got used to the questionnaire, however this time as they got tired because of the long time they spent with us, they were not willing to answer N section. But when it comes to call backs, the respondent felt more relaxed and had already became familiar with us and questionnaire so they didn't hesitate that much to give the answers even on the phone.

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Due to the economic crisis in Turkey, a considerable number of firms went bankrupt. Others who have not gone bankrupt were struggling to survive. It affected our screening process negatively. As mentioned above, due to current political and social conjuncture of Turkey, it is observed that people became unwilling to declare some ideas and/or information for any kind of questionnaire even it is a B2B study.
Relevant country events occurred during fieldwork:	After project award Turkey has experienced 3 elections. And Istanbul, the finance capital of Turkey had even one more. This affected the screening and also responses of the respondents. Moreover, one-week Bayram holiday and Ramadan time coincide with fieldwork which did not negatively affect the project at all.
Other aspects:	

## A.39 Ukraine

### A.39.1. Sampling structure and implementation

The sample frame consisted of listings of establishments from two sources: for panel firms, the list of 831 firms from the Ukraine 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from UA-Region, was used. The establishments in the listing are all received the approval of Ministry of Internal Affairs to prepare a company seal.

Regional stratification for the Ukraine ES was done across eight regions: West, Sumska, Zaporizka; Vinnytska, Zhytomyrska; Dnipropetrovska, Kharkivska; Kirovohradska, Poltavvska; Cherkaska, Chernihivska; Khersonska, Mykolaivska, Odeska; and Kyiv.

Regions of Ukraine	Grouping used for stratification purposes in BEEPS VI	Grouping in the dataset

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 10.9% (1640 out of 15018 establishments).<sup>76</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

<sup>76</sup> Based on out of target and ineligible contacts.

### A.39.2. Status Codes

<b>0</b>	<b>Screening in process</b>	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
<b>4696</b>	<b>Eligible</b>	1. Eligible establishment (Correct name and address)	4653
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	5
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	13
		4. Eligible establishment (Moved and traced)	23
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	2
<b>2476</b>	<b>Screener refusal</b>	13. Refuses to answer the screener	2476
<b>1546</b>	<b>Ineligible</b>	5. The establishment has less than 5 permanent full time employees	83
		616. The firm discontinued businesses - (Establishment went bankrupt)	14
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	43
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	9
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	749
		621. The firm discontinued businesses - (Other)	79
		71. Ineligible legal status: not a business, but private household	107
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	149
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	313
<b>94</b>	<b>Out of Target</b>	151. Out of target - outside the covered regions	12
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	3
		154. Out of target - establishment is HQ without production or sales of goods or services	8
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	30
		156. Duplicated firm within the sample	20
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	21
<b>6206</b>	<b>Unobtainable</b>	91. No reply after having called in different days of the week and in different business hours	2100
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	4106
<b>15018</b>	<b>Total contacted</b>		

## Response Outcomes: Ukraine ES 2019

<b>Target and totals</b>	Sample target	1320
	Sample target completion rate	101.3%
	Total contacts available in frame	55250
	Total contacts issued	15290
	Total contacts contacted	15018
<b>Screening phase</b>	Screening in process	0
	Eligibles	4696
	Screener refusal	2476
	Ineligible + out of target	1640
	Unobtainable	6206
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	2
	Complete interviews with extra module	1335
	Eligible in process + incomplete interviews	8
	Interview refusal	3351
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	16.5%
	Ineligible + out of target rate	10.9%
	Unobtainable rate	41.3%
	Interview conversion rate	8.9%
	Eligible in process + incomplete interviews rate	0.1%
	Interview refusal rate	22.3%

### A.39.3. Universe estimates

Universe estimates for the number of establishments in each cell in Ukraine were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Ukraine were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

## Universe Estimate Based on Sampling Weights

	Medium (20-99)	73	23	47	23	32	160	65	463	
	Large (100 or more)	61	13	21	10	17	50	14	80	
		<b>2705</b>	<b>944</b>	<b>1293</b>	<b>1371</b>	<b>1192</b>	<b>8067</b>	<b>4716</b>	<b>36283</b>	<b>56571</b>

**Note:** Adjustments for strict, median and weak assumptions were not applied to universe estimates because the universe and the frame were from separate sources hence scenarios that apply to the frame cannot be assumed in the universe.

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

### A.39.4. Non-Response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.09.<sup>77</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.39.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Ukraine. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

### A.39.5. Local agency team involved in the study and its comments on the implementation

#### Local agency team involved in the survey

Local Agency	Name: Ipsos Ukraine Region: Ukraine
--------------	--

<sup>77</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

	<ul style="list-style-type: none"> <li>As the member of ESOMAR, Ipsos subscribes to the ICC/ESOMAR International Code On Market And Social Research and ensures compliance of every aspect of our work with the standards set by the Code.</li> <li>As a member of the Ukrainian Association of Marketing, Ipsos subscribes to the UAM standard of quality and its ethics code.</li> </ul>
Enumerators involved:	Enumerators: 52 (some also done recruitment) Recruiters: 30.
Other staff involved:	Fieldwork Coordinators: 14 regional and central supervisors Editing: 1 Data Entry: 2-3 Data Processing: Ipsos was responsible for all data processing

### Sample Frame

Characteristic of sample frame used:	Electronic data base
Source:	UA-Region
Year:	May 2018
Comments on the quality of sample frame:	The quality of the sample frame was poor. A significant proportion of the contact information was inaccurate and the sample frame also included a lot of entities that are not operational. We tried to work with other sample frame sources, but they are either very expensive or have same bad quality.

### Sample

Comments/ problems for particular regions:	In large cities the response rate was lower than in small ones, CATI recruitment works better. In small cities F2F recruitment is better.
Comments on the response rate:	Response rate is very low because senior managers and their secretaries do not to trust any type of surveys.
Comments on the sample design:	
Other comments:	No

### Fieldwork

Date of Fieldwork	2 February 2019 to 26 December 2019
Country	Ukraine
Number of interviews	1344
Problems found during fieldwork:	<ul style="list-style-type: none"> <li>The sample frame contained a lot of incorrect contact information. CATI recruiters had to spend additional time searching for valid contact data in the internet.</li> <li>The questionnaire is too long; senior managers are reluctant to spend this much time participating in a survey.</li> <li>The questionnaire requires collection of a lot of sensitive information which not all respondents are willing to share.</li> <li>Response rate is very low because senior managers and their secretaries do not to trust any type of surveys. In a small percentage of cases, letters with additional information sent by email was helpful.</li> </ul>
Other observations:	

### Questionnaires

Problems for the understanding of questions (indicate question number)	There were no issues with it. Manual with all questions was really helpful for this.
--	--

Problems found in the navigability of –questionnaires (for example, skip patterns).	
Comments on questionnaires length:	Almost all of respondents complained about the excessive length of the interview, which meant they were distracted from their main duties.
Suggestions or other comments on the questionnaire:	No

#### Database

Data entry program chosen	iField
Comments on the data entry program	N/A
Comments on the data cleaning	No

#### Country/ region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	<ul style="list-style-type: none"> <li>• During the fieldwork period presidential (31 March and 21 April 2019) and parliamentary (21 July 2019) elections were held. Some respondents thought that our survey is connected to politics, that it why they refused to participate.</li> <li>• Occupation of part of West Ukraine and Crimea</li> </ul>
Relevant country events occurred during fieldwork:	Same as above
Other aspects:	No

## A.40 Uzbekistan

### A.40.1. Sampling structure and implementation

The sample frame consisted of listings of establishments from two sources: for panel firms, the list of 390 firms from the Uzbekistan 2013 ES was used; and for fresh firms (i.e., firms not covered in 2013), a listing of establishments from State Committee of the Republic of Uzbekistan on Statistics, 3rd quarter of 2018, was used. The establishments in the listing are all registered as businesses with the local authority (khokimiyat) and obtain the certificate of state registration.

Regional stratification for the Uzbekistan ES was done across nine regions: Andijan Region, Fergana Region, Qashqadaryo Region, Samarqand Region, Tashkent Region, Tashkent, Karakalpakstan, Navoiy and Jizzakh Region, and Surxondaryo Region.

Provinces	Grouping used for stratification purposes in BEEPS VI
Andijan Region	Andijan Region
Fergana Region	Fergana Region
Qashqadaryo Region	Qashqadaryo Region
Samarqand Region	Samarqand Region
Tashkent Region	Tashkent Region
Tashkent	Tashkent
Karakalpakstan	Karakalpakstan
Navoiy Region	Navoiy and Jizzakh Region
Jizzakh Region	
Bukhara Region	Not covered
Surxondaryo Region	Surxondaryo Region
Sirdaryo Region	Not covered

Xorazm Region	Not covered
Namangan Region	Not covered

		<b>17</b>	<b>15</b>	<b>5</b>	<b>5</b>	<b>11</b>	<b>28</b>	<b>56</b>	<b>58</b>	<b>195</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 7.4% (242 out of 3268 establishments).<sup>78</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

**Achieved Interviews (Fresh and Panel Combined)**

		Food	Textiles	Garments	Rubber and Plastics Products	Non Metallic Mineral Products	Other Manufacturing	Retail	Other Services	Grand Total

### A.40.2. Status codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
1313	Eligible	1. Eligible establishment (Correct name and address)	1265
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	12
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	7
		4. Eligible establishment (Moved and traced)	22
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	7
1114	Screener refusal	13. Refuses to answer the screener	1114
241	Ineligible	5. The establishment has less than 5 permanent full time employees	30
		616. The firm discontinued businesses - (Establishment went bankrupt)	48
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	19
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	4
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	29
		621. The firm discontinued businesses - (Other)	29
		71. Ineligible legal status: not a business, but private household	51
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	10
14	Out of Target	8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	21
		151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	1
		154. Out of target - establishment is HQ without production or sales of goods or services	1
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	10
		156. Duplicated firm within the sample	2
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0
586	Unobtainable	91. No reply after having called in different days of the week and in different business hours	4
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	582
3268	Total contacted		

Response Outcomes: Uzbekistan ES 2019

<b>Target and totals</b>	Sample target	1200
	Sample target completion rate	103.3%
	Total contacts available in frame	34396
	Total contacts issued	3454
	Total contacts contacted	3268
<b>Screening phase</b>	Screening in process	0
	Eligibles	1313
	Screener refusal	1114
	Ineligible + out of target	255
	Unobtainable	586
<b>Interview phase (only if eligible)</b>	Complete interviews without extra module	36
	Complete interviews with extra module	1203
	Eligible in process + incomplete interviews	0
	Interview refusal	73
<b>Percent breakdown (relative to total contacted)</b>	Screening in process rate	0.0%
	Screener refusal rate	34.1%
	Ineligible + out of target rate	7.8%
	Unobtainable rate	17.9%
	Interview conversion rate	37.9%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	2.2%

### A.40.3. Universe estimates

Universe estimates for the number of establishments in each cell in Uzbekistan were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Universe estimates for the number of establishments in each industry-region-size cell in Uzbekistan were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

**Universe Estimate Based on Sampling Weights**  
**Strict Universe Estimates – Fresh:**

		Food	Textiles	Garments	Rubber and Plastics Products	Non Metallic Mineral Products	Other Manufacturing	Retail	Other Services	Grand Total

Once an accurate estimate of the universe cell projection was made, weights for the probability of selection were computed using the number of completed interviews for each cell.

#### A.40.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.38.<sup>79</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.36.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to Uzbekistan. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.

---

<sup>79</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

## A.40.5. Local agency team involved in the study and its comments on the implementation

### Local agency team involved in the survey

Local Agency	<p>Name: SIAR Research and Consulting Group  Region: Republic of Uzbekistan  SIAR Research and Consulting Group (SIAR), has grown from the SIAR Social and Marketing Research Center, which was established in 1993 in Baku, Azerbaijan, and is currently a leader of research market in Azerbaijan.</p> <p>Besides the Center, SIAR currently also includes SIAR Media (engaged in media and advertisement researches), SIAR Consulting (engaged in research-based consultancy), SIAR Healthcare (engaged in healthcare research), SIAR Tracking (tracking projects).</p> <p>In terms of geographical coverage, SIAR conducts researches within the whole territory of Azerbaijan, Georgia, Moldova as well as all five countries of the Central Asian region: Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan.</p> <p>Activities since: 1993</p>
Enumerators involved:	<p>Enumerators: 57  Recruiters: 9</p>
Other staff involved:	<p>Fieldwork Coordinators: 9 regional supervisors  Editing: 1  Data Entry: 5  Data Processing: Ipsos was responsible for all data processing</p>

### Sample Frame

Characteristic of sample frame used:	List of companies with relevant columns/variables
Source:	The State Committee of the Republic of Uzbekistan
Year:	2018
Comments on the quality of sample frame:	The sample frame contained quite outdated data for a fairly large number of enterprises. Many enterprises were liquidated or moved, company names in some cases were incomplete. The sample contained quite a larger number of wrong phone numbers, numbers without city code and addresses. Information on the size of enterprise and its field of activity was not always accurate.

### Sample

Comments/ problems for particular regions:	<p>On regions:  In general, there were no problems in individual regions. It should be noted that fieldwork was significantly complicated by the large distances between enterprises in the Tashkent region. When a recruiter made an appointment with three companies in the same city for one interviewer per day, most often, when interviewer arrived at the enterprise at the scheduled time, the management was absent and the interview was postponed. On average, the interviewer was able to conduct no more than one interview per day due to the large distances between enterprises in the Tashkent region, which deviated from the target we planned.</p>
Comments on the response rate:	As can be seen, approximately 34% of enterprises contacted in the sample frame refused to be interviewed. This is considered a good result for the Republic of Uzbekistan.

Comments on the sample design:	Overall, the sample design served well and made work easier. The real activities of enterprises often did not coincide with the indicated stratification sector in the sample design.
Other comments:	No

### Fieldwork

Date of Fieldwork	01 February to 31 August 2019
Country	The Republic of Uzbekistan
Number of interviews	1254
Problems found during fieldwork:	The sample frame contained quite outdated data about a fairly large number of enterprises. Information on the size of enterprise and its field of activity was not always accurate. Significant efforts were made to persuade businesses to conduct an interview, convincing that their answers are very important for research of business climate of country.
Other observations:	The general attitude of the respondents to the survey was quite positive.

### Questionnaires

Problems for the understanding of questions (indicate question number)	K.7
Problems found in the navigability of –questionnaires (for example, skip patterns).	No significant problems were identified.
Comments on questionnaires length:	Often respondents, despite positive attitude to the survey, complained about the length of the questionnaire, which led to additional visits on other days.
Suggestions or other comments on the questionnaire:	No

### Database

Data entry program chosen	iField
Comments on the data entry program	No
Comments on the data cleaning	No

### Country/region situation

General aspects of economic, political or social situation of the country/region that could affect the results of the survey:	Overall, a calm economic and political situation was observed in the Republic of Uzbekistan during the fieldwork. It should be noted that taxes and other mandatory payments have changed a lot from January 2019. Starting from January 1, 2019, only legal entities with an annual turnover (revenue) not exceeding 1 billion soms at the end of 2018 will be able to pay a single tax payment. In 2018, the criteria for paying a single tax payment was the number of employees and the implementation of a certain type of activity. The size of the annual turnover (revenue) for the possibility of paying a single tax payment was not taken into account.
Relevant country events occurred during fieldwork:	Uzbekistan took 64th place in the Paying Taxes 2019 tax rating, which is conducted by PwC in cooperation with the World Bank. According to the study, the total tax rate of Uzbekistan is 32.1 percent, which represents the proportion of taxes and contributions to the company's profits.

	<p>Regional Radiocommunication Seminar 2019 for CIS and neighbouring countries was held on 10-14 Jun 2019.</p> <p>International Conference with speakers from Russia, Ukraine, Kazakhstan, Uzbekistan for pharmaceutical business, creating opportunity for searching partners on the distribution and promotion of pharmaceutical products was held in Uzbekistan on 14 March 2019.</p> <p>Central Asia Climate Change Conference 2019, organized by the Climate Adaptation and Mitigation Program for Aral Sea Basin, the World Bank and partners was held in Tashkent on 3-4 April 2019.</p> <p>Uzbekistan International Oil &amp; Gas Exhibition &amp; Conference. The OGU exhibition is a unique event among oil and gas industry forums. The event offers a high-level business platform for presenting the latest achievements and developments for international oil and gas companies, and is the central meeting place to network with suppliers and producers. The event was held on 15 - 17 May 2019 in Tashkent.</p>
Other aspects:	<p>It is important to note that the changes in tax laws in the country could have an impact on survey. As it was mentioned above, the tax was introduced for enterprises, annual turnover of which exceeded 1 billion soms. Some companies began to close and to divide into small firms in order to avoid paying tax. Also, enterprises changed locations due to the increase in rents.</p>

## A.41 West Bank and Gaza

### A.41.1. Sampling structure and implementation

The sample frame consisted of listings of firms from two sources: For panel firms, the list of 434 firms from the West Bank and Gaza 2013 ES was used and for fresh firms (i.e., firms not covered in 2013), the PCBS database was used.

Regional stratification was defined in two (the West Bank / Gaza) regions (city and the surrounding business area) throughout the West Bank and Gaza.

Districts	Grouping to be used for stratification purposes in BEEPS VI
The West Bank (including East Jerusalem)	The West Bank
Gaza Strip	Gaza

### West Bank and Gaza ES Sample Frame (Fresh and Panel Combined)

		Manufacturing	Retail	Other Services	Grand Total
<b>West Bank</b>	Small (5-19)	95	83	84	<b>489</b>
	Medium (20-99)	48	34	49	
	Large (100 or more)	46	9	41	
<b>Gaza Strip</b>	Small (5-19)	46	44	44	<b>272</b>
	Medium (20-99)	35	51	30	
	Large (100 or more)	7	3	12	
		<b>277</b>	<b>224</b>	<b>260</b>	<b>761</b>

Source: World Bank and PCBS

### West Bank and Gaza ES Sample Frame (Panel)

		Manufacturing	Retail	Other Services	Grand Total
--	--	---------------	--------	----------------	-------------

<b>West Bank</b>	Small (5-19)	69	65	71	<b>295</b>
	Medium (20-99)	25	10	36	
	Large (100 or more)	13	0	6	
<b>Gaza Strip</b>	Small (5-19)	26	31	30	<b>139</b>
	Medium (20-99)	23	6	19	
	Large (100 or more)	2	0	2	
		<b>158</b>	<b>112</b>	<b>164</b>	<b>434</b>

Necessary measures were taken to ensure the quality of the frame; however, the sample frame was not immune to the typical problems found in establishment surveys: positive rates of non-eligibility, repetition, non-existent units, etc.

### Original Sample Design

#### Original Sample Design (Fresh)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>West Bank</b>	Small (5-19)	32	34	28	<b>210</b>
	Medium (20-99)	18	18	18	
	Large (100 or more)	27	8	27	
<b>Gaza Strip</b>	Small (5-19)	20	25	21	<b>150</b>
	Medium (20-99)	17	33	16	
	Large (100 or more)	6	2	10	
		<b>120</b>	<b>120</b>	<b>120</b>	<b>360</b>

#### Original Sample Design (Panel)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>West Bank</b>	Small (5-19)	15	15	15	<b>98</b>
	Medium (20-99)	15	8	15	
	Large (100 or more)	10	0	5	
<b>Gaza Strip</b>	Small (5-19)	15	15	15	<b>83</b>
	Medium (20-99)	15	5	14	
	Large (100 or more)	2	0	2	
		<b>72</b>	<b>43</b>	<b>66</b>	<b>181</b>

Given the impact that non-eligible units included in the sample universe may have on the results, adjustments may be needed when computing the appropriate weights for individual observations. The percentage of confirmed non-eligible units as a proportion of the total number of sampled establishments contacted for the survey was 18.6% (90 out of 481 establishments).<sup>80</sup>

Breaking down by industry and size, the following sample targets were achieved (based on the sampling information):

#### Achieved Interviews (Fresh and Panel Combined)

		<b>Manufacturing</b>	<b>Retail</b>	<b>Other Services</b>	<b>Grand Total</b>
<b>West Bank</b>	Small (5-19)	32	25	31	<b>205</b>
	Medium (20-99)	19	18	18	
	Large (100 or more)	26	7	29	
<b>Gaza Strip</b>	Small (5-19)	26	26	23	<b>160</b>
	Medium (20-99)	19	34	16	
	Large (100 or more)	6	1	9	
		<b>128</b>	<b>111</b>	<b>126</b>	<b>365</b>

<sup>80</sup> Based on out of target and ineligible contacts.

### Achieved Interviews (Panel)

		Manufacturing	Retail	Other Services	Grand Total
West Bank	Small (5-19)	14	17	27	88
	Medium (20-99)	7	4	13	
	Large (100 or more)	4	0	2	
Gaza Strip	Small (5-19)	16	23	19	94
	Medium (20-99)	17	2	14	
	Large (100 or more)	2	0	1	
		60	46	76	182

### A.41.2. Status codes

0	Screening in process	14. In process (the establishment is being called/ is being contacted - previous to ask the screener)	0
366	Eligible	1. Eligible establishment (Correct name and address)	366
		2. Eligible establishment (Different name but same address - the new firm/establishment bought the original firm/establishment)	0
		3. Eligible establishment (Different name but same address - the firm/establishment changed its name)	0
		4. Eligible establishment (Moved and traced)	0
		16. Eligible establishment (Panel Firm - now less than five employees; this code applies only to panel firms.)	0
25	Screener refusal	13. Refuses to answer the screener	25
75	Ineligible	5. The establishment has less than 5 permanent full time employees	11
		616. The firm discontinued businesses - (Establishment went bankrupt)	0
		618. The firm discontinued businesses - (Original establishment disappeared and is now a different firm)	1
		619. The firm discontinued businesses - (Establishment was bought out by another firm)	0
		620. The firm discontinued businesses - (It was impossible to determine for what reason)	0
		621. The firm discontinued businesses - (Other)	59
		71. Ineligible legal status: not a business, but private household	0
		72. Ineligible legal status: cooperatives, non-profit organizations, etc.	2
		8. Ineligible activity: Education, Agriculture, Finances, Government, etc.	2
15	Out of Target	151. Out of target - outside the covered regions	0
		152. Out of target - moved abroad	0
		153. Out of target - Not registered with Statistical Authority	5
		154. Out of target - establishment is HQ without production or sales of goods or services	0
		155. Out of target - establishment was not in operation for the entirety of last fiscal year	1
		156. Duplicated firm within the sample	9
		157. Out of target - location that is not HQ and does not have financial statements prepared separately	0

0	Unobtainable	91. No reply after having called in different days of the week and in different business hours	0
		92. Line out of order	0
		93. No tone	0
		94. Phone number does not exist	0
		10. Answering machine	0
		11. Fax line- data line	0
		12. Wrong address/ moved away and could not get the new references	0
481	Total contacted		

### Response Outcomes: West Bank and Gaza ES 2019

Target and totals	Sample target	360
	Sample target completion rate	101.4%
	Total contacts available in frame	761
	Total contacts issued	595

	Eligibles	366
	Screener refusal	25
	Ineligible + out of target	90
	Unobtainable	0
Interview phase (only if eligible)	Complete interviews without extra module	0
	Complete interviews with extra module	365
	Eligible in process + incomplete interviews	0
	Interview refusal	25
Percent breakdown (relative to total contacted)	Screening in process rate	0.0%
	Screener refusal rate	5.2%
	Ineligible + out of target rate	18.6%
	Unobtainable rate	0.0%
	Interview conversion rate	75.6%
	Eligible in process + incomplete interviews rate	0.0%
	Interview refusal rate	5.2%

#### A.41.3. Universe estimates

Universe estimates for the number of establishments in each cell in West Bank and Gaza were produced for the strict, weak and median eligibility definitions described in section 5.2. The estimates were the multiple of the relative eligible proportions.

The following graph shows the different eligibility rates calculated for firms in the sample frame under each set of assumptions.

Eligibility Rates According to Assumptions Percent  
Eligible West Bank and Gaza ES, 2019

Universe estimates for the number of establishments in each industry-region-size cell in West Bank and Gaza were produced for the strict, weak and median eligibility definitions. Tables below show the universe estimates of the numbers of registered establishments that fit the criteria of the ES.

#### Universe Estimate Based on Sampling Weights

##### Strict Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>West Bank</b>	Small (5-19)	2122	1225	1666	<b>5811</b>
	Medium (20-99)	339	97	287	
	Large (100 or more)	35	8	30	
<b>Gaza Strip</b>	Small (5-19)	581	571	689	<b>2103</b>
	Medium (20-99)	91	48	105	
	Large (100 or more)	6	2	9	
		<b>3175</b>	<b>1952</b>	<b>2787</b>	<b>7914</b>

##### Median Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>West Bank</b>	Small (5-19)	2207	1243	1623	<b>5929</b>
	Medium (20-99)	376	105	299	
	Large (100 or more)	38	8	30	
<b>Gaza Strip</b>	Small (5-19)	618	593	687	<b>2184</b>
	Medium (20-99)	103	53	112	
	Large (100 or more)	6	2	9	
		<b>3348</b>	<b>2004</b>	<b>2761</b>	<b>8113</b>

##### Weak Universe Estimates – Fresh:

		Manufacturing	Retail	Other Services	Grand Total
<b>West Bank</b>	Small (5-19)	2207	1243	1623	<b>5929</b>
	Medium (20-99)	376	105	299	
	Large (100 or more)	38	8	30	
<b>Gaza Strip</b>	Small (5-19)	618	593	687	<b>2184</b>
	Medium (20-99)	103	53	112	
	Large (100 or more)	6	2	9	
		<b>3348</b>	<b>2004</b>	<b>2761</b>	<b>8113</b>

#### A.41.4. Non-response

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a) For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b) Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. The following graph shows non-response rates for the sales variable, d2, by sector. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

As the following graph shows, the number of interviews per contacted establishments was 0.76.<sup>81</sup> This number is the result of two factors: explicit refusals to participate in the survey, as reflected by the rate of rejection (which includes rejections of the screener and the main survey) and the quality of the sample frame, as represented by the presence of ineligible units. The share of rejections per contact was 0.10.

<sup>81</sup> The estimate is based on the total no. of firms contacted including ineligible establishments.

Details on the rejection rate, eligibility rate, and item non-response are available at the level strata. This report summarizes these numbers to alert researchers of these issues when using the data and when making inferences. Item non-response, selection bias, and faulty sampling frames are not unique to West Bank and Gaza. All enterprise surveys suffer from these shortcomings, but in very few cases they have been made explicit.
